The APVMA has cancelled the following label approval of a product containing dichlorvos:

Table 1: Cancelled label approval of a product containing dichlorvos

Product No.	Product Name	Registrant	Cancelled Label Approval No.
32939	Insectigas-D D.D.V.P. Insecticide	BOC Limited	32939/0111

The label approval was cancelled on 19 February 2014.

REASONS

At the completion of the review of dichlorvos (1 March 2011) the APVMA issued relevant label particulars for the continued use of the product Insectigas-D D.D.V.P. Insecticide with the label approval number 32939/0111.

The APVMA suspended the product registration and all label approvals in March 2013 due to product being supplied with the cancelled labels. Permit PER14076 was issued with instructions for use of the suspended product with relevant label particulars issued at the finalisation of the review in 2011.

The APVMA revoked the suspension of the product Insectigas-D D.D.V.P. Insecticide in September 2013 to approve a new label. This new label approval 32939/59200 incorporates the recommendations as contained in the *Dichlorvos final review report and regulatory decision*.

In accordance with Section 40(2) of the *Agricultural and Veterinary Chemicals Code (Agvet Code) Act (1994)*, as no label was provided within a reasonable timeframe for 32939/0111, the label approval has been cancelled.

The APVMA has issued the following instructions for using or dealing with product containing the cancelled label 32939/0111.

3. Use

A person may continue to use the product according to its cancelled label instructions until 25 February 2016.

Any person who possesses, has custody of, uses or otherwise deals with the product bearing a cancelled label in accordance with the instructions in this notice is taken to have been issued with a permit to so possess, have custody of, use or deal with the products containing the label until two years after the day of the cancellation (25 February 2016).

Variations to Standard 1.4.2 of the Australia New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Standard 1.4.2 — Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2013 (No. 10)*) gazetted on 3 December 2013 (No. APVMA 24).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Standard 1.4.2. A copy of the Amendment Instrument (No. APVMA 2, 2014) accompanies this notice. For a complete and up-to-date version of Standard 1.4.2, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at www.comlaw.gov.au.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.
