The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

## GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

## DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au).

Copies of the *APVMA Gazette* from November 1999 until July 2009 will remain available from the APVMA website.

## NOTICE – NEW VETERINARY CHEMICAL PRODUCTS

### Rosa Canina (Rose Hip) in the Product Canine Rose-Hip Vital

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application from Rose-Hip Vital Pty Ltd, for registration of a new product containing *Rosa canina* (rose hip). The product is **CANINE ROSE-HIP VITAL**. The product may be of benefit for improving the joint health and general well-being of active and aging dogs.

#### PARTICULARS OF THE ACTIVE CONSTITUENT

<b>Common Name:</b>	<i>Rosa canina</i> (rose hip) Fruit Powder
<b>Botanical Origin:</b>	<i>Rosa canina</i> L. (berries)
<b>Physical Form:</b>	Powder

#### SUMMARY OF THE APVMA'S EVALUATION OF ROSA CANINA (ROSE HIP) ACTIVE CONSTITUENT

The Pharmaceutical Chemistry Section of the APVMA has evaluated the chemistry and manufacturing aspects of *Rosa canina* (rose hip) and is satisfied that all the data requirements necessary for the approval of this new active constituent have been met.

#### PARTICULARS OF THE APPLICATION

<b>Proposed Product Name(s):</b>	<b>CANINE ROSE-HIP VITAL</b>
<b>Applicant Company:</b>	Rose-Hip Vital Pty Ltd
<b>Name of Active Constituent:</b>	<i>Rosa canina</i> (rose hip)
<b>Signal Heading:</b>	For animal treatment only
<b>Summary of Proposed Use:</b>	Complementary Animal Health Product (CAHP) that may be of benefit for improving the joint health and general well-being of active and aging dogs
<b>Pack Sizes:</b>	150g, 500g, 1kg
<b>Withholding Period:</b>	Not applicable

#### SUMMARY OF THE APVMA'S EVALUATION OF CANINE ROSE-HIP VITAL IN ACCORDANCE WITH SECTION 14(3)(E) AND (F) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994*

The APVMA has evaluated the application and in its assessment in relation to human and environmental safety under section 14(3)(e) of the Agvet Code, it proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of **CANINE ROSE-HIP VITAL** would not be an undue hazard to the safety of people exposed to it during its handling and use.

This application was assessed in accordance with *The Requirements and Guidelines for Veterinary Herbal Remedies (Guideline 70)*. Evidence was provided to demonstrate that the active constituent in the product is included in the Australian Register of Therapeutic Goods as a listed medicine. The product meets the criteria set out in guideline 70, such that a toxicological assessment was not required for this product.

- (ii) The APVMA is satisfied that the proposed use of **CANINE ROSE-HIP VITAL** will not be an undue hazard to the safety of people using anything containing its residues.

The product is for use in companion animals only. *Rosa canina* (rose hip) is unlikely to enter the food chain and therefore the determinations of an Acceptable Daily Intake (ADI) and Acute Reference Dose (ARfD) are not considered necessary.

- (iii) The APVMA is satisfied that the proposed use of **CANINE ROSE-HIP VITAL** containing the active constituent *rosa canina* (rose hip) is not likely to be harmful to human beings if used according to the product label directions.
- (iv) The APVMA is satisfied that the proposed use of the new product **CANINE ROSE-HIP VITAL** containing the active constituent *rosa canina* (rose hip), would not be likely to have an unintended effect that is harmful to animals, plants, the environment or things if used according to the product label directions.
- (v) The APVMA is satisfied that the proposed use of **CANINE ROSE-HIP VITAL** would not adversely affect trade between Australia and places outside Australia as the product is for use in dogs, which are not food-producing animals and do not produce any major Australian export commodities.
- (vi) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that information provided to support the efficacy of the product meets the efficacy criteria set out in *The Requirements and Guidelines for Veterinary Herbal Remedies (Guideline 70)*, and adequately demonstrates that if used according to the product label directions, the product is effective for its proposed uses.

## FURTHER INFORMATION

### MAKING A SUBMISSION

In accordance with sections 12 and 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for registration of **CANINE ROSE-HIP VITAL** should be granted. Submissions should relate only to matters that the APVMA is required by legislation to take into account in deciding whether to grant the application. These grounds include **occupational health and safety, chemistry and manufacture, residues, safety and first aid, environmental fate and toxicity, trade and efficacy**. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

## Reconsideration of Approvals and Registrations Related to Carbaryl, Part 2–Uses in Agricultural Situations

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has reconsidered all approvals of the active constituent carbaryl, registrations of all products containing carbaryl, and the approvals of all associated product labels.

Carbaryl is a carbamate insecticide that is used for the control of insect pests in a broad range of agricultural and domestic situations, including stored grain, ornamentals, lawns, fruit and vegetables and around buildings. To a lesser extent it is also used in the control of insects on domestic animals.

Following the finalisation of its reconsideration, the APVMA is satisfied that label approvals of carbaryl products used in agricultural situations can be varied to ensure that the requirements for continued label approval will be complied with.

Registrants of four products (listed in [Table 1](#)) voluntarily amended product labels in line with the review findings that can be found in the Final Review Report. The only wettable powder product has been voluntarily cancelled. The APVMA decided to accept the registrants' voluntary actions as they address the concerns that were identified as being reasons to review carbaryl.

On this basis the APVMA is satisfied under 34(1)(a) of the Agvet Code 1994 that continued registration of the products in [Table 1](#) in accordance with their instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling or people using anything containing its residues; and
- not be likely to have an effect that is harmful to human beings.

Following finalisation of its reconsideration of carbaryl, the APVMA is now satisfied under section 34(1)(c) of the Agvet Code Act 1994 that the affirmed label approvals in [Table 1](#) :

- comply with the prescribed requirements under section 14(3)(d) of the Agvet Code, and
- contain adequate instructions relating to the matters referred to in section 14(3)(g) of the Agvet Code.

As an outcome of the review, the registrations of products containing carbaryl and their most recent label approvals, as listed in [Table 1](#), and the active constituent approvals listed in [Table 2](#), have been affirmed. The APVMA has also cancelled product labels, except the most recently approved labels. The cancelled labels are subject to a 2-year phase out period which commences from the date of this notice (14 August 2012).

### POSSESSION AND CUSTODY

A person may possess or have custody of product(s) bearing a cancelled label until 14 August 2014.

### SUPPLY

A person may supply or cause to be supplied product(s) bearing these cancelled labels at wholesale and retail level, until 14 August 2014. After 14 August 2014 it will be an offence against the Agvet Code to have possession or custody of the product(s) with the intention to supply, or to supply the product(s).

### USE

A person may continue to use product(s) bearing these cancelled labels according to the label instructions attached to the container until 14 August 2014.

Any person who possesses, has custody of, supplies, uses, or otherwise deals with product(s) bearing the cancelled labels is taken to have been issued with a permit under s45A(5) and s55(3) of the Agvet Code to possess, have custody of, supply, use or otherwise deal with the product bearing the cancelled labels until 14 August 2014. The supply and use of the product(s) bearing with cancelled labels must be in accordance with the conditions of registration, including any conditions relating to the shelf life or expiry date.

The detailed reasons for these outcomes can be found in the APVMA Final Review Report. Copies of the report or further information can be obtained from the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au) or by request to the Chemical Review Contact Officer on 02 6210 4700 or [chemicalreview@apvma.gov.au](mailto:chemicalreview@apvma.gov.au)

## Affirmation of Approvals and Registrations Following the Reconsideration of Carbendazim

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has reconsidered all approvals of the active constituent carbendazim, registrations of all products containing carbendazim, and the approvals of all associated product labels.

Carbendazim (methyl benzimidazol-2-ylcarbamate) is a systemic benzimidazole fungicide used to control a broad range of diseases on pulses, macadamias and as a timber treatment. It was also used on fruit, pastures in post-harvest food storage and as a pre-planting treatment. The review of carbendazim and thiophanate-methyl commenced in February 2007 and covered occupational health and safety, as well as residue and public health concerns.

Following the finalisation of its reconsideration, the APVMA was not satisfied that the registrations and associated label approvals of products containing carbendazim when used in accordance with the previously approved label instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling or people using anything containing its residues and
- not be likely to have an effect that is harmful to human beings.

The APVMA found that it was necessary to delete several use patterns from carbendazim product labels such as grapes, citrus, custard apples, mangoes, cucurbits (including melons), pome fruits, stone fruit, turf, roses, bananas, strawberries, clover, ginger and sugar cane. Four of these use patterns (bananas, strawberries, ginger and sugarcane) have been deleted as there is no suitable residues data to allow the APVMA to be satisfied as above. It is possible that registrants may, at a later date, apply to add these four uses to labels if suitable supporting data is available.

As an outcome of the review, the approvals of active constituent carbendazim listed in Table 1, and the registrations of products containing carbendazim and their associated label approvals, as listed in Column 6 of Table 2, have been affirmed.

Following the finalisation of its reconsideration of carbendazim, the APVMA is satisfied that label approvals can be varied to ensure that the requirements for continued label approval will be complied with. Therefore the APVMA has varied the conditions of label approval for the labels listed in Column 6 of [Table 2](#).

The APVMA is satisfied that the labels of products listed in [Table 2](#) have been varied and that the products meet the prescribed requirements for continued registration. All previously approved labels listed in Column 4 and Column 5 of Table 2 have been either cancelled or varied and are no longer approved. These labels are subject to a phase out period.

On this basis the APVMA is satisfied that continued registration of the products in accordance with their instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling or people using anything containing its residues
- not be likely to have an effect that is harmful to human beings
- not be likely to have an unintended effect that is harmful to animals, plants or things or to the environment, and
- not unduly prejudice trade or commerce between Australia and places outside Australia

and therefore has affirmed the product registrations and label approvals.

Following the finalisation of its reconsideration, the APVMA is now satisfied that the label approvals listed in Column 6 of [Table 2](#):

- comply with the prescribed requirements under paragraph 14(3)(d) of the Agvet Code, and
- contain adequate instructions relating to the matters referred to in paragraph 14(3)(g) of the Agvet Code.

As an outcome of the review, the approval of carbendazim active constituents listed in [Table 1](#), and the registrations of products containing carbendazim as listed in Table 2 and their associated label approvals, as listed in Column 6 of [Table 2](#), have been affirmed.

The detailed reasons for these reconsiderations can be found in the APVMA Final Review Report and Regulatory Decision. Copies of the report or further information can be obtained from the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au) or by request to the Chemical Review Contact Officer on (02) 6210 4700 or [chemicalreview@apvma.gov.au](mailto:chemicalreview@apvma.gov.au)

# This label contains instructions that are consistent with the previous suspension instructions. Sections 45A(5) and 55(3) of the Agvet Code apply to product bearing this label (two-year phase out). All other cancelled label approvals in this table are to be phased out within 12 months and users must comply with the phase-out instructions below.

### Warning

The product labels listed in Column 4 and 5 of Table 2 are not approved as they have been cancelled.

Sections 45A(5) and 55(3) of the Agvet Code cease to apply in respect of all the product bearing labels listed in Column 4 and Column 5 of Table 2.

A person may not possess, have custody of, use or deal with products bearing the listed cancelled labels except in accordance with the instructions contained in this notice. A failure to comply with them will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It will be an offence for any person to possess with the intent to supply, or deal with the products bearing the cancelled labels after the phase out period ends 14 August 2013 for the label approval numbers listed in Column 4 or after 14 August 2014 for all label approvals listed in Column 5.

The APVMA has issued instructions for using or dealing with products bearing a cancelled label listed in Column 4 or Column 5 of Table 2. These instructions are listed in Attachment 1.

## **ATTACHMENT 1: INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH PRODUCTS BEARING THE CANCELLED LABELS LISTED IN COLUMNS 4 AND 5 OF TABLE 2.**

The following instructions set out how a person can deal with the cancelled products bearing label approvals listed in columns 4 and 5 of Table 2.

### **POSSESSION AND CUSTODY**

A person may possess, have custody of, use or otherwise deal with the product containing a cancelled label as listed in Column 4 and 5 of Table 2 only in accordance with these instructions.

### **SUPPLY**

Product bearing a label listed in Column 4 of Table 2 may only be supplied if a copy of the instructions contained in this notice is securely affixed to the container.

Product bearing a label listed in Column 5 of Table 2 may be supplied without additional instructions as these labels already contain instructions consistent with those of the previous suspension.

A person may supply or cause to be supplied product(s) manufactured prior to 14 August 2012 at wholesale and retail level, until 14 August 2013 for label approvals listed in Column 4 of Table 2 and 14 August 2014 for labels approvals listed in Column 5 of Table 2.

After 14 August 2013 it will be an offence against the Agvet Codes to have possession or custody of any of these products bearing labels listed in Column 4 of Table 2 with the intention to supply, or to supply the product(s).

After 14 August 2014 it will be an offence against the Agvet Codes to have possession or custody of any of these products bearing labels listed in Column 5 of Table 2 with the intention to supply, or to supply the product(s).

### **USE**

Product can only be used in accordance with the instructions contained in this notice during the period of phase out.

Sections 45A(5) and 55(3) of the Agvet Code cease to apply in respect of all the cancelled product bearing labels listed in Column 4 of Table 2. A person may continue to use the product(s) according to the instructions below until 14 August 2013.

Sections 45A and 55(3) of the Agvet Code cease to apply to the products bearing labels listed in Column 5 of Table 2. A person may continue to use the product(s) according to their label instructions until 14 August 2014.

The supply and use of the product(s) must be in accordance with the conditions of registration, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the products listed above in a manner that contravenes these instructions.

**READ THESE INSTRUCTIONS BEFORE USING OR OTHERWISE HANDLING THE PRODUCT.**

When using or otherwise handling the product, follow these instructions.

Other than as specified below, the products must be used in accordance with the instructions on the label attached to the container. Where the instructions below are inconsistent with the label instructions, the instructions on this notice (below) must be followed.

In all States and Territories the following are the instructions for use of these cancelled products containing carbendazim and bearing the labels listed above during the 12-month phase-out period. All other label instructions continue to apply unless otherwise specified below.

STORAGE AND DISPOSAL: Store in a locked room or place away from children, animals, food, feedstuffs, seed and fertilisers.

**Warning statement and Safety Directions (amended)**

WARNING: Contains carbendazim which causes birth defects and irreversible male infertility in laboratory animals. Avoid contact with carbendazim.

SAFETY DIRECTIONS (wetable powder formulations (all strengths) and soluble concentrates 500 g/L or less, greater than 80 g/L only).

Harmful if inhaled or swallowed. Will irritate the eyes and skin. Do not inhale vapour or spray mist. When opening the container, preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist, a washable hat, elbow-length PVC gloves and a half facepiece respirator. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves and contaminated clothing.

## **Cancellation of Certain Registrations of Products Containing Carbendazim**

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has reconsidered all approvals of the active constituent carbendazim, registrations of all products containing carbendazim, and the approvals of all associated product labels.

Carbendazim (methyl benzimidazol-2-ylcarbamate) is a systemic benzimidazole fungicide used to control a broad range of diseases on pulses, macadamias and as a timber treatment. It was also used on fruit, pastures in post-harvest food storage and as a pre-planting treatment. The review of carbendazim and thiophanate-methyl commenced in February 2007 and covered occupational health and safety, as well as residue and public health concerns. The APVMA found that it was necessary to delete several uses patterns from carbendazim product labels such as grapes, citrus, custard apples, mangoes, cucurbits (including melons), pome fruits, stone fruit, turf, roses bananas, strawberries, clover, ginger and sugar cane.

Following the finalisation of its reconsideration, the APVMA is not satisfied that the registrations and associated label approvals of products containing carbendazim when used in accordance with the previously approved label instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling or people using anything containing its residues and
- not be likely to have an effect that is harmful to human beings.

There are four use patterns (bananas, strawberries, ginger and sugarcane) that have been deleted due to lack of residues data to allow the APVMA to be satisfied as above.

As an outcome of the review, the registrations of certain products containing carbendazim, and their associated label approvals, as listed in [Table 1](#), have been cancelled. The approved labels of these particular products have no remaining uses left following implementation of the review findings. The APVMA therefore cannot be satisfied that these labels can be varied and as a result, the product labels and registrations have been cancelled under s.40(1). The remaining 12 products will be confined to pulse crops, macadamia nuts or timber treatment and are the subject of a separate gazette notice.

The detailed reasons for these reconsiderations can be found in the APVMA Final Review Report and Regulatory Decision. The APVMA has issued instructions for using or dealing with products bearing a cancelled label listed in Table 1 that do not contain instructions that are consistent with the previous label suspension instructions. These instructions are listed in Attachment 1.

### ATTACHMENT 1: INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH CANCELLED PRODUCTS LISTED IN TABLE 1.

The following instructions set out how a person can deal with the cancelled products bearing label approvals listed in Table 1.

#### POSSESSION AND CUSTODY

A person may possess, have custody of, use or otherwise deal with a product containing a cancelled label only in accordance with these instructions.

## **SUPPLY**

A person may supply or cause to be supplied product(s) manufactured prior to 14 August 2012 at wholesale and retail level, until 14 August 2013 with the exception of product bearing the label approval 53390/54077 which may be supplied until 14 August 2014.

After 14 August 2013 it will be an offence against the Agvet Codes to have possession or custody of any of these products with the intention to supply, or to supply the product(s), with the exception of product bearing the label approval 53390/54077 which may be dealt with according to its label instructions until 14 August 2014.

Product may only be supplied if a copy of the instructions contained in this notice are securely affixed to the container, with the exception of product bearing the label approval 53390/54077 which may be supplied with no additional instructions.

## **USE**

Product can only be used in accordance with the instructions contained in this notice during the period of phase out following cancellation.

Sections 45A(5) and 55(3) of the Agvet Code cease to apply in respect of all the cancelled product bearing labels as listed above.

A person may continue to use the product(s) according to the instructions below until 14 August 2013 with the exception of product bearing the label approval 53390/54077 which may be used according to its label instructions until 14 August 2014.

The supply and use of the product(s) must be in accordance with the conditions of registration, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the products listed above in a manner that contravenes these instructions.

## **READ THESE INSTRUCTIONS BEFORE USING OR OTHERWISE HANDLING THE PRODUCT.**

When using or otherwise handling the product, follow these instructions. These instructions are already included on the label approval 53390/54077 which may be used according to its label until 14 August 2014.

Other than as specified below, the products must be used in accordance with the instructions on the label attached to the container. Where the instructions below are inconsistent with the label instructions, the instructions on this notice (below) must be followed.

In all states and territories the following are the instructions for use of these cancelled products containing carbendazim and bearing the labels listed above during the 12 month phase out period. All other label instructions continue to apply unless otherwise specified below.

### **Signal heading (amended)**

DANGEROUS POISON

KEEP OUT OF REACH OF CHILDREN

READ SAFETY DIRECTIONS BEFORE OPENING OR USING

### **Prohibited Crop uses**

DO NOT apply to turf, grapes, cucurbits (including melons), citrus fruit, custard apple, mango, pome fruit (apples or pears) or stone fruit (including cherries).

**Storage statement (additional statement for S7)**

STORAGE AND DISPOSAL: Store in a locked room or place away from children, animals, food, feedstuffs, seed and fertilisers.

**Warning statement and Safety Directions (amended)**

WARNING: Contains carbendazim which causes birth defects and irreversible male infertility in laboratory animals. Avoid contact with carbendazim.

SAFETY DIRECTIONS (wetable powder formulations (all strengths) and soluble concentrates 500 g/L or less, greater than 80 g/L only)

Harmful if inhaled or swallowed. Will irritate the eyes and skin. Do not inhale vapour or spray mist. When opening the container, preparing spray and using the prepared spray wear cotton overalls buttoned to the neck and wrist, a washable hat, elbow-length PVC gloves and a half facepiece respirator. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves and contaminated clothing

## Reconsideration of Approvals and Registrations Related to Fipronil

### EXTENSION TO THE SCOPE OF THE CURRENT REVIEW

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has decided to extend the scope of the current fipronil review to reconsider registrations of selected products containing fipronil and all associated label approvals on the basis of environmental concerns.

#### Background

Fipronil is a broad-spectrum phenyl pyrazole insecticide acting on the nervous system of insects by contact or ingestion. Labels describe use for a wide variety of agricultural and horticultural situations. In agriculture, fipronil provides control of both soil and selected foliar insect pests in bananas, brassicas, cotton, potatoes, grapes, sugarcane, pasture, sorghum and mushrooms. Fipronil is also used as an insecticidal seed dressing in rice, canola, sorghum and cotton for the control of mites, worm and thrips. It is also available in ultra-low volume sprays to control locusts in pasture and sorghum. A granular formulation is registered for use in recreational and domestic settings and for commercial turf treatment. Products containing fipronil are also used to protect structures from subterranean termite damage and to control subterranean termites around domestic and commercial structures.

The current fipronil review commenced in 2003. Fipronil had been nominated for review following reports of adverse experiences involving skin reactions in animals and humans. At that time, environmental concerns were not identified as warranting reconsideration. This position changed after the fipronil review commenced.

Shortly thereafter the Department of Sustainability, Environment, Water, Population and Communities (DSEWPaC) nominated fipronil as a priority 1 chemical for environmental review. This followed the identification of new information, considered by international regulatory authorities (primarily the European Food Safety Authority in 2006), showing that fipronil and its metabolites are very highly toxic to organisms in the environment, particularly aquatic and terrestrial insects. In addition these new studies provide additional information on the toxicity of fipronil to fish and aquatic invertebrates, bees and non-target arthropods.

#### Reasons for the fipronil review to include environmental considerations

Current uses of fipronil in Australia are diverse and have the potential for significant environmental exposure. Concerns over high application rates for termiticide uses, where the potential exists for contamination of aquatic areas via runoff, and those applications where spray drift and runoff into aquatic areas and impacts on non-target terrestrial species are considered to be very possible will be considered in the review.

DSEWPaC has identified concerns in relation to the appropriateness of end points selected for previous assessments of fipronil. Available summary information and published literature suggests that in previous assessments, some predating the APVMA, where little risk to the environment from the use of fipronil products was concluded, these may not be an accurate reflection of the risks associated with fipronil use in Australia.

The review scope document (Part 2—environmental considerations) subsequently prepared by DSEWPaC outlines significant environmental concerns associated with continued use of selected fipronil agricultural products.

On this basis the APVMA has determined that consideration of these environmental concerns is required and will be achieved through the extension to the scope of the current review to include selected agricultural products only. This will not include veterinary products or agricultural products formulated as baits or gels for ant or cockroach control, nor fly bait stations containing fipronil or termite dusts.

The basis of the reconsideration of selected products containing the active constituent fipronil is whether or not the continued use of, or any dealing with, the active constituent and/or products in accordance with the recommendations for its use or for such a dealing that the APVMA has approved would not be likely to have an unintended effect that is harmful to animals, plants or things or to the environment. It also appears that labels for products containing fipronil may not contain adequate instructions and warning statements in relation to environmental protection.

Therefore, the APVMA will review the following environmental aspects of product registrations for fipronil including, but not limited to:

- Aquatic degradation
- Persistence in environmental media (soil, water and sediment)
- The partitioning in the environment e.g. deposition, adsorption
- Toxicity to fish and aquatic invertebrates, sediment organisms, bees and non-target arthropods.

The APVMA will also consider whether product labels carry adequate instructions and warning statements.

The requirements for product labels are that the label contains adequate instructions. Such instructions include:

- the circumstances in which the product should be used
- how the product should be used
- the times when the product should be used
- the frequency of the use of the product
- the re-entry period after the use of the product
- the withholding period after the use of the product
- the disposal of the product and its container
- the safe handling of the product and first aid in the event of an accident caused by handling the product
- any other matter prescribed by the regulations.

There are currently 28 registered agricultural products containing fipronil that will be subject to consideration under the extended scope of the fipronil review. The product registrations and label approvals that are to be reconsidered are listed in Table 1 which is located at the end of this notice.

The APVMA's detailed reasons for these reconsiderations can be found in the APVMA's Fipronil Review Scope Document, available on the APVMA website, [www.apvma.gov.au/products/review/current/fipronil.php](http://www.apvma.gov.au/products/review/current/fipronil.php). This document also provides details on the data requirements for this review, specifically the need for provision of a significant number of studies not previously considered.

## **MAKING A SUBMISSION**

Submissions specifically addressing the areas of concern noted in the fipronil review scope document must be in writing and reach the APVMA by 31 August 2012.

Please note that subject to the *Freedom of Information Act 1982*, the *Privacy Act 1988* and the Agvet Codes all submissions received may be made publicly available. They may be listed or referred to in any papers or reports prepared on this subject matter.

The APVMA reserves the right to reveal the identity of a respondent unless a request for anonymity accompanies the submission. If no request for anonymity is made, the respondent will be taken to have consented to the disclosure of their identity for the purposes of Information Privacy Principle 11 of the *Privacy Act 1988*.

The contents of any submission will not be treated as confidential or confidential commercial information unless they are marked as such and the respondent has provided justification such that the material is capable of being classified as confidential or confidential commercial information in accordance with the *Freedom of Information Act 1982* or the Agvet Codes as the case may be.

When making a submission please include:

- Contact name
- Company or Group name (if relevant)
- Postal Address
- Email Address (if available)
- The date you made the submission.

Written submissions specifically addressing the areas of concern noted in the Review Scope Document should be addressed in writing to:

## Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *MRL Standard* published by the APVMA. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The *MRL Standard* is accessible via the APVMA website [www.apvma.gov.au](http://www.apvma.gov.au).

The APVMA has varied the *MRL Standard* as set out below with effect from the date of this notice.

‘T’ denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

### **Proposal to Amend Standard 1.4.2 of the Australia New Zealand Food Standards Code**

In the previous notice, the APVMA gazetted particular amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*.

Under Section 82 of the *Food Standards Australia New Zealand Act 1991* the APVMA is proposing to incorporate these variations (numbered 2P) to MRLs into Standard 1.4.2—Maximum Residue Limits of the Australia New Zealand Food Standards Code.

MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Standard 1.4.2 in the APVMA *Gazette*. The variations will take effect as from the date of that subsequent notice.

## DRAFT VARIATIONS TO THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

Note: The following amendments are in a format that accords with the proposed amending Legislative Instrument which, in turn, has to be consistent with the existing format of Standard 1.4.2 (Maximum Residue Limits) of the *Australia New Zealand Food Standards Code*.

### PROPOSED AMENDMENT NO. 2P

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

### To commence: on gazettal of variation

<i>Commodities of animal origin:</i> Sum of proquinazid and 3-(6-iodo-4-oxo-3-propyl-3H-quinazolin-2-yl)oxy)propionic acid, expressed as proquinazid	
Dried grapes (currants, raisins and sultanas)	2
Edible offal (mammalian)	0.05
Eggs	*0.01
Grapes	0.5
Meat (mammalian)	*0.01
Milks	*0.01
Poultry, edible offal of	*0.01
Poultry meat	*0.01

2. omitting from Schedule 1 the foods and associated MRLs for each of the following chemicals –

<b>Chlorantraniliprole</b>	
<i>Plant commodities and animal commodities other than milk:</i> Chlorantraniliprole	
<i>Milk:</i> Sum of chlorantraniliprole, 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[(methylamino)carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, and 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[[[(hydroxymethyl)amino]carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, expressed as chlorantraniliprole	
Edible offal (mammalian)	*0.01
Fruiting vegetables, other than cucurbits [except peppers, chili]	0.3

3. inserting in alphabetical order in Schedule 1, the foods and associated MRLs for each of the following chemicals –

<b>Chlorantraniliprole</b>	
<i>Plant commodities and animal commodities other than milk:</i> Chlorantraniliprole	
<i>Milk:</i> Sum of chlorantraniliprole, 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[(methylamino)carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, and 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[[[(hydroxymethyl)amino]carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, expressed as chlorantraniliprole	
Edible offal (mammalian) [except liver]	*0.01
Fruiting vegetables, other than cucurbits [except peppers, chili and sweet corn (corn-on-the-cob)]	0.3
Legume vegetables	1
Liver (mammalian)	0.02
Milk fats	0.1
Sweet corn (corn-on-the-cob)	*0.01
<b>Emamectin</b>	
Sum of emamectin B1a and emamectin B1b	
Strawberry	T0.1
<b>Fenbutatin oxide</b>	
Bis[tris(2-methyl-2-phenylpropyl)tin]-oxide	
Fig	T10
<b>Imazalil</b>	
Imazalil	
Mushrooms	T1
<b>Methomyl</b>	
Sum of methomyl and methyl hydroxythioacetimidate ('methomyl oxime'), expressed as methomyl <i>see also</i> thiodicarb	
Coriander (leaves, stem, roots)	T10
Fig	T0.7
Tree tomato (tamarillo)	T1

<b>Prothioconazole</b>	
<i>Commodities of plant origin:</i> Sum of prothioconazole and prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1 <i>H</i> -1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole	
<i>Commodities of animal origin:</i> Sum of prothioconazole, prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1 <i>H</i> -1,2,4-triazol-1-yl)-propan-2-ol), prothioconazole-3-hydroxydesthio(2-(1-chlorocyclopropyl)-1-(2-chloro-3-hydroxyphenyl)-3-(1 <i>H</i> -1,2,4-triazol-1-yl)-propan-2-ol) and prothioconazole-4-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-4-hydroxyphenyl)-3-(1 <i>H</i> -1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole	
Peanut	T*0.02
<b>Spiroxamine</b>	
<i>Commodities of plant origin:</i> Spiroxamine	
<i>Commodities of animal origin:</i> Spiroxamine carboxylic acid, expressed as spiroxamine	
Barley	T*0.05

4. omitting from Schedule 1, under the entries for the following chemicals, the maximum residue limit for the food, substituting –

<b>Chlorantraniliprole</b>	
<i>Plant commodities and animal commodities other than milk:</i> Chlorantraniliprole	
<i>Milk:</i> Sum of chlorantraniliprole, 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[(methylamino)carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, and 3-bromo- <i>N</i> -[4-chloro-2-(hydroxymethyl)-6-[[[(hydroxymethyl)amino]carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1 <i>H</i> -pyrazole-5-carboxamide, expressed as chlorantraniliprole	
Meat (mammalian) (in the fat)	0.02
<b>Emamectin</b>	
Sum of emamectin B1a and emamectin B1b	
Rape seed (canola)	*0.005
<b>Propylene oxide</b>	
Propylene oxide	
Almonds	100
<b>Terbutylazine</b>	
Terbutylazine	
Sorghum	*0.01

## INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Standard 1.4.2 - Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these

grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

All personal and *confidential commercial information* (CCI)<sup>2</sup> material contained in submissions to the APVMA will be treated confidentially.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Standard 1.4.2' and quote the correct amendment number.

**DEADLINE FOR PUBLIC SUBMISSIONS: 6 pm (Canberra time) 11 September 2012**

**SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT**

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

## Application Summaries

The APVMA publishes complete application summaries on the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
