The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website, www.apvma.gov.au/publications/gazette/.

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

Erratum Notice

The Australian Pesticides and Veterinary Medicines Authority advises that an error was published in the Commonwealth of Australia Gazette for Agricultural and Veterinary Chemicals, No. APVMA 1, Tuesday, 13 January 2015

In the Notice, the active constituent under ATLAS Flying Insect Spray Fast Knockdown Hypoallergenic Fragrance was incorrectly stated as 1.1 g/kg esbiothrin. The correct amount is 1.26 g/kg esbiothrin.

The correct entry for the Notice of Registration for ATLAS Flying Insect Spray Fast Knockdown Hypoallergenic Fragrance is on page 4 of this Gazette.

2. VETERINARY PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

Application no.:	54438
Product name:	Norfenicol 300 mg/mL Solution For Injection For Cattle And Pigs
Active constituent/s:	300 mg/mL florfenicol
Applicant name:	Norbrook Laboratories Limited
Applicant ACN:	N/A
Summary of use	For the treatment of bacterial infections susceptible to florfenicol in cattle and pigs
Date of registration/approval:	11 June 2015
Product registration no.:	66803
Label approval no.:	66803/54438

Application no.:	62868
Product name:	Envest (Spinosad) 560 mg Chewable Tablets
Active constituent/s:	Each tablet contains 560 mg spinosad
Applicant name:	Elanco Animal Health A Div Of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use	For the prevention, treatment and control of flea infestations and the treatment of flea allergy dermatitis in dogs and cats
Date of registration/approval:	11 June 2015
Product registration no.:	70273
Label approval no.:	70273/62868

Application no.:	62869
Product name:	Envest (Spinosad) 140 mg Chewable Tablets
Active constituent/s:	Each tablet contains 140 mg spinosad
Applicant name:	Elanco Animal Health A Div Of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use	For the prevention, treatment and control of flea infestations and the treatment of flea allergy dermatitis in dogs and cats
Date of registration/approval:	11 June 2015
Product registration no.:	70274
Label approval no.:	70274/62869

Application no.:	62870
Product name:	Trifexis (Spinosad + Milbemycin Oxime) Chewable Tablets For Dogs 18.1–27 kg
Active constituent/s:	Each tablet contains 810 mg spinosad, 13.5 mg milbemycin oxime
Applicant name:	Elanco Animal Health A Div Of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use	For the prevention of heartworm disease; the treatment and control of hookworm, roundworm and whipworm; the treatment, prevention and control of flea infestation; the control of flea allergy dermatitis in dogs 18.1–27 kg
Date of registration/approval:	11 June 2015
Product registration no.:	70275
Label approval no.:	70275/62870
Application no.:	62871
Product name:	Envest (Spinosad) 270 mg Chewable Tablets
Active constituent/s:	Each tablet contains 270 mg spinosad
Applicant name:	Elanco Animal Health A Div Of Eli Lilly Aust Pty Ltd
Applicant ACN:	000 233 992
Summary of use	For the prevention, treatment and control of flea infestations and the treatment of flea allergy dermatitis in dogs and cats

Product name:	Urilin Syrup For Dogs
Active constituent/s:	50 mg/mL phenylpropanolamine hydrochloride
Applicant name:	Dermcare-Vet Pty. Ltd
Applicant ACN:	010 280 010
Summary of use	For use in dogs (bitches) to control urinary incontinence associated with acquired urinary sphincter incompetence
Date of registration/approval:	22 June 2015
Product registration no.:	67499
Label approval no.:	67499/56197
Application no.:	59107
Product name:	Pharmachem Swat Insecticide for Horses
Active constituent/s:	87 g/L permethrin (25:75 cis:trans)
Applicant name:	Bocko P/L & Flexsky P/L (In Partnership) T/A Pharmachem
Applicant ACN:	078 722 371 & 105 967 575
Summary of use	For the control of biting and nuisance flies on horses and as an aid in the treatment of Queensland itch
Date of registration/approval:	22 June 2015
Product registration no.:	68798
Label approval no.:	68798/59107

Application no.:	51102
Product name:	Bob Martin since 1892 Flea Rid for Dogs, Cats, Puppies and Kittens Shampoo
Active constituent/s:	1 g/L pyrethrins, 10 g/L piperonyl butoxide
Applicant name:	Bob Martin (Australia) Pty Ltd
Applicant ACN:	062 627 883
Summary of use	For the control of fleas and to aid in the control of adult brown dog tick on dogs and cats
Date of registration/approval:	22 June 2015
Product registration no.:	65521
Label approval no.:	65521/51102

Application no.:	62813
Product name:	Apex Clindamycin 150 Tablets
Active constituent/s:	Each tablet contains 150 mg clindamycin (as clindamycin hydrochloride)
Applicant name:	Apex Laboratories Pty Ltd
Applicant ACN:	000 397 240
Summary of use	For the oral treatment of dental infections, wounds, abscesses and osteomyelitis caused by bacteria susceptible to clindamycin in dogs and cats
Date of registration/approval:	22 June 2015
Product registration no.:	70247
Label approval no.:	70247/62813

3. VARIATIONS OF REGISTRATION

Application no.:	102789
Product name:	Cooling Gel Topical Cooling And Soothing Gel For Horses
Active constituent/s:	350 mg/g isopropyl alcohol, 2 mg/g eucalyptus oil, 6.26 mg/g camphor, 20 mg/g menthol
Applicant name:	Floris Veterinaire Produkten B.V
Applicant ACN:	N/A
Summary of variation:	To change the distinguishing name from 'TROY COOLING GEL TOPICAL COOLING AND SOOTHING GEL FOR HORSES' to 'COOLING GEL TOPICAL COOLING AND SOOTHING GEL FOR HORSES'
Date of variation:	27 May 2015
Product registration no.:	38753
Label approval no.:	38753/102789

Application no.:	62832
Product name:	Pharmachlor CTC Chlortetracycline Soluble Powder
Active constituent/s:	950 g/kg chlortetracycline hydrochloride
Applicant name:	Bayer Australia Ltd (Animal Health)
Applicant ACN:	000 138 714
Summary of variation:	To vary the registered particulars and label particulars
Date of variation:	10 June 2015
Product registration no.:	54719
Label approval no.:	54719/62832

Application no.:	58703
Product name:	Y-TEX Agressor Cattle Ear Tags
Active constituent/s:	80 g/kg abamectin, 180 g/kg piperonyl butoxide
Applicant name:	Landmark Operations Limited
Applicant ACN:	008 743 217
Summary of variation:	To extend use to dairy cattle (including lactating dairy cattle)
Date of variation:	10 June 2015
Product registration no.:	62199
Label approval no.:	62199/58703

Application no.:	101024
Product name:	Vetmedin 5 mg Chewable Tablets For Dogs
Active constituent/s:	each tablet contains 5 mg pimobendan
Applicant name:	Boehringer Ingelheim Pty Limited, Vetmedica Division
Applicant ACN:	000 452 308
Summary of variation:	To update the claims to include use in large breed dogs with preclinical DCM
Date of variation:	23 June 2015
Product registration no.:	60798
Label approval no.:	60798/101024

Application no.:	101027
Product name:	Vetmedin 2.5 MG Chewable Tablets For Dogs
Active constituent/s:	each tablet contains 2.5 mg pimobendan
Applicant name:	Boehringer Ingelheim Pty Limited, Vetmedica Division
Applicant ACN:	000 452 308
Summary of variation:	To update the claims to include use in large breed dogs with preclinical DCM
Date of variation:	23 June 2015
Product registration no.:	60799
Label approval no.:	60799/101027

4. LABEL APPROVAL

Application no.:	101769
Product name:	Aristopet Stop-Itch
Active constituent/s:	15 g/L povidone-iodine, 6 g/L iodophor, (equivalent to 0.75% available iodine)
Applicant name:	Aristopet Pty Ltd
Applicant ACN:	145 418 882
Summary of use:	To add an additional label name to the product under 'GREASY HEEL AND FUNGAL SKIN LOTION'
Date of approval:	12 June 2015
Label approval no.:	56564/101769

5. VARIATION OF LABEL APPROVAL

Application no.:	61548
Product name:	Ultravac Scourshield Vaccine
Active constituent/s:	Bovine rotavirus G6 \geq 1.3 RP/2 mL, Bovine rotavirus G10 \geq 1 RP/2 mL, Bovine coronavirus \geq 1 RP/2 mL, E. coli K99 \geq 1 RP/2 mL
Applicant name:	Zoetis Australia Pty Ltd
Applicant ACN:	156 476 425
Summary of variation:	To add subcutaneous route of administration
Date of variation:	18 June 2015
Label approval no.:	65032/61548

Approved Active Constituents

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has approved or varied the relevant particulars or conditions of the approval of the following active constituents, with effect from the dates shown.

1. ACTIVE CONSTITUTENT

Application no.:	100598
Active constituent/s:	Trifloxystrobin
Applicant name:	Yongnong Biosciences Co., Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	11 June 2015
Approval no.:	80311

Application no.:	100671
Active constituent/s:	Terbutylazine
Applicant name:	Shandong Binnong Technology Co., Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	11 June 2015
Approval no.:	80351

Application no.:	100580
Active constituent/s:	Pymetrozine
Applicant name:	Syngenta Australia Pty Ltd
Applicant ACN:	002 933 717
Summary of use:	For use in agricultural chemical products
Date of approval:	11 June 2015
Approval no.:	80303

Application no.:	63115
Active constituent/s:	Ethofumesate
Applicant name:	Adama Australia Pty Limited
Applicant ACN:	050 328 973
Summary of use:	For use in agricultural chemical products
Date of approval:	19 June 2015
Approval no.:	70315

Application no.:	100487
Active constituent/s:	S-Metolachlor
Applicant name:	Shandong Binnong Technology Co., Ltd
Applicant ACN:	N/A
Summary of use:	For use in agricultural chemical products
Date of approval:	30 June 2015
Approval no.:	80258

Fluensulfone in the product Nimitz 480 EC Nematicide

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application from ADAMA AUSTRALIA PTY LTD, for registration of a new product containing the active constituent fluensulfone. The product NIMITZ 480 EC NEMATICIDE is for use prior to planting the following crops: Cucurbits, Tomatoes (not for processing), Capsicum, Chilli, Eggplant and Okra.

PARTICULARS OF THE APPLICATION

Proposed product name(s):	NIMITZ 480 EC NEMATICIDE
Applicant company:	ADAMA AUSTRALIA PTY LTD
Name of active constituent:	Fluensulfone
Signal heading:	Schedule 6
Summary of proposed use:	For control of Root-knot nematode in the following transplanted crops: Cucurbits, Tomatoes (not for processing), Capsicum, Chilli, Eggplant and Okra.
Pack sizes:	500 ml–1000 L
Withholding period:	Harvest: Not required when used as directed. Grazing: Do not graze treated crop, or feed treated crop commodities to livestock.
States:	Queensland only

SUMMARY OF THE APVMA'S EVALUATION OF NIMITZ 480 EC NEMATICIDE IN ACCORDANCE WITH SECTIONS 14(3)(E) AND (F) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994*

The APVMA has evaluated the application and in its assessment in relation to human and environmental safety under section 14(3)(e) of the Agvet Code, it proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of NIMITZ 480 EC NEMATICIDE containing the active constituent fluensulfone would not be an undue hazard to the safety of people exposed to it during its handling and use.

The Office of Chemical Safety (OCS) in the Department of Health has conducted a risk assessment on the product and concluded that it can be used safely.

The product will be used for commercial use situations, and farmers and their employees will be the main users of the product. Workers may be exposed to the product when opening containers, mixing/loading, application (or connecting containers during chemigation and cleaning up spills and equipment). The main route of exposure to the product/spray will be dermal and inhalation, with limited occupational exposure possible during mixing/loading and application.

In the absence of exposure data for the proposed mode of application, the Pesticide Handler Exposure Database (PHED) Surrogate Exposure Guide was used to estimate exposure. Exposure to the product by the stated

application methods was at an acceptable level when a single layer of clothing (cotton overalls or equivalent clothing) and elbow-length chemical resistant gloves are worn.

Based on the risk assessment, a First Aid Instruction, Safety Directions and a Warning statement have been recommended for the product label.

- (ii) The APVMA is satisfied that the proposed use of NIMITZ 480 EC NEMATICIDE will not be an undue hazard to the safety of people using anything containing its residues provided the product is used in accordance with the proposed label directions.

Long term (chronic) dietary exposure as estimated by the national estimated dietary intake calculation is acceptable. The short term (acute) dietary exposure as estimated by the national estimated short term intake calculation is also acceptable.

Maximum Residue Limits (MRLs) for cucurbits, fruiting vegetables (other than cucurbits) and animal commodities have been recommended.

- (iii) The APVMA is satisfied that the proposed use of NIMITZ 480 EC NEMATICIDE containing the active constituent fluensulfone is not likely to be harmful to human beings if used according to the product label directions.

A comprehensive toxicology and public health dataset was submitted for registration of the active constituent fluensulfone and associated product in the United States of America, Canada and Australia as part of a Global Joint Review. The toxicology assessment of fluensulfone was conducted jointly by scientists from the United States (US EPA), Canada (PMRA), and Australia (OCS).

Fluensulfone is a new chemical class of nematicide. The product, NIMITZ 480EC Nematicide an emulsifiable concentrate formulation containing 480 g/L fluensulfone, is a commercial use nematicide and is to be applied to bare soil pre-planting of seedlings and immature plants, including cucurbits and fruiting vegetables. The product will be available in high density polyethylene (HDPE) containers of 500 mL to 1000 L and will be applied at a label rate of 4–8 L/ha as a coarse spray using conventional broadcast spray application equipment or by ground application through band application or drip irrigation methods. The maximum proposed application rate is a single application of 3.84 kg a.i. per hectare.

Fluensulfone was of low acute oral, acute dermal and acute inhalational toxicity in rats. It was a slight skin irritant in rabbits but was not an eye irritant in the same species. It was a skin sensitiser in guinea pigs.

The systemic toxicity of fluensulfone in dietary studies consisted primarily of decreased body weight and body weight gain, and changes in haematology parameters. This systemic toxicity profile was observed in short-term, subchronic and chronic toxicity studies in rats, mice and dogs, with the available data indicating that rats and dogs were more sensitive than mice. No treatment related effects were observed upon short term dermal administration of fluensulfone up to 400 mg/kg bw/day in rats. In a 90–day inhalational study in rats (nose only), effects were seen at the lowest concentration tested of 40 mg/m³ (decreased weight gain, increased prothrombin time, decreased thymus weight and histopathology in the epiglottis).

In a dietary carcinogenicity study in mice, an increase was seen in the incidence of alveolar/bronchiolar adenomas and alveolar/bronchiolar adenomas and carcinomas combined in female mice. The relevance of this finding to humans was considered in Mode of Action studies; however, the available data were insufficient. No increased incidence of tumours was seen in male mice, or male and female rats in a 2–year dietary study.

Fluensulfone was a neurotoxicant producing neurobehavioural changes following administration of a bolus (i.e. gavage) dose, but such findings were not seen for dietary administration. Fluensulfone was not an *in vivo*

genotoxicant, a reproductive or teratogenic toxicant, or an immunotoxicant, and studies on metabolites provided no data that indicates that the observed level of these metabolites and their limited toxicity profile presents a toxicological concern.

The product NIMITZ 480EC Nematicide has low acute oral, dermal and inhalational toxicity in rats, is a moderate skin and eye irritant in rabbits, and is a skin sensitiser in guinea pigs. Additionally, NIMITZ 480EC Nematicide is considered to be an aspiration hazard based on the formulated products toxicological profile.

The APVMA has considered the findings of the Department of Health and accepts these conclusions. Based on an assessment of the toxicology, it was considered that there should be no adverse effects on human health from the use of NIMITZ 480 EC NEMATICIDE when used in accordance with the label directions.

- (iv) The APVMA is satisfied that the proposed use of fluensulfone in the product NIMITZ 480 EC NEMATICIDE for the control of soil nematodes would not be likely to have an unintended effect that is harmful to animals, plants or things or to the environment if used according to the product label directions.

The Department of the Environment has assessed data in support of the proposed use and has concluded that the risks to the environment from this use are acceptable.

Fluensulfone is stable to hydrolysis but it readily degrades by aquatic photolysis, and can be expected to be fairly degradable in water systems. Aerobic soil microbial degradation is expected to be a significant route for environmental degradation of the nematicide which is not identified as persistent. Fluensulfone does not very strongly adsorb to soil and is expected to be of high to medium mobility. It is not expected to bioconcentrate in aquatic species.

Fluensulfone is practically nontoxic to birds with acute exposure and did not exhibit toxicity in reproduction studies. Acute toxicity tests showed that the chemical and its metabolites are slightly toxic to fish and aquatic invertebrates, chronic studies indicated also only slight toxicity. Fluensulfone and the proposed formulation are very highly toxic to green algae; while several of its metabolites are at worst slightly toxic to these organisms. Acute oral or contact exposure studies showed it is only very slightly toxic to honeybees. Fluensulfone is slightly toxic to earthworms and is not expected to have adverse effects on earthworm or soil arthropod survival and reproduction. It is not expected to have significant effects on soil nitrogen transformation and carbon turnover. Fluensulfone is not expected to have significant phytotoxic effects on non-target plants.

The Department has considered the potential risk to organisms in the terrestrial and aquatic environment from the proposed uses of the product, based on ground application by low boom sprayers and by drip irrigation as proposed by the draft label. The risk assessment determined that under the proposed use pattern the uses are unlikely to pose an environmental risk to birds and mammals. The risk to aquatic organisms from leaching, spray drift or runoff is acceptable provided a downwind no-spray zone is established and the label bears appropriate warning statements regarding to avoid runoff.

The APVMA has considered the findings of the Department of the Environment and accepts these conclusions.

- (v) The APVMA is considering whether the proposed use of NIMITZ 480 EC NEMATICIDE containing the active constituent fluensulfone would not adversely affect trade between Australia and places outside Australia.

Fruiting vegetables, including cucurbits are not considered major export commodities¹ and the overall risk to export trade is considered to be low.

There is potential for residues of fluensulfone to occur in rotational crops, however the initial registration will be restricted to Queensland only, which together with the proposed plant back intervals appropriately mitigate the risk of residues of fluensulfone metabolites occurring in rotational crops that are major export commodities or can be used as animal feeds. For sugarcane, a 2-year plant back interval and also the processing of sugar reduces the risk to trade.

- (vi) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data from trials supporting the efficacy of the product adequately demonstrate that if used according to the product label directions, the product is effective for its proposed uses.

FURTHER INFORMATION

A Public Release Summary (PRS) of the evaluation of this product is available from the APVMA website's 'Public Consultation' page, www.apvma.gov.au/news-and-publications/public-consultations or through the contact listed below.

MAKING A SUBMISSION

In accordance with sections 12 and 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for registration of NIMITZ 480 EC NEMATOCIDE should be granted. Submissions should relate only to matters that the APVMA is required by legislation to take into account in deciding whether to grant the application. These grounds include occupational health and safety, chemistry and manufacture, residues, safety and first aid, environmental fate and toxicity, trade and efficacy. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

When making a submission please include:

- contact name
- company or group name (if relevant)
- email or postal address
- the date you made the submission.

¹ Part 5B of the Vet Requirements Series and Ag Requirements Series, Overseas Trade Aspects of Residues in Food Commodities, August 2004.

All personal and *confidential commercial information (CCI)*² material contained in submissions will be treated confidentially.

Written submissions on the APVMA's proposal to grant the application for registration that relate to the grounds for registration should be addressed in writing to:
