**Australian Pesticides and  
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*.

## GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

## DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au).

Copies of the *APVMA Gazette* from November 1999 until July 2009 will remain available from the APVMA website.

## APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*: Telephone: +61 2 6210 4871

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

## NOTICE OF REGISTRATIONS

### Agricultural Chemical Products

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the registration in respect of the following products, with effect from the dates shown.

#### 1. RESTRICTED PRODUCT

No entries

#### 2. AGRICULTURAL PRODUCTS BASED ON NEW ACTIVE CONSTITUENTS

|                       |                                                                                          |
|-----------------------|------------------------------------------------------------------------------------------|
| Product Name:         | Vivando Fungicide                                                                        |
| Active Constituent/s: | 500g/L metrafenone                                                                       |
| Applicant Name:       | BASF Australia Ltd.                                                                      |
| Applicant ACN:        | 008 437 867                                                                              |
| Summary of Use:       | For the control of powdery mildew of cucurbits and grapes as per the Directions For Use. |
| Date of Registration: | 08 February 2011                                                                         |
| Label Approval No:    | 63487/45789                                                                              |

#### 3. AGRICULTURAL PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

|                       |                                                                                                    |
|-----------------------|----------------------------------------------------------------------------------------------------|
| Product Name:         | Pro-Film 904 Non-Ionic Extender-Sticker-Spreader                                                   |
| Active Constituent/s: | 904g/L di-1-p-menthene                                                                             |
| Applicant Name:       | Miller Chemical & Fertilizer (Australia) Pty Ltd                                                   |
| Applicant ACN:        | 086 969 628                                                                                        |
| Summary of Use:       | For the control of the life of pesticides through extension, sticking and spreading to the target. |
| Date of Registration: | 27 January 2011                                                                                    |
| Label Approval No:    | 65278/50601                                                                                        |

|                       |                                                                                                                                                                                      |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Name:         | Agnetics Amine 625 Selective Herbicide                                                                                                                                               |
| Active Constituent/s: | 625g/L 2,4-D present as the dimethyl amine salt                                                                                                                                      |
| Applicant Name:       | Agnetics Pty Ltd                                                                                                                                                                     |
| Applicant ACN:        | 145 285 070                                                                                                                                                                          |
| Summary of Use:       | For the control of broadleaf weeds in fallow before direct drilling or sowing of cereals and pasture; and in cereal crops, pastures, sugar cane, peanuts and non-agricultural areas. |
| Date of Registration: | 27 January 2011                                                                                                                                                                      |
| Label Approval No:    | 65547/51225                                                                                                                                                                          |

|                       |                                                                                                                                                              |
|-----------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Product Name:         | Verge 500 SC Fungicide                                                                                                                                       |
| Active Constituent/s: | 500g/L flutriafol                                                                                                                                            |
| Applicant Name:       | Syngenta Crop Protection Pty Limited                                                                                                                         |
| Applicant ACN:        | 002 933 717                                                                                                                                                  |
| Summary of Use:       | For the control of certain fungal diseases on wheat, barley and canola when mixed with fertiliser as per the directions for use.                             |
| Date of Registration: | 27 January 2011                                                                                                                                              |
| Label Approval No:    | 65591/51382                                                                                                                                                  |
| Product Name:         | DeltaPRO 25 Professional Insecticide                                                                                                                         |
| Active Constituent/s: | 25g/L deltamethrin                                                                                                                                           |
| Applicant Name:       | Sundew Solutions Pty Ltd                                                                                                                                     |
| Applicant ACN:        | 135 400 261                                                                                                                                                  |
| Summary of Use:       | For the control of cockroaches, a spider, ants, fleas, silverfish, bedbugs, mosquitoes, clothes moths, carpet beetles and other pests in various situations. |
| Date of Registration: | 28 January 2011                                                                                                                                              |
| Label Approval No:    | 65387/50795                                                                                                                                                  |
| Product Name:         | Imtrade Paraquat 250 Herbicide                                                                                                                               |
| Applicant Name:       | Imtrade Australia Pty Ltd                                                                                                                                    |
| Applicant ACN:        | 090 151 134                                                                                                                                                  |
| Summary of Variation: | To change product name from CHEMAG PARAQUAT 250 HERBICIDE to IMTRADE PARAQUAT 250 HERBICIDE                                                                  |
| Date of Variation:    | 28 January 2011                                                                                                                                              |
| Label Approval No:    | 53381/51336                                                                                                                                                  |
| Product Name:         | Rainbow Trifluralin-Oryzalin 250 EC Selective Herbicide                                                                                                      |
| Active Constituent/s: | 125g/L trifluralin, 125g/L oryzalin.                                                                                                                         |
| Applicant Name:       | Shandong Rainbow International Co., Ltd.                                                                                                                     |
| Applicant ACN:        | N/A                                                                                                                                                          |
| Summary of Use:       | For pre emergence control of annual ryegrass, phalaris, wireweed (hogweed) and deadnettle in wheat, barley and canola.                                       |
| Date of Registration: | 28 January 2011                                                                                                                                              |
| Label Approval No:    | 65755/51799                                                                                                                                                  |
| Product Name:         | Agnetics Glyphosate 450 Herbicide                                                                                                                            |
| Active Constituent/s: | 450g/L glyphosate present as the isopropylamine salt                                                                                                         |
| Applicant Name:       | Agnetics Pty Ltd                                                                                                                                             |
| Applicant ACN:        | 145 285 070                                                                                                                                                  |
| Summary of Use:       | For non-selective control of many and perennial weeds in the situations stated in the directions for use table                                               |
| Date of Registration: | 31 January 2011                                                                                                                                              |
| Label Approval No:    | 65548/51227                                                                                                                                                  |

|                       |                                                                                                                          |

| Label Approval No:    | 46429/48625                                                                                               |

## 12. RESTRICTED PRODUCT VARIATION

No entries

## OTHER NOTICES

### Amendments to the MRL Standard

#### AMENDMENT NO. 8N

The Australian Pesticides and Veterinary Medicines Authority (APVMA) sets maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. These MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. At the same time the APVMA is satisfied, from dietary exposure assessment, that the levels are not an undue hazard to human health.

The MRL Standard lists MRLs of substances which may arise from the approved use of those substances or other substances, and provides the relevant residue definitions to which these MRLs apply.

The evaluation process takes into account studies on chemistry, metabolism, analytical methodology, residues, good agricultural practice, toxicology and dietary exposure. From time to time the evaluation process results in amendments to the MRL Standard. It should be noted that relevant MRLs are referred to Food Standards Australia New Zealand for incorporation into Standard 1.4.2 of the Food Standards Code entitled "Maximum Residue Limits".

---

**Note:** "\*" denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals 'At or about the Limit of Analytical Quantitation'*, published in NRA Gazette No.9, p44, 5/9/95).

'T' denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

---

The MRL Standard is also accessible via the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au)

#### TABLE 1: MAXIMUM RESIDUE LIMITS OF PESTICIDES, AGRICULTURAL CHEMICALS, FEED ADDITIVES, VETERINARY MEDICINES AND ASSOCIATED SUBSTANCES IN FOOD COMMODITIES

Residues of substances which may occur in food commodities and for which the following maximum residue limits (MRLs) apply.

| COMPOUND                  | FOOD                    | MRL (mg/kg) |

## Application Summaries

The APVMA publishes complete application summaries on the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.

### APPLICATION SUMMARIES PUBLISHED SINCE THOSE PUBLISHED IN APVMA GAZETTE NO. 2, 1 FEBRUARY 2011.
