The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

## **General information**

The APVMA Gazette is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

## **Distribution and subscription**

<b>Application no.</b>	143187
<b>Active constituent</b>	Gibberellic acid
<b>Applicant name</b>	Shandong Rainbow International Co Ltd
<b>Applicant ACN</b>	N/A
<b>Date of approval</b>	16 October 2024
<b>Approval no.</b>	94690
<b>Description of the application and its purpose, including the intended use of the active constituent</b>	Approval of the active constituent gibberellic acid for use in agricultural chemical products

## Application for a new active constituent – liquefied petroleum gas

The APVMA has before it an application for the approval of a new active constituent, liquefied petroleum gas for use in agricultural products. This active constituent is proposed for use in Raid Crawling Insect Spray.

**Table 7: Particulars of the active constituent**

<b>Common name</b>	Liquefied petroleum gas
<b>IUPAC name</b>	Petroleum gases, liquefied
<b>CAS name</b>	Liquefied petroleum gases
<b>CAS registry number</b>	68476-85-7
<b>Minimum purity</b>	990 g/kg
<b>Molecular formula</b>	Unspecified [Mixture of pentanes (C <sub>5</sub> H <sub>12</sub> ), butanes (C <sub>4</sub> H <sub>10</sub> ) and propane (C <sub>3</sub> H <sub>8</sub> )]
<b>Mode of action</b>	Liquefied petroleum gas is a fuel gas comprising mixture of propane, butanes and pentanes. The main components are propane, n-butane, and isobutane with minor amounts of pentane isomers. It acts by freezing of the insects caused by rapid cooling of the expanding hydrocarbon gases as they pass through the nozzle of the aerosol sprayer. This is a physicochemical phenomenon associated with all real gases known as the Joule-Thomson effect

### Summary of the APVMA's evaluation of liquefied petroleum gas active constituent

The APVMA has evaluated the chemistry aspects of the proposed active constituent liquefied petroleum gas (physico-chemical properties, stability, identification, manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

The APVMA has considered the toxicological aspects of liquefied petroleum gas and concluded that there are no toxicological concerns to the approval of this active constituent. The establishment of an acceptable daily intake (ADI), acute reference dose (ARfD) and MRLs is not required for liquefied petroleum gas as the active constituent is not proposed for use in food producing animals or crops.

Liquefied petroleum gas contained in pressurised spray cans is not scheduled in the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP).

Based on the data provided, and the toxicological assessment, it is proposed that the following active constituent standard be established for liquefied petroleum gas:

Constituent	Specification	Level
Liquefied petroleum gas	Petroleum gases, liquefied (in preparations packed in pressurised spray containers)	Minimum purity 990 g/kg (sum of propane, n-butane and isobutane, determined at a pressure of 43–48 psig at 25 °C)

Impurities of toxicological significance are not expected to occur in liquefied petroleum gas as a result of refining from crude oil or extraction during the processing of natural gas.

The APVMA is satisfied that the proposed approval of liquefied petroleum gas meets the safety criteria as defined in section 5A of the Agricultural and Veterinary Chemicals Code (the Agvet Code).

### Making a submission

In accordance with section 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether liquefied petroleum gas should be approved. Submissions should relate only to matters that are

considered in determining whether the safety criteria set out in section 5A of the Agvet Code have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

**Please note:** Submissions will be published on the APVMA's website, unless you have asked for the submission to remain confidential (see [public submission coversheet](#)).

Please lodge your submission with a [public submission coversheet](#), which provides options for how your submission will be published.

Note that all APVMA documents are subject to the access provisions of the *Freedom of Information Act 1982* and may be required to be released under that Act should a request for access be made.

## Application for a new product – Raid Crawling Insect Spray containing liquefied petroleum gas

The APVMA has before it an application for registration of a new product, Raid Crawling Insect Spray, containing a new active constituent, liquefied petroleum gas.

**Table 8: Particulars of the application**

<b>Proposed product name</b>	Raid Crawling Insect Spray
<b>Applicant company</b>	S.C. Johnson & Son Pty Ltd
<b>Name of active constituent</b>	Liquefied petroleum gas
<b>Signal heading</b>	Not required
<b>Summary of proposed use</b>	Immobilisation of crawling insects in household situations based on cryogenic effects (freezing) of expanding hydrocarbon propellant gas which allows for subsequent removal of the pest
<b>Pack sizes</b>	200 g – 400 g
<b>Withholding period</b>	Not applicable

A summary of the APVMA's evaluation of Raid Crawling Insect Spray in accordance with the requirements of section 14(1)(C) of the Agricultural and Veterinary Chemicals Code (the 'Agvet Code'), scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*:

- 1) The APVMA has evaluated the application and in its assessment in relation to whether the safety criteria have been met in accordance with the definition set out in section 5A of the Agvet Code, proposes to determine that:
  - i. The APVMA is satisfied that proposed use of Raid Crawling Insect Spray would not be an undue hazard to the safety of people exposed to it during its handling and use.
 

The product is intended for use in indoor settings only (home garden use) and will be applied as a surface spray. LPG contained in pressurised spray cans is not subject to control by Scheduling. The APVMA has conducted a risk assessment on the product and concluded that it can be used safely.

No Acceptable Daily Intake (ADI), or Acute Reference Dose (ARfD) are required as the product is not for use in food-producing crops.
  - ii. The APVMA is satisfied that the proposed use of Raid Crawling Insect Spray will not be an undue hazard to the safety of people in relation to its residues as the product is proposed for use as a home garden product, is limited to indoor use, and contains instructions not to spray onto exposed foods or food utensils.
  - iii. The APVMA is satisfied that the proposed use of the new product Raid Crawling Insect Spray containing the active constituent liquefied petroleum gas, would not be likely to have an unintended effect that is harmful to animals, plants or the environment.
 

The product is intended for use in indoor settings only and will volatilise immediately after application. Hence, when used in accordance with label instructions, risks to all non-target organisms are assessed as negligible.

In considering the environmental safety of the proposed use, and the active constituent liquified petroleum gas, the APVMA had regard to the toxicity of the active constituent and its residues, including metabolites and degradation products, in relation to relevant organisms and ecosystems.
- 2) The APVMA has evaluated the application and in its assessment in relation to whether the efficacy criteria have been met in accordance with the definition set out in section 5B of the Agvet Code, and proposes to determine that:

- i. In relation to its assessment of efficacy the APVMA is satisfied that data from trials targeting various common arthropods support the efficacy of the product and adequately demonstrate that, if used according to the product label directions, the product will be effective for its proposed uses.
- 3) The APVMA has evaluated the application and in its assessment in relation to whether the trade criteria have been met in accordance with the definition set out in section 5C of the Agvet Code, proposes to determine that:
- ii. The APVMA is satisfied that the proposed use of Raid Crawling Insect Spray would not adversely affect trade between Australia and places outside Australia as the product is not intended for use in livestock or food crop production.

## Making a submission

In accordance with section 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether Raid Crawling Insect Spray should be registered. Submissions should relate only to matters that are required by the APVMA to be taken into consideration in determining whether the safety, efficacy or trade criteria have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

**Please note:** Submissions will be published on the APVMA's website, unless you have asked for the submission to remain confidential (see [public submission coversheet](#)).

Please lodge your submission with a [public submission coversheet](#), which provides options for how your submission will be published.

Note that all APVMA documents are subject to the access provisions of the *Freedom of Information Act 1982* and may be required to be released under that Act should a request for access be made.

## Variations to Schedule 20 of the Australian New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA MRL Standard and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Schedule 20 – Maximum residue limits of the Australia New Zealand Food Standards Code. This notice pertains to proposals (No. 2) gazetted on 9 July 2024 (No. APVMA 14).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Schedule 20. A copy of the Amendment Instrument (No. APVMA 2, 2024) accompanies this notice. For a complete and up-to-date version of Schedule 20, including these amendments together with their Explanatory Statement, please refer to the [Federal Register of Legislation](#).

Based on dietary exposure assessments and current health standards, the APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied that these MRLs are not harmful to public health. MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A Sanitary and Phytosanitary notification to the World Trade Organization (WTO) was also made in relation to the variations to MRLs in Schedule 20 and no comment was received in response to that notice OR comment was received in response to that notice which has been addressed.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

***Australia New Zealand  
Food Standards Code —  
Schedule 20 — Maximum residue limits Variation  
Instrument No. APVMA 4, 2024***

I, Sheila Logan, delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Sheila Logan  
Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary Medicines  
Authority

Dated this twenty third day of October 2024

## Part 1 Preliminary

### 1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code — Schedule 20 – Maximum residue limits Variation Instrument No. APVMA 4, 2024* (Amendment Instrument).

### 2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette.

### 3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20 – Maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

### 4 Interpretation

In this instrument: —

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

**Principal Instrument** means Schedule 20 – Maximum residue limits in the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

## Part 2 Variations to Schedule 20— Maximum Residue Limits

### 5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

In accordance with section 45A(1)(b) of the Agvet Code, the APVMA publishes this notice of the cancellation, including the following instructions which set out how a person can deal with the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 9.

### Instructions

Instructions for persons who possess, have custody of or use the cancelled active constituent, cancelled product, or the product bearing a cancelled label under section 45B(3) of the Agvet Code.

A person who possesses, has custody of or uses the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 9 in accordance with the instructions contained in this notice, is taken to have been issued with a permit under section 45B(3) of the Agvet Code to possess, have custody of or use the cancelled active constituent, cancelled product or product bearing a cancelled label, in accordance with those instructions.

### Possession or custody

A person may possess the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 9 in accordance with its label instructions for one year from the date of cancellation.

## Use, supply or otherwise deal with

A person may use the cancelled active constituent, cancelled product or products bearing a cancelled label referred to in Table 9 according to its label instructions, including any conditions relating to shelf life or expiry date, for one year after the date of cancellation.

A person may supply or cause to be supplied at wholesale or retail level the cancelled active constituent, cancelled product, or product bearing a cancelled label referred to in Table 9, for one year after the date of cancellation.

## Contraventions

After the day that is one year from the date of cancellation it will be an offence against the Agvet Code to have possession or custody of the cancelled active constituents, cancelled products or products bearing a cancelled label with the intention to supply, or to supply the cancelled active constituent, cancelled product, or product bearing a cancelled label.

It is an offence to possess, have custody of, use, or otherwise deal with the cancelled active constituents, cancelled products or products bearing the cancelled label listed in Table 9 in a manner that contravenes the above instructions.
