The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website, www.apvma.gov.au/publications/gazette/.

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

OTHER NOTICES

Continued Suspension of Certain Products Containing Dichlorvos and Associated Label Approvals

The APVMA has continued the suspension of the registrations and label approvals for agricultural chemical products containing dichlorvos identified in the table below. The decisions to extend the suspensions of the registrations and label approvals were made under subsections 41(1) and 41(3) of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code).

The suspension of product registrations and label approvals are now in effect until 2 March 2015.

Active constituent approvals are not affected by the APVMA's decision to continue this suspension.

REASONS FOR CONTINUING THE SUSPENSION

The APVMA suspended all products containing dichlorvos and their associated labels on 1 March 2013. The concerns that formed the basis of this original suspension of label approvals and product registrations have not altered for the products listed in Table 1. Therefore continued suspension is necessary to ensure that the use of products containing dichlorvos does not have an effect that is harmful to human health.

INSTRUCTIONS

Subsections 45A(5) and 55(3) of the Agvet Code cease to apply in respect of the products identified in Table 1 and the label approvals identified in Column 4 of Table 2 above. During the period of suspension, a person may not possess, have custody of, use or deal with any of the suspended products or products bearing suspended labels other than in accordance with:

- the instructions set out at the end of this Notice, or
- a permit issued by the APVMA.

A new permit has been issued under section 114 of the Agvet Code (PER 14075). The instructions for use have been reproduced at the end of this Notice.

WARNING

The registration and label approvals of the products listed above are not in force during the period of suspension. From 1 March 2013 a person may only possess, have custody of, use or otherwise deal with the products identified above in accordance with a permit issued by the APVMA and the instructions set out at the end of this Notice.

The APVMA may cancel this permit and issue a replacement permit at any time during the suspension period. Before using, supplying or otherwise dealing with products containing dichlorvos, suppliers and users need to be satisfied that the instructions set out at the end of this Notice continue to apply, and that their activities are authorised by a permit. Current permits are available at www.apvma.gov.au/permits/search.php

Failure to comply with the instructions set out at the end of this Notice attracts a penalty under section 55(4) of the Agvet Code. The penalty is 300 penalty units (equivalent to \$51,000 for individuals and \$255,000 for corporations).

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH SUSPENDED PRODUCT CONTAINING DICHLORVOS AND PRODUCTS BEARING SUSPENDED LABELS

Possession and custody

A person may possess, have custody of, use or otherwise deal with the suspended dichlorvos products (bearing a suspended label) only in accordance with these instructions or in permit PER 14075, issued by the APVMA.

Supply

All suppliers must at the time of the supply of a product covered by these instructions provide to the person taking responsibility for the supplied product:

- a copy of the relevant permit in full (currently PER 14075) setting out the conditions and instructions for use, and
- supply product with a copy of the instructions contained in the permit securely affixed to each container of product.

Use

PERSONS who wish to use suspended products containing dichlorvos (as listed above) must read, or have read to them, the instructions included in the relevant APVMA permit. Users who have had the instructions read to them must confirm to the reader that they understand the instructions.

READ THESE INSTRUCTIONS before using or otherwise handling the product.

When using or otherwise handling the product, follow the instructions of the label **except as follows**:

The existing (suspended) label may include instructions for use in situations listed below. The use of dichlorvos is no longer approved for these situations and the following restraints apply:

PER14075: INSTRUCTIONS FOR USE FOR ALL PRODUCTS LISTED IN TABLE 1 ABOVE

For products containing 500 g/L Dichlorvos:

THIS PRODUCT IS TOO HAZARDOUS TO BE USED IN THE HOME GARDEN

Situations for Use

EC500 products for control of European wasp nests:

DO NOT apply to exposed areas if rain is expected within 4 hours. DO NOT use in outdoor areas other than for the control of European wasp nests. Prepare emulsion or solution sufficient for immediate use only. DO NOT keep the mixture for more than 12 hours. DO NOT apply under meteorological conditions or from spray equipment that could be expected to cause spray drift onto natural streams, rivers or waterways. Avoid excess spraying causing run-off from treated surfaces into untreated areas. DO NOT allow drainage water from freshly treated areas to contaminate streams, rivers or waterways. Spray mixture into entrance holes of the nest. DO NOT apply to areas other than nest opening.

Safety Directions for control of European wasp nests:

Very dangerous. Poisonous if absorbed by skin contact, inhaled or swallowed. Will damage the eyes. Will irritate the nose and throat and skin. Repeated exposure may cause allergic disorders. Repeated minor exposure may have a cumulative poisoning effect. Avoid contact with eyes and skin. Do not inhale vapour or spray mist. When opening the container and

preparing spray, and using the prepared spray, wear cotton overalls buttoned to neck and wrist (or equivalent clothing), elbow-length chemical resistant gloves and goggles. If clothing becomes contaminated with product or wet with spray remove clothing immediately. If product on skin, immediately wash area with soap and water. If product in eyes, wash it out immediately with water. After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water. After each day's use, wash gloves, goggles and contaminated clothing.

Grain Protection Uses

Product must be supplied in a container that only allows use of drum valve/dry break coupler closed delivery (mixing/loading) system.

When using product for grain protection no individual worker involved in mixing and loading of dichlorvos EC formulations should handle more than 23 kg of dichlorvos per day and no individual worker should be involved in mixing and loading of dichlorvos products for more than 30 days per year.

When opening the container and preparing the spray, workers must wear chemical resistant clothing buttoned to the neck and wrist, elbow length PVC gloves and a full facepiece respirator with combined dust and gas cartridge.

Re-entry Instructions

DO NOT allow entry into a treated area for ten hours after treatment. If re-entry into a treated area is required prior to ten hours following treatment, workers must wear chemical resistant clothes, gloves and a half facepiece respirator.

Safety Directions

Very dangerous. Poisonous if absorbed by skin contact, inhaled or swallowed. Will irritate the eyes and skin. Repeated exposure may cause allergic disorders. Repeated minor exposure may have a cumulative poisoning effect. Avoid contact with eyes and skin. Do not inhale vapour or spray mist.

When opening the container and preparing the spray, workers must wear chemical resistant clothing buttoned to the neck and wrist, elbow length chemical resistant gloves and a full facepiece respirator with combined dust and gas cartridge.

When using the prepared spray, wear chemical resistant full body clothing, elbow-length chemical resistant gloves, goggles and a half facepiece respirator.

If clothing becomes contaminated with product or wet with spray, remove clothing immediately. If product is on skin, immediately wash area with soap and water. If product in eyes, wash it out immediately with water.

After use and before eating, drinking or smoking, wash hands, arms and face thoroughly with soap and water.

After each day's use, wash gloves, goggles and respirator and if rubber wash with detergent and warm water, and contaminated clothing.

First Aid Instructions

If swallowed, splashed on skin or in eyes, or inhaled, contact a Poisons Information Centre (Phone Australia 131 126) or a doctor at once. Remove any contaminated clothing and wash skin thoroughly. If swallowed, activated charcoal may be advised. Give atropine if instructed.

PROTECTION OF WILDLIFE, FISH, CRUSTACEANS AND ENVIRONMENT

Dangerous to fish. DO NOT contaminate streams, rivers or waterways with the chemical or used containers or rinsate. Spilt grain potentially containing dichlorvos residues should be cleaned up promptly.

WITHHOLDING PERIODS

FOR GRAIN TREATED AT 6 parts per million: DO NOT use treated grain for human consumption (or stockfeed) within 7 days of treatment. DO NOT outturn treated grain within 7 days of treatment.

FOR GRAIN TREATED AT 12 parts per million: DO NOT use treated grain for human consumption (or stockfeed) within 28 days of treatment. DO NOT outturn treated grain within 28 days.

Condition of Supply: The registrant is required to generate worker exposure data to establish a re-entry interval for the product. Worker exposure studies are required to be conducted to determine the levels of exposure resulting from use of the product. The aim of the study is to measure dermal and inhalational exposures from normal use of the product in accordance with permitted instructions. Additional data may be generated to support any alternative instructions for use that the registrant may propose. All potential exposure activities, including connection of product containers, application and clean-up should be monitored.

For products containing 1140 g/L dichlorvos:

Cancellation of Label Approval at the Request of the Registrant

In accordance with Section 42 of the Agvet Code, if an interested or approved person in relation to an approval or registration has given to the APVMA a written notice requesting the APVMA to cancel the below approval or registration, the APVMA must give written notice of its decision on the request to the person(s) who made the request.

This Gazette notice satisfies the requirement in section 45A (1) of the Agvet Code, that the APVMA must also give notice to any other person to whom, in its opinion such a notice should be given.

At the request of the registrant, following the recent approval of a new label for this product, the APVMA has cancelled the previous label approvals of the following product:

| Product No. | Product Name | Registrant | Cancelled Label Approval Number | Date of Effect |
|-------------|---|----------------------------------|---------------------------------|-----------------|
| 67839 | CROP CARE STABILAN 750 SL PLANT GROWTH REGULANT | CROP CARE AUSTRALASIA PTY LTD | 67839/59505 | 31 January 2014 |

The following instructions set out how a person can deal with any product bearing a cancelled label approval.

SUPPLY

A person may supply or cause to be supplied product bearing a cancelled label manufactured prior to 31 January 2014 at wholesale and retail level, until 31 January 2016.

After 31 January 2016 it will be an offence against the Agvet Codes to have possession or custody of a product bearing a cancelled label with the intention to supply.

USE

A person may continue to use the product according to its cancelled label instructions until 31 January 2016.

Any person who possesses, has custody of, uses, or otherwise deals with the product bearing a cancelled label in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the product after the labels have been cancelled until 31 January 2016.

The supply and use of the product bearing a cancelled label must be in accordance with the label instructions, including any conditions relating to the shelf life or expiry date. It is an offence to possess, have custody of, use, or deal with the product listed in the table in a manner that contravenes the above instructions.

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* with affect from 8 February 2014.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2014 (No. 2)*.

The amendments will be incorporated into the compilation of the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*.

The *MRL Standard* is accessible via the ComLaw website www.comlaw.gov.au or the links above.

Proposal to Amend Standard 1.4.2 of the Australia New Zealand Food Standards Code

In the previous notice, the APVMA gazetted particular amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*.

Under Section 82 of the *Food Standards Australia New Zealand Act 1991* the APVMA is proposing to incorporate these variations (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2014 (No. 2)*) to MRLs into Standard 1.4.2 – Maximum Residue Limits of the Australia New Zealand Food Standards Code.

MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Standard 1.4.2 in the APVMA *Gazette*. The variations will take effect as from the date of that subsequent notice.

DRAFT VARIATIONS TO THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

Note: The following amendments are in a format that accords with the proposed amending Legislative Instrument which, in turn, has to be consistent with the existing format of Standard 1.4.2 (Maximum Residue Limits) of the *Australia New Zealand Food Standards Code*.

PROPOSED AMENDMENT (AGRICULTURAL AND VETERINARY CHEMICALS CODE INSTRUMENT NO. 4 (MRL STANDARD) AMENDMENT INSTRUMENT 2014 (NO. 2))

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

Standard 1.4.2 of the *Australia New Zealand Food Standards Code* is varied by –

1. inserting in alphabetical order in Schedule 1, the foods and associated MRLs for each of the following chemicals –

| Bifenthrin Bifenthrin | |
|--|------|
| Olives | T0.5 |
| Boscalid <i>Commodities of plant origin:</i> Boscalid <i>Commodities of animal origin:</i> Sum of boscalid, 2-chloro-N-(4'-chloro-5-hydroxybiphenyl-2-yl) nicotinamide and the glucuronide conjugate of 2-chloro-N-(4'-chloro-5-hydroxybiphenyl-2-yl) nicotinamide, expressed as boscalid equivalents | |
| Cloudberry | T10 |
| Dewberries (including loganberry and youngberry) [except boysenberry] | T10 |
| Silvanberries | T10 |
| Pyraclostrobin <i>Commodities of plant origin:</i> Pyraclostrobin <i>Commodities of animal origin:</i> Sum of pyraclostrobin and metabolites hydrolysed to 1-(4-chloro-phenyl)-1H-pyrazol-3-ol, expressed as pyraclostrobin | |
| Cloudberry | T3 |
| Dewberries (including loganberry and youngberry) [except boysenberry] | T3 |
| Silvanberries | T3 |

2. omitting from Schedule 1, under the entries for the following chemicals, the maximum residue limit for the food, substituting –

| | |
|--|--------|
| Azoxystrobin Azoxystrobin | |

INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Standard 1.4.2 – Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

All personal and *confidential commercial information* (CCI)¹ material contained in submissions to the APVMA will be treated confidentially.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Standard 1.4.2' and quote the correct amendment number.

DEADLINE FOR PUBLIC SUBMISSIONS: 6 pm (Canberra time) 11 March 2014

SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
