Date: 7 February 2024

To whom it may concern

I write in response to a request for comments on an application from FMC Australasia Pty Ltd to vary the registration of Trojan Insecticide containing 150 g/L gamma-cyhalothrin to add uses on oats, rye and triticale.

This submission is presented on behalf of the Australian Export Fodder Industry through a research project funded by AgriFutures Australia. That research project:

- Is undertaken on behalf of the Australian Export Fodder Industry.
- Is funded and supported by AgriFutures Australia.
- Is conducted on behalf of a range of members across the entire Australian fodder supply chain.
- Reviews current and proposed revisions to market MRLs.
- Provides advice to government on export fodder industry views in relation to the impact on market access of chemicals in use on Australian fodder.

On behalf of the export fodder industry, I advise that based on the information provided by APVMA in the Trade Advice Notice dated January 2024, the industry does not object to the proposed registration.

Should you have any questions on this submission please do not hesitate to contact me.

Regards

Gerard McMullen
Consultant to Agrifutures Australia on behalf of the Australian Export Fodder Industry
