The APVMA commenced a review in relation to the impact of 2,4-D high volatile esters (HVE) on the environment (including impacts on waterways, non-target animals and plants) in 2003. Following the completion of that aspect of the review, the APVMA formed the view that, on the presently available information, and having regard to the matters referred to in s.14(4) and s.14(5) of the Agvet Codes, the continued use of, or any other dealing with, the active constituents in Table 1 and the products in Table 2, in accordance with their instructions for use of for such dealings, may be likely to have an unintended effect that is harmful to animals, plants or things or to the environment, for the purposes of s.41(1)(c) of the Agvet Codes. The cancellation action detailed in this notice was undertaken for that reason.
