Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the [Agricultural and Veterinary Chemicals Code Instrument No. 4 \(MRL Standard\) Amendment Instrument 2015 \(No. 9\)](#).

The amendments will be incorporated into the compilation of the Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012.

The *MRL Standard* is accessible via the ComLaw website www.comlaw.gov.au or the links above.

Proposal to Amend Standard 1.4.2 of the Australia New Zealand Food Standards Code

In the previous notice, the APVMA gazetted that amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*, have been made.

Under Section 82 of the *Food Standards Australia New Zealand Act 1991* the APVMA is proposing to incorporate those variations (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2015 (No. 9)*) to MRLs into Standard 1.4.2. Maximum Residue Limits of the Australia New Zealand Food Standards Code.

MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Standard 1.4.2 in the APVMA *Gazette*. The variations will take effect as from the date of that subsequent notice.

DRAFT VARIATIONS TO THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

Note: The following amendments are in a format that accords with the proposed amending Legislative Instrument which, in turn, has to be consistent with the existing format of Standard 1.4.2 (Maximum Residue Limits) of the *Australia New Zealand Food Standards Code*.

PROPOSED AMENDMENT (AGRICULTURAL AND VETERINARY CHEMICALS CODE INSTRUMENT NO. 4 (MRL STANDARD) AMENDMENT INSTRUMENT 2015 (NO. 9))

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunset.

To commence: on gazettal of variation

Standard 1.4.2 of the *Australia New Zealand Food Standards Code* is varied by –

INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Standard 1.4.2—Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Standard 1.4.2' and quote the correct amendment number.

DEADLINE FOR PUBLIC SUBMISSIONS: 6 pm (AEDT) 3 November 2015

SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

Variations to Standard 1.4.2 of the Australia New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Standard 1.4.2—Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals (No. 6) gazetted on 14 July 2015 (No. APVMA 14).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Standard 1.4.2. A copy of the Amendment Instrument (No. APVMA 8, 2015) accompanies this notice. For a complete and up-to-date version of Standard 1.4.2, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at www.comlaw.gov.au.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Continued Suspension of Certain Products Containing Dimethoate and their Associated Label Approvals

The APVMA has continued the suspension of the registrations and label approvals for eleven agricultural chemical products containing dimethoate, as identified in the table below. The decisions to extend the suspensions of the registrations and label approvals were made under subsections 41(1) and 41(2) of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code).

The suspension of product registrations and label approvals are now in effect until 5 October 2016.

Active constituent approvals are not affected by the APVMA's decision to continue this suspension.

REASONS FOR CONTINUING THE SUSPENSION

The APVMA suspended all products containing dimethoate and their associated labels on 6 October 2011. The dietary exposure concerns that formed the basis of this original suspension of label approvals and product registrations have not altered for the products listed in Table 1. Therefore continued suspension is necessary to ensure that the use of products containing dimethoate does not result in any undue hazard to the safety of people or have an effect that is harmful to human beings. In January 2011, the APVMA published the toxicology component of the report prepared by the Office of Chemical Safety (OCS) in connection with the APVMA's review of dimethoate: *Human Health Risk Assessment of Dimethoate* (the OCS Report). The OCS Report revised the public health standards for dimethoate. The Acceptable Daily Intake (ADI) for dimethoate was reduced from 0.02 mg/kg bw/day to 0.001 mg/kg bw/day. In addition, an Acute Reference Dose (ARfD) of 0.02 mg/kg bw was established.

The APVMA published its *Dimethoate Residues and Dietary Risk Assessment Report* (the Residues Report) in August 2011. The Residues Report considered all of the available information relevant to its review of dimethoate, including the public health standards (ADI and ARfD) set out in the OCS Report. The report included the advice that there was a significant risk that short-term dietary exposures to dimethoate residues arising from use patterns included in the previously approved label particulars would be above (and in some cases well above) the relevant public health standard for short-term exposure to dimethoate, the Acute Reference Dose (ARfD) as set out in the Human Health Risk Assessment of Dimethoate report.

Based on the findings of the OCS report and the residues report, the APVMA has decided to continue the suspension of product registrations under subsection 41(1)(b) of the Agvet Code, because the continued use of, or other dealings with the products containing dimethoate as listed below, in accordance with their instructions for use may be an undue hazard to the safety of people using (i.e. consuming) anything containing dimethoate residues.

In addition, the APVMA has decided that the instructions on the previously approved labels associated with those products may no longer be adequate as they do not have appropriate instructions for the circumstances under which the product should be used, the frequency of use of the product and the withholding period after the use of the product for specific use patterns and crop types. The APVMA has decided to continue the suspension of these labels under Subsection 41(2) and to issue modified instructions for the use of these products during the suspension period.

All other products containing dimethoate are not suspended because their approved labels contain instructions that are consistent with the instructions for use of suspended products. These products may be used according to the instructions on their approved labels.

INSTRUCTIONS

In accordance with subsection 45C(2) of the Agvet Code, a person may only possess, have custody of or deal with a suspended product (as identified in Table 1) in accordance with the instructions contained in this notice of suspension. During the period of suspension, a person may not possess, have custody of, use or deal with any of the suspended products or products bearing suspended labels other than in accordance with:

- the instructions set out at the end of this notice; or
- a permit issued by the APVMA.

In October 2011, a permit specifying modified instructions for use for agricultural products, was issued under section 114 of the Agvet Code (PER 13155 for agricultural products). The duration of this permit has been extended to 5 October 2016. The instructions for use in that permit are consistent with those at the end of this Notice.

WARNING

The registration and label approvals of the products listed above are not in force during the period of suspension. In accordance with subsection 45C(2) of the Agvet Code, a person may only possess, have custody of, use or otherwise

deal with the products identified above in accordance with a permit issued by the APVMA and the instructions set out at the end of this Notice.

The APVMA may cancel permit PER13155 and issue replacement permits at any time during the suspension period. Before using, supplying or otherwise dealing with products containing dimethoate, suppliers and users need to be satisfied that the instructions set out at the end of this Notice continue to apply, and that their activities are authorised by a permit. Current permits are available at www.apvma.gov.au/permits/search.php

According to subsection 45B(5) of the Agvet Code this notice does NOT authorise the holder or person to manufacture or import the suspended product.

From 6 October 2015 failure to comply with the instructions set out at the end of this Notice is an offence which attracts a penalty of 300 units under section 45C(2) of the Agvet Code.

Further, from 6 October 2011 to 6 October 2016 failure to comply with the instructions set out in the Gazette Notices of 11 October 2011, 25 September 2012, 24 September 2013 and 7 October 2014 is an offence which attracts a penalty of 300 units under section 45C(2) of the Agvet Code.
