The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

## GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

## DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website, [www.apvma.gov.au/publications/gazette/](http://www.apvma.gov.au/publications/gazette/).

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

## Veterinary Chemical Products

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the registration in respect of the following products, with effect from the dates shown.

### 1. VETERINARY PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

<b>Product Name:</b>	Abbeymox Amoxicillin Soluble Powder
<b>Active Constituent/s:</b>	870 g/kg amoxicillin as the trihydrate
<b>Applicant Name:</b>	Abbey Laboratories Pty Ltd
<b>Applicant ACN:</b>	156 000 430
<b>Summary of Use:</b>	For the treatment of amoxicillin sensitive infections in poultry
<b>Date of Registration:</b>	12 March 2013
<b>Label Approval No:</b>	67784/56869

<b>Product Name:</b>	Gastro Intestinal Canine
<b>Active Constituent/s:</b>	N/A
<b>Applicant Name:</b>	Royal Canin Australia Pty Ltd
<b>Applicant ACN:</b>	092 020 178
<b>Summary of Use:</b>	A complete pet diet product which is intended to assist in the nutritional management of dogs with intestinal absorption disorders under veterinary supervision
<b>Date of Registration:</b>	15 March 2013
<b>Label Approval No:</b>	64528/400g/0912

<b>Product Name:</b>	Sensitivity Control SC 27 Feline
<b>Active Constituent/s:</b>	N/A
<b>Applicant Name:</b>	Royal Canin Australia Pty Ltd
<b>Applicant ACN:</b>	092 020 178
<b>Summary of Use:</b>	A complete therapeutic pet diet product intended for nutritional management of cats with food allergy or food intolerance under veterinary supervision
<b>Date of Registration:</b>	15 March 2013
<b>Label Approval No:</b>	63887/46827

<b>Product Name:</b>	Fido's Glucosamine Joint Health Tablets
<b>Active Constituent/s:</b>	500 mg glucosamine hydrochloride
<b>Applicant Name:</b>	Mavlab Pty. Ltd.
<b>Applicant ACN:</b>	009 708 187
<b>Summary of Use:</b>	May help reduce non-infectious joint inflammation and pain associated with arthritic conditions in dogs
<b>Date of Registration:</b>	20 March 2013
<b>Label Approval No:</b>	68228/57792

<b>Product Name:</b>	Dental DSO 29 Feline
<b>Active Constituent/s:</b>	N/A
<b>Applicant Name:</b>	Royal Canin Australia Pty Ltd
<b>Applicant ACN:</b>	092 020 178
<b>Summary of Use:</b>	A complete therapeutic pet diet intended to treat and prevent a range of dental conditions in cats
<b>Date of Registration:</b>	22 March 2013
<b>Label Approval No:</b>	67582/56403

<b>Product Name:</b>	Effipro Cutaneous Spray Solution for Cats and Dogs
<b>Active Constituent/s:</b>	2.5 g/L fipronil
<b>Applicant Name:</b>	Virbac (Australia) Pty Ltd
<b>Applicant ACN:</b>	003 268 871
<b>Summary of Use:</b>	For the treatment and prevention of flea infestations, control of flea allergy dermatitis and control of ticks (including paralysis ticks) and biting lice on cats and dogs
<b>Date of Registration:</b>	26 March 2013
<b>Label Approval No:</b>	64373/48178

<b>Product Name:</b>	Airway Gel
<b>Active Constituent/s:</b>	41 µg/ml clenbuterol hydrochloride
<b>Applicant Name:</b>	Randlab Australia Pty Ltd
<b>Applicant ACN:</b>	114 948 837
<b>Summary of Use:</b>	As an aid in the control of chronic obstructive pulmonary disease and recurrent airway obstruction in horses
<b>Date of Registration:</b>	27 March 2013
<b>Label Approval No:</b>	65910/52280

## 2. VARIATIONS

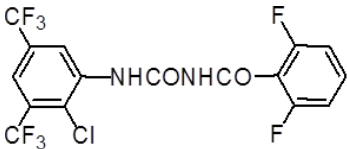

<b>Product Name:</b>	Hill's Prescription Diet j/d Canine Mobility (370 g)
<b>Applicant Name:</b>	Hill's Pet Nutrition Pty Limited
<b>Applicant ACN:</b>	003 954 550
<b>Summary of Variation:</b>	To change the product name from 'HILL'S PRESCRIPTION DIET J/D CANINE' to 'HILL'S PRESCRIPTION DIET J/D CANINE MOBILITY (370 g)', and variation to label approval.
<b>Date of Variation:</b>	20 March 2013
<b>Label Approval No:</b>	60906/370g/0711

<b>Product Name:</b>	Cephalexin 1000 Tablets
<b>Applicant Name:</b>	Apex Laboratories Pty Ltd
<b>Applicant ACN:</b>	000 397 240
<b>Summary of Variation:</b>	To change the product name from 'CEPHALEXIN 1000 ANTIBIOTIC TABLETS' to 'CEPHALEXIN 1000 TABLETS', an additional pack size and a new packaging material
<b>Date of Variation:</b>	21 March 2013
<b>Label Approval No:</b>	59249/57591

## OTHER NOTICES

### New Agricultural Active Constituent—Bistrifluron

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, bistrifluron for use in a termite product.

<b>Common Name:</b>	Bistrifluron (ISO, AS approved)
<b>IUPAC Name:</b>	1-[2-chloro-3,5-bis(trifluoromethyl)phenyl]-3-(2,6-difluorobenzoyl)urea
<b>CAS Name:</b>	N-[[[2-chloro-3,5-bis(trifluoromethyl)phenyl]amino]carbonyl]-2,6-difluorobenzamide
<b>CAS Registry Number:</b>	201593-84-2
<b>Manufacturer's Code:</b>	DBI-3204
<b>Minimum Purity:</b>	970 g/kg
<b>Molecular Formula:</b>	C <sub>16</sub> H <sub>7</sub> ClF <sub>8</sub> N <sub>2</sub> O <sub>2</sub>
<b>Molecular Weight:</b>	446.6
<b>Structure:</b>	
<b>Chemical Family:</b>	Urea
<b>Mode of Action:</b>	Chitin synthesis inhibitor

### SUMMARY OF THE APVMA'S EVALUATION OF BISTRIFLURON ACTIVE CONSTITUENT

The APVMA has evaluated the chemistry aspects of bistrifluron active constituent (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for bistrifluron active constituent:

Constituent	Specification	Level
bistrifluron	bistrifluron	Not less than 970 g/kg

Other compounds of toxicological significance are not expected to occur in bistrifluron technical grade active constituent (TGAC) as a result of the raw materials and the synthetic route used.

The Office of Chemical Safety (OCS) has considered the toxicological aspects of bistrifluron TGAC, and advised that there are no toxicological objections to the approval of this chemical.

Neither an acceptable daily intake nor an acute reference dose has been established for bistrifluron at this stage, as it is not proposed for use in food producing crops or animals.

Bistrifluron is exempt from scheduling and listed in Appendix B of the Standard for Uniform Scheduling of Medicines and Poisons.

The OCS has not specified toxicologically significant impurities in technical grade bistrifluron.

The APVMA accepts the findings and recommendations of its advisers on these criteria.

The APVMA is satisfied that the proposed importation and use of bistrifluron would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

## MAKING A SUBMISSION

In accordance with section 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of bistrifluron should be granted. Submissions should relate only to matters that the APVMA is required by legislation to consider in deciding whether to grant the approval. These grounds include **chemistry and manufacture, and toxicity**. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post. A summary of relevant comments and the APVMA's response will be published on the APVMA website.

When making a submission please include a:

- contact name
- company or group name (if relevant)
- postal address
- email address (if available)
- the date you made the submission.

All personal and **confidential commercial information**<sup>1</sup> material contained in submissions will be treated confidentially.

Written submissions on the APVMA's proposal to grant approval for bistrifluron that relate to the **grounds for approval** should be addressed in writing to:

## NOTICE – NEW AGRICULTURAL CHEMICAL PRODUCTS

### Bistrifluron in the product XTERM™ DEFENCE AGAINST TERMITES

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application from SUMITOMO CHEMICAL AUSTRALIA PTY LIMITED, for registration of a new product containing the active constituent BISTRIFLURON. The product is **XTERM™ DEFENCE AGAINST TERMITES**. The product is for the control of subterranean termite species.

#### PARTICULARS OF THE APPLICATION

<b>Proposed Product Name(s):</b>	XTERM™ DEFENCE AGAINST TERMITES
<b>Applicant Company:</b>	SUMITOMO CHEMICAL AUSTRALIA PTY LIMITED
<b>Name of Active Constituent:</b>	BISTRIFLURON
<b>Poisons Schedule:</b>	Not Required
<b>Summary of Proposed Use:</b>	For the control of subterranean termite species (except <i>Mastotermes darwiniensis</i> )
<b>Pack Sizes:</b>	60 g, 120 g, 1.44 kg (12 x 120 g), 720 g (12 x 60 g)

#### SUMMARY OF THE APVMA'S EVALUATION OF XTERM DEFENCE AGAINST TERMITES IN ACCORDANCE WITH SECTION 14(3)(E) AND (F) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994*

The APVMA has evaluated the application and in its assessment in relation to human and environmental safety under section 14(3)(e) of the Agvet Code, it proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of **XTERM™ DEFENCE AGAINST TERMITES** would not be an undue hazard to the safety of people exposed to it during its handling and use.

The Office of Chemical Safety (OCS) in the Department of Health and Ageing has conducted a risk assessment on the product and concluded that it can be used safely.

Information on worker exposure to bistrifluron or the product Xterm™ Defence Against Termites was not available, and no model is available to estimate worker exposure for the proposed product use pattern. However, both the product and bistrifluron have a low acute toxicity profile, and no toxicologically significant effects were seen at the limit dose of 1000 mg/kg bw/d (the no observable effect level) in a 28-day dermal study in the rat, which was chosen for the occupational health and safety risk assessment.

In view of the nature of the product formulation (eg tablets in plastic cartridges, a bait canister) and its specific use pattern, the user's hands are likely to be exposed to only a very small amount of the chemical which may become dislodged from the tablet. Furthermore, this exposure will be significantly reduced further (up to 90%) when the worker wears latex gloves as required on the product label to prevent contamination of the tablets. Hence, based on the low toxicity profile, the specific formulation and use pattern of the product, and also noting that wearing latex gloves is recommended to prevent contamination of the bait which might deter termites from feeding, the use of personal protective equipment is not considered necessary. Based on the risk assessment, a first aid instruction has been recommended for the product label.

Based on an assessment of occupational health and safety, it was considered that there should be no undue hazard to safety of people from the use of Xterm™ Defence Against Termites when used in accordance with the label directions.

- (ii) The APVMA is satisfied that the proposed use of **XTERM™ DEFENCE AGAINST TERMITES** will not be an undue hazard to the safety of people using anything containing its residues.

The product is not used in food producing situations; therefore the consideration of residues is not relevant for the assessment of this product.

- (iii) The APVMA is satisfied that the proposed use of **XTERM™ DEFENCE AGAINST TERMITES** containing the active constituent BISTRIFLURON is not likely to be harmful to human beings if used according to the product label directions.

The product Xterm™ Defence Against Termites is formulated as a bait tablet (60 g and 120 g wrapped in plastic) containing 10 g/kg bistrifluron that is placed in designed above-ground and in-ground bait stations for the control of subterranean termite species.

In rats, following oral administration, bistrifluron is rapidly and extensively absorbed, and widely distributed to organs and tissues, with the highest level detected in the liver. It is extensively metabolised and elimination from the body was relatively slow and predominantly via the faeces with the urine a minor route of elimination. There was no evidence of bioaccumulation following repeated dosing.

Based on the submitted data, bistrifluron is of low acute oral, dermal and inhalational toxicity in rats, is not a skin or eye irritant in rabbits, and is considered unlikely to be a skin sensitiser in guinea pigs.

Following repeat oral dosing in rats, mice and dogs, the key toxicology findings were reduced food consumption and body weight gain, and changes in liver function, liver weight and liver histopathology. Bistrifluron was not mutagenic *in vitro*, and the observed weak genotoxic potential observed *in vitro* was not expressed *in vivo*. Thus, bistrifluron is not an *in vivo* genotoxicant. Bistrifluron was not carcinogenic in rats and mice, a reproductive toxicant in rats or a developmental toxicant in rats and rabbits. Furthermore, although no neurotoxicity studies were submitted there was no evidence of a neurotoxicity potential in the oral repeat dose studies in rats, mice and dogs.

Xterm™ Defence Against Termites is of low acute oral and dermal toxicity in rats, is not a skin or eye irritant in rabbits, and is considered unlikely to be a skin sensitiser in guinea pigs. No acute inhalational study is available for Xterm™ Defence Against Termites, though its acute inhalation toxicity potential is considered likely to be low given the product constituents and product form.

Based on an assessment of the toxicology, it was considered that there should be no undue hazard to the safety of people from the use of Xterm™ Defence Against Termites when used in accordance with the label directions.

- (iv) The APVMA is satisfied that the proposed use of **XTERM™ DEFENCE AGAINST TERMITES** is not likely to have an unintended effect that is harmful to animals, plants or the environment if used according to the product label directions.

The APVMA is satisfied that the proposed use of the new termite regulator product, Xterm™ Defence Against Termites, containing 1% of the new active constituent bistrifluron for application in household and professional pest control arenas, e.g. farm and commercial sites, around bridges, wharfs, poles, fences, tree stumps, logs etc. using in-ground or above-ground bait stations would not be likely to have an unintended effect that is harmful to animals, plants or things or to the environment.

The Department of Sustainability, Environment, Water, Population and Communities has assessed data in support of the proposed use and have concluded that the risks to the environment from this use are acceptable provided that amendments are made to the draft label.

Bistrifluron is hydrolytically stable under acidic aqueous conditions with an estimated half-life >1 year at room temperature and at pH 4 and 7, but readily hydrolyses under alkaline aqueous conditions (pH 9) with a half-life of 6.0 days at 25°C. Bistrifluron photolyses readily to moderately in sterile water with the half-life being in the range of 1.7 to 22.4 days in aqueous systems.

Bistrifluron dissipated fairly to slightly in aerobic soils with the time for 50 per cent disappearance values in the range of 33–128 days. Bistrifluron is immobile in soil based on the determined partition coefficient value of 37480.

Bistrifluron showed no acute or chronic toxicity to birds. Its acute endpoints to fish, daphnids and algae are all greater than its water solubility limits. It is chronically very toxic to aquatic invertebrates. Bees and earthworms were not sensitive to bistrifluron.

The proposed use pattern of the product indicates that Xterm™ Defence Against Termites is unlikely to be released to the environment.

Based on the proposed use pattern and the low volume, the potential risks to terrestrial invertebrates exposed to the bistrifluron in bait stations, birds and honey bees, natural predators from secondary poisoning, terrestrial vegetation and aquatic life have been considered and assessed. The risk assessment determined that the product Xterm™ Defence Against Termites containing bistrifluron is unlikely to pose an environmental risk under the proposed use pattern, provided the recommended amendments are made to the draft label.

The APVMA has considered the findings of the Department of Sustainability, Environment, Water, Population and Communities and accepts these conclusions.

- (v) The APVMA is satisfied that the proposed use of **XTERM™ DEFENCE AGAINST TERMITES** would not unduly prejudice trade between Australia and places outside Australia as the product is not for use in animals or plants producing Australian export commodities.
- (vi) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data from trials supporting the efficacy of the product adequately demonstrate that if used according to the product label directions, the product is effective for its proposed uses.

## FURTHER INFORMATION

A Public Release Summary (PRS) of the evaluation of this product is available from the APVMA's public consultation web page, [www.apvma.gov.au/consultation/public](http://www.apvma.gov.au/consultation/public) or by contacting the APVMA at the contact listed below.

## MAKING A SUBMISSION

In accordance with sections 12 and 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for registration of **XTERM™ DEFENCE AGAINST TERMITES** should be granted. Submissions should relate only to matters that the APVMA is required by legislation to take into account in deciding whether to grant the application. These grounds include **occupational health and safety, chemistry and manufacture, residues, safety and first aid, environmental fate and toxicity, trade and efficacy**. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

When making a submission please include:

- contact name
- company or group name (if relevant)
- email or postal address
- the date you made the submission.

All personal and **confidential commercial information**<sup>1</sup> material contained in submissions will be treated confidentially.

Written submissions on the APVMA's proposal to grant the application for registration that relate to the **grounds for registration** should be addressed in writing to:

The active constituent approval suspensions are in effect from 14 April 2013 until 14 April 2014.

The product and label suspensions apply as a consequence of the decision to continue the suspension of quintozone active constituent approvals and are in effect from 14 April 2013 until 14 April 2014.

### **BASIS FOR CONTINUED SUSPENSION**

The APVMA became aware of information in 2010 indicating the presence of undeclared dioxins as impurities in products that contain quintozone as the active constituent. On this basis, the APVMA suspended quintozone active approvals, effective 9 April 2010 until 12 April 2011. In April 2011, the APVMA acted again to continue the suspension of all approvals of the active constituent quintozone for a further 12 months, to allow the manufacturer additional time to generate new data. The manufacturer provided the APVMA with additional data but the APVMA continued the suspension of all approvals of the active constituent quintozone until 14 April 2013 to allow time to consider this application. This application is being assessed but the APVMA has not made a decision. The APVMA has decided to continue the suspension of the active constituent approvals for a further 12 months until 14 April 2014.

In January 2013, one of the active constituent approvals (approval No. 46112) was voluntarily cancelled.

Dioxins are listed as toxicologically significant impurities in the *Definition of Standards for Active Constituents* (see [www.apvma.gov.au/products/constituents/standards/actives\\_definition.php](http://www.apvma.gov.au/products/constituents/standards/actives_definition.php)). The presence of any impurity that is listed as toxicologically significant is a matter that the APVMA considers to be a relevant particular to the approval of an active constituent.

As stated in the *Agricultural Manual of Requirements and Guidelines* (AgMORAG) ([www.apvma.gov.au/products/constituents/standards/actives\\_definition.php](http://www.apvma.gov.au/products/constituents/standards/actives_definition.php)), an active constituent approval is not supportable unless any known impurities of toxicological significance have been adequately evaluated. An impurity that is present at levels above 1 g/kg should be declared and evaluated, and toxicologically significant impurities in the active constituent should be declared when present, regardless of the level present.

The APVMA considers that the active constituent quintozone may be an undue hazard to the safety of people exposed to it during its handling and may have an effect that is harmful to human beings. A full assessment of the dioxin impurities has not been conducted in accordance with section 14 of the Agvet Code Act. On this basis the APVMA has concluded that it cannot allow the active constituent to be supplied and used in chemical products when it contains undeclared dioxins. Consequently, the APVMA has suspended the approvals of quintozone active constituents.

The Agvet Code provides that if the APVMA suspends the only approval, or all the approvals, of an active constituent for an existing chemical product, it must also suspend any registration of that product. In addition, if the APVMA suspends the registration of a chemical product, it may also suspend any approval relating to a label for containers for the product.

### **IMPACT ON PRODUCT REGISTRANTS**

Suspension action is based on the concern that undeclared dioxins may be present in quintozone active constituents and formulated products. The APVMA considers that it may be possible to allow some use of existing stocks of quintozone products during the period of suspension. Continued uses will only be permitted on the basis of test results for total dioxins in each batch of product proposed for use, and following evaluation by the Office of Chemical Safety, to ensure that any continued use does not pose a risk to users.

### **INSTRUCTIONS FOR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS**

Unless authorised by the APVMA, the following instructions apply for persons having possession or custody of stocks, and are considering using or otherwise dealing with suspended active constituents and products during the period of suspension.

**INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS**

**Possession and custody**

Possession and custody of existing stocks of quintozone active constituent and/or products is permitted.

**Supply**

No supply of the active constituent quintozone and/or any product that contains it as an active constituent is permitted.

**Use**

No use of suspended product containing quintozone is permitted.

Any person who possesses or has custody of, or otherwise deals with the active constituents or products listed in Tables 1 and 2 (above) in accordance with the instructions in this notice is taken to have been issued with a permit to possess, have custody of, or deal with the active constituents or products during the period of suspension or until further notice.

**WARNING**

A person must not possess with the intent to supply, or deal with any materials containing quintozone during this period, except in accordance with the instructions contained in this notice. A failure to comply with these instructions will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply, use or deal with the active constituent after 9 April 2010 unless authorised to do so by the APVMA. Similarly, it is an offence for any person to possess with the intent to supply, use or deal with quintozone products after 12 April 2010, unless authorised to do so by the APVMA.

## Cancellation of Active Constituent Approval at the Request of the Approval Holder

In accordance with Section 42 of the Agvet Code, if an interested or approved person in relation to an approval or registration has given to the APVMA a written notice requesting the APVMA to cancel the below approval or registration, the APVMA must give written notice of its decision on the request to the person(s) who made the request.

This Gazette notice satisfies the requirement in section 45A (1) of the Agvet Code, that the APVMA must also give notice to any other person to whom, in its opinion such a notice should be given.

At the request of the approval holder, the APVMA has cancelled the approval of the following active constituent:

Active No.	Active Name	Approval Holder	Date of Effect
53827	METHAM-SODIUM MANUFACTURING CONCENTRATE	NUFARM AUSTRALIA LIMITED	2 April 2013

The following instructions set out how a person can deal with the cancelled active.

### SUPPLY

A person may supply or cause to be supplied active constituent manufactured prior to 2 April 2013 until 2 April 2015.

After 2 April 2015 it will be an offence against the Agvet Codes to have possession or custody of the active constituent with the intention to supply the active constituent.

### USE

Any person who possesses, has custody of, uses, or otherwise deals with the listed active in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the active after the approval has been cancelled until 2 April 2015.

The supply and use of the active constituent must be in accordance with the conditions of approval, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the active constituent listed in the table in a manner that contravenes the above instructions.

## Cancellation of Label Approval at the Request of the Registrant

In accordance with Section 42 of the Agvet Code, if an interested or approved person in relation to an approval or registration has given to the APVMA a written notice requesting the APVMA to cancel the below approval or registration, the APVMA must give written notice of its decision on the request to the person(s) who made the request.

This Gazette notice satisfies the requirement in section 45A (1) of the Agvet Code, that the APVMA must also give notice to any other person to whom, in its opinion such a notice should be given.

At the request of the registrant, following the recent approval of a new label for this product, the APVMA has cancelled the previous label approvals of the following product:

Product No.	Product Name	Registrant	Cancelled Label Approval Number	Date of Effect
67559	FMC GLYDER 450 HERBICIDE	FMC AUSTRALASIA PTY LTD	67559/56353	27 March 2013

The following instructions set out how a person can deal with the cancelled label approval.

### SUPPLY

A person may supply or cause to be supplied products bearing a cancelled label manufactured prior to 27 March 2013 at wholesale and retail level, until 27 March 2015.

After 27 March 2015 it will be an offence against the Agvet Codes to have possession or custody of the products bearing the cancelled label with the intention to supply.

### USE

A person may continue to use the product according to its cancelled label instructions until 27 March 2015.

Any person who possesses, has custody of, uses, or otherwise deals with the product bearing a cancelled label in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the product after the labels have been cancelled, until 27 March 2015.

The supply and use of the product bearing a cancelled label must be in accordance with the label instructions, including any conditions relating to the shelf life or expiry date. It is an offence to possess, have custody of, use, or deal with the product listed in the table in a manner that contravenes the above instructions.

## Application Summaries

The APVMA publishes complete application summaries on the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
