NOTICE – NEW AGRICULTURAL ACTIVE CONSTITUENT

PROSULFURON

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, prosulfuron, for use in the control of post-emergent broadleaf weeds in established turfs.

PARTICULARS OF THE ACTIVE CONSTITUENT

Common Name:	Prosulfuron
IUPAC Name:	1-(4-methoxy-6-methyl-1,3,5-triazin-2-yl)-3-[2-(3,3,3-trifluoropropyl)phenylsulfonyl]urea
CAS Name:	<i>N</i> -[[4-(4-methoxy-6-methyl-1,3,5-triazin-2-yl)amino]carbonyl]-2-(3,3,3-trifluoropropyl)benzene sulfonamide
CAS Registry Number:	94125-34-5
Manufacturer's Code:	CGA 152005
Minimum Purity:	950 g/kg
Molecular Formula:	C ₁₅ H ₁₆ F ₃ N ₅ O ₄ S
Molecular Weight:	419.4

Structure:

Chemical Family: Sulfonylurea

SUMMARY OF THE APVMA'S EVALUATION OF PROSULFURON ACTIVE CONSTITUENT

The Chemistry Section of the APVMA has evaluated the chemistry aspects of the active constituent prosulfuron (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided it is proposed that the following minimum compositional standard be established for prosulfuron:

Constituent	Specification	Level
Prosulfuron	White to light beige solid	Minimum 950 g/kg

Other compounds of toxicological significance are not expected to occur in prosulfuron as a result of the raw materials and the synthetic route used in its manufacture.

The Office of Chemical Safety (OCS) of the Department of Health and Ageing has considered the toxicological aspects of prosulfuron, and advised that there are no objections on human health grounds to the approval of prosulfuron.

An acceptable daily intake (ADI) and an acute reference dose (ARfD) for prosulfuron is not required as the proposed use pattern of the product is in a non-food producing situation. The OCS has recommended that prosulfuron be listed in Schedule 5 of the SUSMP with no cut-off.

On 18th October 2011 the Advisory Committee on Chemicals Scheduling (ACCS) recommended to include prosulfuron as a new Schedule 6 entry of the SUSMP.

The APVMA accepts the findings and recommendations of its advisors on these criteria.

SUMMARY OF THE APVMA'S EVALUATION OF FLUXAPYROXAD ACTIVE CONSTITUENT

The Chemistry Section of the APVMA has evaluated the chemistry aspects of active constituent fluxapyroxad (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, it is proposed that the following minimum compositional standard be established for fluxapyroxad:

Other compounds of toxicological significance are not expected to occur in fluxapyroxad as a result of the raw materials and the synthetic route used in its manufacture.

The Office of Chemical Safety (OCS) of the Department of Health and Ageing has considered the toxicological aspects of fluxapyroxad, and advised that there are no objections on human health grounds to the approval of fluxapyroxad.

An acceptable daily intake (ADI) of 0.02 mg/kg bw/day is established based on a no observable effect level (NOEL) of 2.1 mg/kg bw/day from a 24-month dietary study in rat and using a 100-fold safety factor. No acute reference dose (ARfD) for fluxapyroxad has been established, and based on the acute hazard profile no ARfD is required. Based on the toxicity profile, the OCS has proposed that fluxapyroxad be included in Schedule 5 of the SUSMP with no cut-off.

On 18th October 2011 the Advisory Committee on Chemicals Scheduling (ACCS) recommended to include fluxapyroxad as a new Schedule 5 entry of the SUSMP.

The APVMA accepts the findings and recommendations of its advisors on these criteria.

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *MRL Standard* published by the APVMA. The *MRL Standard* lists MRLs of substances which may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, based on dietary exposure assessments and current health standards, that the limits are not harmful to public health.

The *MRL Standard* is accessible via the APVMA website, www.apvma.gov.au

The APVMA has varied the *MRL Standard* as set out below with effect from the date of this notice.

AMENDMENT No. 70, 2012

Note: “*” denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals ‘At or about the Limit of Analytical Quantitation’*, published in NRA Gazette No.9, p44, 5/9/95).

‘T’ denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

Proposal to Amend Standard 1.4.2 of the Australia New Zealand Food Standards Code

In the previous notice, the APVMA gazetted particular amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*.

Under Section 82 of the *Food Standards Australia New Zealand Act 1991* the APVMA is proposing to incorporate these variations (numbered 70) to MRLs into Standard 1.4.2 - Maximum Residue Limits of the Australia New Zealand Food Standards Code.

MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this Notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Standard 1.4.2 in the APVMA *Gazette*. The variations will take effect as from the date of that subsequent notice.

DRAFT VARIATIONS TO THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

Note: The following amendments are in a format that accords with the proposed amending Legislative Instrument which, in turn, has to be consistent with the existing format of Standard 1.4.2 (Maximum Residue Limits) of the *Australia New Zealand Food Standards Code*.

PROPOSED AMENDMENT NO. 70

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

Standard 1.4.2 of the *Australia New Zealand Food Standards Code* is varied by –

INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Standard 1.4.2 - Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

All personal and *confidential commercial information* (CCI)¹ material contained in submissions to the APVMA will be treated confidentially.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Standard 1.4.2' and quote the correct amendment number.

DEADLINE FOR PUBLIC SUBMISSIONS: 6pm (Canberra time) 14 February 2012

SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

Variations to Standard 1.4.2 of the Australia New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Standard 1.4.2 - Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals gazetted on 11 October 2011 (No. APVMA 20). It is noted that the proposed removal of the prochloraz MRL for mandarins has been referred to FSANZ for consideration.

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Standard 1.4.2. A copy of the Amendment Instrument (No. APVMA 6, 2011) accompanies this notice. For a complete and up-to-date version of Standard 1.4.2, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at <http://www.comlaw.gov.au>.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notifications to the World Trade Organization (WTO) in relation to these variations. Separate consultations are continuing in response to those notices.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

**STATEMENT OF COMPATIBILITY FOR A LEGISLATIVE INSTRUMENT
THAT DOES NOT RAISE ANY HUMAN RIGHTS ISSUES**

Statement of Compatibility with Human Rights

Prepared in accordance with Part 3 of the Human Rights (Parliamentary Scrutiny) Act 2011

***Australia New Zealand Food Standards Code — Standard 1.4.2 —
Maximum Residue Limits Amendment Instrument No. APVMA 6, 2011***

This Legislative Instrument made by the Australian Pesticides and Veterinary Medicines Authority (APVMA) is compatible with the human rights and freedoms recognised or declared in the international instruments listed in section 3 of the *Human Rights (Parliamentary Scrutiny) Act 2011*.

Requirement for a Statement of Compatibility with Human Rights

This Legislative Instrument made by the APVMA is not a disallowable instrument pursuant to section 82(2) of the *Food Standards Australia New Zealand Act 1991* and therefore the Statement of Compatibility with Human Rights is not strictly required. Nonetheless, to accord with the spirit of the *Human Rights (Parliamentary Scrutiny) Act 2011*, the APVMA provides this Statement of Compatibility.

Overview of the Legislative Instrument

This Legislative Instrument makes variations to Standard 1.4.2 — Maximum Residue Limits of the *Australia New Zealand Food Standards Code* to include or change maximum residue limits (MRLs) pertaining to agricultural and veterinary chemical products. The variations made to Standard 1.4.2 in this Amendment Instrument put into the Food Standards Code MRLs previously approved by the APVMA as part of the registration of the relevant chemical products. The variations have the effect of allowing the sale of food containing residues within the approved maximum limits but do not present any public health or safety concerns. The variations also do not affect the rights or freedoms of any humans.

Human rights implications

This Legislative Instrument does not engage any of the applicable rights or freedoms.

Conclusion

This Legislative Instrument is compatible with human rights as it does not raise any human rights issues.

Dr Rajumati Bhula, Program Manager, Pesticides Program, APVMA
