The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website, www.apvma.gov.au/publications/gazette/.

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

NOTICE – NEW AGRICULTURAL ACTIVE CONSTITUENT

Flonicamid

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application from Ishihara Sangyo Kaisha Ltd for the approval of a new active constituent, flonicamid.

Flonicamid is a pyridinecarboxamide compound, with novel systemic insecticidal properties. It has selective activity against *hemipterous* pests, such as aphids and whiteflies, and *thysanopterous* pests and is under development as a foliar, selective aphicide.

Common Name:	Flonicamid
IUPAC Name:	<i>N</i> -cyanomethyl-4-(trifluoromethyl)nicotinamide
CAS Name:	<i>N</i> -(cyanomethyl)-4-(trifluoromethyl)-3-pyridinecarboxamide
CAS Registry Number:	158062-67-0
Manufacturer's Codes:	IKI-220
Minimum Purity:	960 g/kg
Molecular Formula:	C ₉ H ₆ F ₃ N ₃ O
Molecular Weight:	229.2

Structure:

Chemical Family: pyridinecarboxamide compounds

Mode of Action: insecticide

SUMMARY OF THE APVMA'S EVALUATION OF FLONICAMID ACTIVE CONSTITUENT

The Pesticides Program of the APVMA has evaluated the chemistry aspects of Flonicamid active constituent (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for Flonicamid active constituent:

Constituent	Specification
Flonicamid	Flonicamid: 960 g/kg minimum

Other compounds of toxicological significance are not expected to occur in the flonicamid Technical Grade Active Constituent (TGAC).

The Office of Chemical Safety (OCS) has completed a toxicological evaluation of flonicamid.

An Acute Reference Dose (ARfD) of 0.025 mg/kg bw has been set, based on a No-Observed Effect Level (NOEL) of 2.5 mg/kg bw/day in a rabbit developmental study for developmental toxicity, after applying a 100-fold safety factor.

The National Drugs and Poisons Scheduling Committee (NDPSC) have considered flonicamid to be appropriate for inclusion in Schedule 6 (six) of the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP).

The OCS has indicated that there are no objections on toxicological grounds to the approval of the active constituent flonicamid.

The APVMA accepts the findings and recommendations of its advisers on these criteria.

The APVMA is satisfied that the proposed importation and use of flonicamid would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

MAKING A SUBMISSION

In accordance with section 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of Flonicamid should be granted. Submissions should relate only to matters that the APVMA is required by legislation to consider in deciding whether to grant the approval. These grounds include **chemistry and manufacture, and toxicity**. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post. A summary of relevant comments and the APVMA's response will be published on the APVMA website.

When making a submission please include a:

- contact name
- company or group name (if relevant)
- postal address
- email address (if available)
- the date you made the submission.

All personal and **sensitive**¹ material contained in submissions will be treated confidentially.

¹ A full definition of 'Sensitive' is contained in the [Agvet Code](#).

Written submissions on the APVMA's proposal to grant approval for Flonicamid that relate to the **grounds for approval** should be sent by email to chemistry@apvma.gov.au, or by mail to:

NOTICE – REVISION TO EXISTING APVMA STANDARD FOR ACTIVE CONSTITUENTS

Thiacloprid

The Australian Pesticides and Veterinary Medicines Authority (APVMA) invites comment on proposed changes to the current standard for the active constituent thiacloprid. The purpose of the change is to update the standard in accordance with the FAO standard published in 2010.

DESCRIPTION OF THE CHANGE TO THE APVMA STANDARD FOR THIACTOPRID ACTIVE CONSTITUENT

Change to sections:

1. (Description) from:

- The material shall consist of thiacloprid together with related manufacturing impurities and shall be a yellow powder, free from visible extraneous matter and added modifying agents.

to:

- The material shall consist of thiacloprid together with related manufacturing impurities, in the form of a white to light brown coloured crystalline powder, free from visible extraneous matter and added modifying agents.

6.1 (Composition) from:

- Active constituent: 985 g/kg minimum

to:

- Active constituent: 975 g/kg minimum

This revision is to fall in line with the 2010 FAO standard for content thiacloprid available at

www.fao.org/fileadmin/templates/agphome/documents/Pests_Pesticides/Specs/Thiacloprid_2010.pdf

PARTICULARS OF THE ACTIVE CONSTITUENT:

Common Name:	thiacloprid
IUPAC Name:	(Z)-3-(6-chloro-3-pyridylmethyl)-1,3-thiazolidin-2-ylidenecyanamide
CAS Name:	(Z)-[3-[(6-chloro-3-pyridinyl)methyl]-2-thiazolidinylidene]cyanamide
CAS Registry Number:	111988-49-9
Current APVMA Minimum published Purity:	985 g/kg
Revised APVMA Minimum Purity:	975 g/kg
Molecular Formula:	C ₁₀ H ₉ ClN ₄ S
Molecular Weight:	252.7

THE PROPOSED REVISED STANDARD WILL BE AS FOLLOWS:

Version 2—Standard for thiacloprid active constituent

1. **Description:** The material shall consist of thiacloprid together with related manufacturing impurities, in the form of a white to light brown coloured crystalline powder, free from visible extraneous matter and added modifying agents.
2. **Common Name:** thiacloprid
3. **Chemical Name (IUPAC):** (Z)-3-(6-chloro-3-pyridylmethyl)-1,3-thiazolidin-2-ylidenecyanamide
4. **CAS Number:** 111988-49-9
5. **Identity test:** identity of the active constituent must be established by one or more of the following methods: spectroscopic tests (IR spectrum, NMR, mass spectra), Chromatography (HPLC or GC retention time with reference compound) or any other suitable test method.
6. **Composition**
 - 6.1 Active constituent: 975 g/kg minimum

7. Analytical methods

- The analytical method used for the determination of the active constituent and toxicological significant impurities must be validated in accordance with the APVMA guidelines for the validation of analytical methods.
- The APVMA guidelines on validation of analytical methods state that “Analytical methods described in CIPAC handbooks and AOAC International Manual, and in recognized pharmacopoeias [BP, BP (Vet), Ph Eur and USP] for a particular active constituent or formulation are regarded as validated and do not require revalidation. However, the suitability of these methods must be verified under actual conditions of use i.e., the selectivity and accuracy of the method should be demonstrated for the published method when applied to the relevant sample matrix and laboratory conditions.
- When a CIPAC or AOAC method is used for the assay of an active constituent in a bulk active constituent, there is no matrix. The registrants need to check the specificity of the method to ensure there is no interference from impurities or degradation products. However, determination of accuracy of the method is not required as there is no matrix effect. However, when a CIPAC or AOAC method is used for the assay of an active constituent in a formulated product, determination of both specificity and accuracy is required as the matrix is relevant in formulated products (formulated products have different composition and quantities of excipients).
- Refer to [Guidelines for the Validation of Analytical Methods for Active Constituent, Agricultural And Veterinary Chemical Products \(PDF, 164kb\)](#).
- Unless the scope of the collaborative method (CIPAC and AOAC) also includes toxicological significant impurities in the active constituent, validation data for impurities are required.

AOAC: Association of Official Analytical Chemists (The Official Methods of Analysis)

CIPAC: Collaborative International Pesticides Analytical Council

MAKING A SUBMISSION

The APVMA invites any person to submit a relevant written submission as to whether the proposed amendment to the APVMA standard should be granted. Submissions should relate only to matters that the APVMA is required by

legislation to consider in deciding whether to publish the intended revision. These grounds include **chemistry and manufacture, and toxicity**. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

When making a submission please include a:

- contact name
- company or Group name (if relevant)
- email or postal address
- the date you made the submission.

All personal and **confidential commercial information (CCI)**² material contained in submissions will be treated confidentially.

Written submissions on the APVMA's proposal to revise the APVMA standard for thiacloprid that relate to the grounds for approval can be sent by email to: chemistry@apvma.gov.au, or by mail to

OTHER NOTICES

Continued suspension of products containing 2,4-D ethyl, butyl and isobutyl esters and all associated label approvals

The APVMA has extended the period of suspension of the registrations and label approvals of products containing 2,4-D ethyl, butyl and isobutyl esters (referred to as 2,4-D HVE hereafter) identified in the table below. The decisions to suspend the registrations and label approvals were made under subsections 41(1) and 41(3) of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code).

The suspensions are in effect until 31 January 2014.

REASONS

The APVMA has decided that the continued use of, or other dealings with products containing 2,4-D HVE in accordance with current label instructions may be likely to have an unintended effect that is harmful to animals, plants or things or to the environment. In addition, the APVMA has decided that the instructions on currently approved labels for the products may no longer be adequate.

Since 26 September 2006, registrations of products containing 2,4-D HVE and associated label approvals have been suspended primarily because of concerns about damage to non-target crops and vegetation from HVE vapour drift. The APVMA has issued instructions for dealing with and using suspended products during the spray window between 1 May and 31 August. Application of 2,4-D HVE only within this spray window would minimise the risk of unintended harmful effects to native vegetation and susceptible crops.

INSTRUCTIONS FOR POSSESSING, HAVING CUSODY OF, USING OR DEALING WITH SUSPENDED PRODUCTS OR PRODUCT CONTAINING THE SUSPENDED LABELS

Subsections 45A(5) and 55(3) of the Agvet Code cease to apply in respect of the products identified in the table above. During the period of suspension, a person may not possess, have custody of, use or deal with any of the products other than in accordance with:

- the instructions set out at the end of this Notice; and
- a permit issued by the APVMA (PER13339).

WARNING

From 1 February 2013 a person may only possess, have custody of, use or otherwise deal with the products identified above in accordance with any permit issued by the APVMA and the instructions set out at the end of this Notice (see Attachment 1).

Depending on further information that may be received and assessed for the ongoing review of 2,4-D products, the APVMA may cancel any permit(s) and issue replacement permit(s) at any time prior to the expiry dates on the permits. Before using, supplying or otherwise dealing with products containing 2,4-D HVE, suppliers and users need to be satisfied that the instructions set out at the end of this Notice continue to apply, and that their activities are authorised by a permit. Current permits are available at www.apvma.gov.au/permits/search.php

Failure to comply with the instructions set out at the end of this Notice attracts a penalty under section 55(4) of the Agvet Code. The penalty is 300 penalty units (\$33,000).

**ATTACHMENT 1: INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING, OR DEALING WITH
SUSPENDED PRODUCTS, OR PRODUCTS CONTAINING THE SUSPENDED LABELS.**

Possession and custody

A person may possess, have custody of, use, or otherwise deal with the product, or product containing a suspended label only in accordance with these instructions.

Supply

Product may only be supplied, if a copy of the instructions contained in this notice is securely affixed to the container.

Use

These instructions apply to the use of products containing 2,4-D ethyl, butyl or isobutyl ester during the period of suspension in all states and territories.

READ THESE INSTRUCTIONS before using or otherwise handling the product.

When using or otherwise handling the product, follow these instructions.

Other than as specified below, the products must be used in accordance with the instructions on the label attached to the container. Where the below instructions are inconsistent with the label instructions, the instructions in this notice (below) must be followed.

In all states and territories the following are new **DIRECTIONS FOR USE:**

RESTRAINTS:

This is a PHENOXY HERBICIDE that can cause severe damage to native vegetation and susceptible crops such as cotton, grapes, tomatoes, oilseed crops and ornamentals.

DO NOT apply this product between **1 September and 30 April, unless authorised by an APVMA permit**. Use of the product may only occur between **1 May and 31 August**.

DO NOT apply this product by air.

DO NOT apply this product

- in aquatic situations
- to sugar cane
- to rights of way
- as a harvest aid/salvage spray

DO NOT apply more than 800 g ae/ha (1L of this product per ha) (ae=acid equivalent)

DO NOT apply if crop or weeds are stressed due to dry or excessively moist conditions.

DO NOT use unless wind speed is more than 3 kilometres per hour and less than 15 kilometres per hour as measured at the application site.

DO NOT apply with smaller than Coarse spray droplets according to the ASAE S572 definition for standard nozzles.

DO NOT use if rain is likely within 6 hours.

NOT TO BE USED FOR ANY PURPOSE, OR IN ANY MANNER, CONTRARY TO THESE INSTRUCTIONS UNLESS AUTHORISED UNDER APPROPRIATE LEGISLATION.

WITHHOLDING PERIOD: PASTURE, CEREAL CROPS - DO NOT GRAZE OR CUT FOR STOCK FOOD FOR 7 DAYS AFTER APPLICATION.

ADDITIONAL INSTRUCTIONS

Buffer zones

Use only Coarse to Very Coarse spray quality according to ASAE S572 definition for standard nozzles, and a buffer zone of 100 m between field edges and downwind water bodies, native vegetation and sensitive crops.

Permissible Dates of Application of 2,4-D High Volatile Esters

Application of 2,4-D ethyl ester, butyl ester or isobutyl ester must only take place during a spray window between **1 May and 31 August**.

Victoria, Western Australia, Tasmania and Queensland currently have mechanisms whereby the use of specific chemicals (including 2,4-D) is restricted to geographical areas and/or time zones due to the higher risk for adverse off-target crop or environmental effects. These state restrictions on 2,4-D use may place additional requirements on users within this spray window between 1 May and 31 August, for example, length of the spray window and spray equipment. Users must consult their local authority or department of agriculture to ensure they meet state requirements.

Application of 2,4-D only within this spray window will minimise the risk of unintended harmful effects to native vegetation and susceptible crops. Avoid spraying upwind of nearby susceptible crops.

RECORD KEEPING REQUIREMENTS

Within 24 hours of completing a 2,4-D ethyl, butyl or isobutyl ester application all users **must** make and keep a record of each application. The details required in a 2,4-D ester spray record must contain at least the information set out below. It is recommended and considered good practice, that the grower collects from any person acting on his or her behalf a copy of the 2,4-D ester spray record. (For convenience, a 2,4-D record-keeping form can be obtained from the [Australian Pesticides and Veterinary Medicines Authority website](#).)

General:

Name and address of farm owner (or grower if grower is not owner)	Name and address of person who applied 2,4-D	Date of application
Whether neighbours have been notified Y/N (this is not a mandatory requirement)	Map of farm with treated field or paddock outlined on map and field number or name indicated	Area of field or paddock sprayed with 2,4-D

Crop/situation and Pest Details:

Name of crop/situation	Major types of pests present	Pest stage of growth
------------------------	------------------------------	----------------------

Weather Conditions at Application Site:

Conditions at time of application (showers, overcast, partly cloudy, clear sky, inversion conditions)	Temperature and humidity at time of application	Wind speed and direction at beginning of application
Wind consistency (gusty/steady breeze, direction steady/variable)	Whether wind direction changed during application and to where	Whether wind speed changed during application and to what

Application Details:

Sprayer pressure used	Equipment and type of nozzles used	Speed of ground application equipment
Product name or unique APVMA approval number	Amount of 2,4-D product applied per hectare	Total volume of spray mixture applied per hectare
Any additives used in mixture and rate of use	Time at beginning of application	Time at end of application

A statement saying the information on this record is accurate and correct, followed by the signature of the user.

Warning

These products are unregistered and labels are not approved during the period of suspension. A person must not possess with the intent to supply, or deal with any of these products during this period except in accordance with the instructions contained in this notice. A failure to comply with them will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
