Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

Email: communications@apvma.gov.au

Website: www.apvma.gov.au.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website, www.apvma.gov.au/publications/gazette/.

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*: Telephone: +61 2 6210 4870

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

NOTICE OF REGISTRATIONS

Agricultural Chemical Products

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the registration in respect of the following products, with effect from the dates shown.

1. AGRICULTURAL PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

Product Name:	Select Insect Bomb Super Strength
Active Constituent/s:	1.54 g/kg fenoxycarb, 10 g/kg permethrin
Applicant Name:	Woolworths Ltd
Applicant ACN:	000 014 675
Summary of Use:	For killing of insect infestations and prevention of reinfestation
Date of Registration:	3 April 2014
Label Approval No:	68855/59222
Product Name:	Klerat XT Pro Rodenticide Wax Blocks
Active Constituent/s:	0.05 g/kg brodifacoum
Applicant Name:	Syngenta Australia Pty Ltd
Applicant ACN:	002 933 717
Summary of Use:	For the control of rats and mice in various situations
Date of Registration:	3 April 2014
Label Approval No:	69867/61920
Product Name:	Gold Up Glyphosate 450 Herbicide
Active Constituent/s:	450 g/L glyphosate present as the isopropylamine salt
Applicant Name:	Joy Harvest Holding Pty Ltd
Applicant ACN:	130 503 829
Summary of Use:	For the non-selective control of most perennial and annual weeds
Date of Registration:	3 April 2014
Label Approval No:	69848/61873
Product Name:	Accensi Phosspot 400 Systemic Fungicide
Active Constituent/s:	400 g/L phosphorous (phosphonic) acid present as mono (and) di potassium phosphite
Applicant Name:	Accensi Pty Ltd
Applicant ACN:	079 875 184
Summary of Use:	For use against <i>Phytophthora</i> diseases and downy mildew in various situations
Date of Registration:	5 April 2014
Label Approval No:	69799/61757
Product Name:	Imtrade Octopus 800 WG Fungicide
Active Constituent/s:	800 g/kg epoxiconazole
Applicant Name:	Imtrade Australia Pty Ltd
Applicant ACN:	090 151 134
Summary of Use:	For the control of leaf rust, stripe rust and <i>Septoria nodorum</i> blotch of wheat and leaf rust of barley
Date of Registration:	8 April 2014
Label Approval No:	68938/59418

Product Name:	Termitreat T-100 Wood Preserving Agent
Active Constituent/s:	106 g/L permethrin 25:75 (100 g/kg permethrin 25:75)
Applicant Name:	Bell International Pty Ltd
Applicant ACN:	106 212 355
Summary of Use:	For use as a wood preserving agent
Date of Registration:	8 April 2014
Label Approval No:	68403/58291
Product Name:	Rainbow 2,4-D Amine 800 SG Herbicide
Active Constituent/s:	800 g/kg 2,4-D present as the dimethylamine salt
Applicant Name:	Shandong Rainbow International Co., Ltd
Applicant ACN:	N/A
Summary of Use:	For the control of broadleaf weeds in fallow before direct drilling or sowing of cereals and pastures; and in cereal crops, pastures, sugarcane, peanuts and non-agricultural areas
Date of Registration:	8 April 2014
Label Approval No:	68145/57620
Product Name:	ZODIAC Spa Sanifresh Bactericide and Clarifier
Active Constituent/s:	190 g/L hydrogen peroxide
Applicant Name:	Zodiac Group Australia Pty Ltd
Applicant ACN:	002 641 965
Summary of Use:	For controlling algae and bacteria in spas
Date of Registration:	9 April 2014
Label Approval No:	69706/61474
Product Name:	Apparent Alonzo 750 WG Herbicide
Active Constituent/s:	750 g/kg sulfosulfuron
Applicant Name:	Apparent Pty Ltd
Applicant ACN:	143 724 136
Summary of Use:	For the selective control of certain weeds in wheat and triticale
Date of Registration:	10 April 2014
Label Approval No:	69333/60515
Product Name:	FMC Benlax 600 Herbicide
Active Constituent/s:	600 g/kg bensulfuron present as the methyl ester
Applicant Name:	FMC Australasia Pty Ltd
Applicant ACN:	095 326 891
Summary of Use:	For the control of Arrowhead, Dirty Dora and Star Fruit in aerially sown rice
Date of Registration:	10 April 2014
Label Approval No:	69441/61511
Product Name:	EuroChem EZY-TIP Fungicide
Active Constituent/s:	250 g/L propiconazole
Applicant Name:	TGAC Australia Pty Ltd
Applicant ACN:	134 570 700
Summary of Use:	For the control of the adhesion and the penetration of mushroom mycelium in timber trays
Date of Registration:	11 April 2014
Label Approval No:	69604/61215

Product Name:	OzCrop Triclopyr/Picloram Herbicide
Active Constituent/s:	100 g/L picloram present as hexyloxypropylamine salt, 300 g/L triclopyr present as butoxyethyl ester
Applicant Name:	Ozcrop Pty Ltd
Applicant ACN:	160 656 431
Summary of Use:	For control of a range of environmental and noxious woody and herbaceous weeds
Date of Registration:	14 April 2014
Label Approval No:	69829/61853

2. VARIATIONS

Product Name:	Cheminova Atrazine 900 WG Herbicide
Applicant Name:	Ospray Pty Ltd
Applicant ACN:	110 199 169
Summary of Variation:	To change the product name from 'OSPRAY ATRAZINE 900WG HERBICIDE' to 'CHEMINOVA ATRAZINE 900 WG HERBICIDE', extend use to potatoes and grass pasture
Date of Variation:	1 April 2014
Label Approval No:	58450/61749

Product Name:	Cheminova Propiconazole 250EC Fungicide
Applicant Name:	Ospray Pty Ltd
Applicant ACN:	110 199 169
Summary of Variation:	To change the product name from 'OSPRAY PROPICONAZOLE 250EC FUNGICIDE' to 'CHEMINOVA PROPICONAZOLE 250EC FUNGICIDE', approve a pack size range of 5 L–1000 L and update the Relevant Label Particulars
Date of Variation:	1 April 2014
Label Approval No:	59987/61952

Product Name:	Killyptus 2-In-1 Surface & Insect Spray
Applicant Name:	Shane Donald Lamont
Applicant ACN:	N/A
Summary of Variation:	To change the product name from 'KILLYPTUS EUCALYPTUS 2 IN ONE SURFACE AND INSECT SPRAY READY TO USE' to 'KILLYPTUS 2-IN-1 SURFACE & INSECT SPRAY'
Date of Variation:	2 April 2014
Label Approval No:	46290/61691

Product Name:	Rainbow Diqu-Para 250 Herbicide
Applicant Name:	Shandong Rainbow International Co., Ltd
Applicant ACN:	N/A
Summary of Variation:	To update the label in line with the APVMA's review of diuron and remove use in lucerne
Date of Variation:	4 April 2014
Label Approval No:	65295/61985

Product Name:	Termifilm Termite Exclusion System
Applicant Name:	Raydiate Pty Ltd
Applicant ACN:	113 013 693
Summary of Variation:	To increase thickness of plastic film from 0.15 mm to 0.2 mm, 0.3 mm and 0.5 mm
Date of Variation:	8 April 2014
Label Approval No:	67062/60858

Product Name:	Cheminova Chlorothalonil 720 Fungicide
Applicant Name:	Ospray Pty Ltd
Applicant ACN:	110 199 169
Summary of Variation:	To change the product name from 'OSPRAY CHLOROTHALONIL 720 FUNGICIDE' to 'CHEMINOVA CHLOROTHALONIL 720 FUNGICIDE'
Date of Variation:	9 April 2014
Label Approval No:	60939/61843
Product Name:	Melpat Mildex WG Fungicide
Applicant Name:	Melpat International Pty Ltd
Applicant ACN:	066 067 507
Summary of Variation:	To amend instructions for treatment of grapevines for the control of downy and powdery mildew
Date of Variation:	9 April 2014
Label Approval No:	64640/53041
Product Name:	Intervix Herbicide For Clearfield Crops
Applicant Name:	BASF Australia Ltd
Applicant ACN:	008 437 867
Summary of Variation:	To update the label to remove tank mixes with Aramo, update critical comments, signal heading and general instructions
Date of Variation:	9 April 2014
Label Approval No:	59735/62336
Product Name:	Scorpio Ornamental Fungicide
Applicant Name:	Bayer Cropscience Pty Ltd
Applicant ACN:	000 226 022
Summary of Variation:	To extend the label claims to include new diseases on existing and new ornamental species
Date of Variation:	11 April 2014
Label Approval No:	66328/61247
Product Name:	Amistar 250 SC Fungicide
Applicant Name:	Syngenta Australia Pty Ltd
Applicant ACN:	002 933 717
Summary of Variation:	To extend use to almonds, citrus, pistachio, garlic, shallots, spring onions, beans, brassica leafy vegetables, brassica vegetables, horseradish, leeks, lettuce, ornamentals, nursery stock (non-food), pyrethrum, radish, snow peas, sugar snap peas and garden peas
Date of Variation:	14 April 2014
Label Approval No:	58340/52896
Product Name:	Nufarm Grunt 750WDG Herbicide
Applicant Name:	Nufarm Australia Limited
Applicant ACN:	004 377 780
Summary of Variation:	To vary the forestry uses to include control of <i>Pinus pinaster</i> in South Australia (SA), include additional weeds (sow thistle and Yorkshire fog grass) on the label, reduce the pre plant and post plant use rates in SA, and make other label updates
Date of Variation:	14 April 2014
Label Approval No:	62549/56660

Veterinary Chemical Products

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the registration in respect of the following products, with effect from the dates shown.

1. VETERINARY PRODUCTS BASED ON EXISTING ACTIVE CONSTITUENTS

Product Name:	Reversamed Injection for Dogs and Cats
Active Constituent/s:	5 mg/mL atipamezole hydrochloride
Applicant Name:	Ceva Animal Health Pty Ltd
Applicant ACN:	002 692 426
Summary of Use:	To reverse the effects of metemidone hydrochloride in dogs and cats
Date of Registration:	3 April 2014
Label Approval No:	63507/45823
Product Name:	advantage Kiltix Collar for Dogs Ticks
Active Constituent/s:	100 g/kg propoxur, 22.5 g/kg flumethrin
Applicant Name:	Bayer Australia Ltd (Animal Health)
Applicant ACN:	000 138 714
Summary of Use:	For the control of paralysis tick, brown dog/bush tick and fleas in dogs
Date of Registration:	4 April 2014
Label Approval No:	69031/59677
Product Name:	Mycofix Secure
Active Constituent/s:	1000 g/kg bentonite
Applicant Name:	Biomin (Australia) Pty Ltd
Applicant ACN:	102 287 570
Summary of Use:	For use in the management of aflatoxins and fumonisins in feed for pigs, poultry, sheep and cattle
Date of Registration:	7 April 2014
Label Approval No:	67755/56800
Product Name:	Blue Cross Magnesium Sulphate Injection
Active Constituent/s:	250 g/L magnesium sulphate
Applicant Name:	Sykes Vet (International) Pty Ltd
Applicant ACN:	085 158 434
Summary of Use:	For use as an aid in the treatment of grass tetany and magnesium deficiencies in cattle and sheep
Date of Registration:	8 April 2014
Label Approval No:	69749/61553
Product Name:	Blue Cross Dextrose Injection
Active Constituent/s:	400 g/L dextrose.
Applicant Name:	Sykes Vet (International) Pty Ltd
Applicant ACN:	085 158 434
Summary of Use:	For the treatment of acetoanaemia (ketosis) in cattle, sheep and goats
Date of Registration:	8 April 2014
Label Approval No:	69748/61551

Product Name:	Blue Cross 4 In 1 Balanced Mineral Injection
Active Constituent/s:	27.5 g/L calcium (as calcium gluconate) equivalent to 330 g/L calcium borogluconate, 4.7 g/L magnesium (as magnesium hypophosphite), 12.2 g/L phosphorus (as hypophosphite)
Applicant Name:	Sykes Vet (International) Pty Ltd
Applicant ACN:	085 158 434
Summary of Use:	For use in the treatment of milk fever, grass tetany and associated metabolic conditions in cattle and sheep
Date of Registration:	9 April 2014
Label Approval No:	69771/61693

Product Name:	Blue Cross CBG Injection
Active Constituent/s:	33.3 g/L calcium (as calcium gluconate) equivalent to 400 g/L calcium borogluconate
Applicant Name:	Sykes Vet (International) Pty Ltd
Applicant ACN:	085 158 434
Summary of Use:	For use in the treatment of milk fever (hypocalcaemia) in cattle and sheep
Date of Registration:	9 April 2014
Label Approval No:	69747/61550

Product Name:	Abatak Plus Selenium Broad Spectrum Antiparasitic Solution For Sheep And Lambs
Active Constituent/s:	0.8 g/L abamectin, 0.4 g/L selenium (as sodium selenate)
Applicant Name:	Abbey Laboratories Pty Ltd
Applicant ACN:	156 000 430
Summary of Use:	For the treatment and control of abamectin sensitive strains of internal parasites in sheep (including benzimidazole, levamisole and morantel resistant strains), nasal bot and itch mite of sheep and as an aid in the control of selenium deficiency in sheep
Date of Registration:	10 April 2014
Label Approval No:	69739/61538

2. VARIATIONS

Product Name:	EAZI-BREED CIDR Cattle Device
Applicant Name:	Zoetis Australia Pty Ltd
Applicant ACN:	156 476 425
Summary of Variation:	To vary the directions of use to include additional reproductive programs
Date of Variation:	11 April 2014
Label Approval No:	49840/60088

OTHER NOTICES

Cancellation of Selected 2,4-D Label Approvals

The APVMA, under s 41(3) of the Agvet Codes, has cancelled the label approvals listed in Column D of Table 1 following reconsideration under s34A of the Agvet Codes on the basis that the label did not contain adequate instructions in relation to the matters outlined in s.14(3)(g) of the Agvet Codes. The cancellation took effect 11 April 2014.

Background

In 2008, the National Drugs and Poisons Schedule Committee (resolution 2008/52-6) included 2,4-D in Schedule 6 of the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP), with a cut-off to Schedule 5 only when present in formulations at < 20%. While this scheduling decision came into effect on 1 January 2009, the current labels on the products at Attachment 1 do not contain the correct signal heading to reflect the appropriate poisons schedule. As background, poisons scheduling is a national classification system that controls how medicines and chemicals are made available to the public. Medicines and chemicals are classified into Schedules according to the level of regulatory control over the availability of the medicine or chemical, required to protect public health and safety.

The APVMA identified that the poison schedule displayed on the labels of selected 2,4-D products, was incorrect, reading CAUTION reflecting Schedule 5 rather than POISON as per Schedule 6 signal heading requirements.

Consideration

The APVMA determined that the labels did not contain adequate instructions. The APVMA, effective 14 February 2014 varied the relevant label particulars of the most recent label approval under the provision of s34A to correct this error assigning a new label approval number [product number/0214].

Following this variation the APVMA determined it appropriate to cancel the approvals of any other ('old') labels on the basis that they do not contain adequate instructions. The label approvals listed in Table 1 were cancelled 11 April 2014. A 2 – year period is given for the continued supply and use of the product bearing the cancelled labels, until 11 April 2016.

It should be noted that the list of products in Table 1 is not the complete list of products affected by the variation (over 100). The label cancellations affect only those products where multiple labels have been approved. These product registrations and approved labels continue to be subject to the APVMA's review of 2,4-D.

The label, as varied can be found by searching for the product on PUBCRIS portal.apvma.gov.au/pubcris.

The following instructions set out how a person can deal with any product bearing a cancelled label approval.

SUPPLY

A person may supply or cause to be supplied product bearing a cancelled label manufactured prior to 11 April 2014 at wholesale and retail level, until 11 April 2016.

After 11 April 2016 it will be an offence against the Agvet Codes to have possession or custody of a product bearing a cancelled label with the intention to supply.

USE

A person may continue to use the product according to its cancelled label instructions until 11 April 2016.

Any person who possesses, has custody of, uses, or otherwise deals with the product bearing a cancelled label in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the product after the labels have been cancelled until 11 April 2016.

The use of the product bearing a cancelled label must be in accordance with the label instructions, including any conditions relating to the shelf life or expiry date. It is an offence to possess, have custody of, use, or deal with the product listed in the table in a manner that contravenes the above instructions.

Suspension of Certain 2,4-D Active Constituent Approvals

This notice is published in accordance with s.55 of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Codes).

The Australian Pesticides and Veterinary Medicines Authority's (APVMA) has, effective 10 April 2014, suspended the approvals of the active constituents listed in Table 1 below under s.37(1)(b) of the Agvet Codes.

The suspension of the affected 2,4-D active constituent are now in place until 10 October 2014 or until the APVMA revokes the suspensions (whichever occurs first).

Table 1: Active constituent approvals to be suspended

Number	Active Constituent Name	Approval Holder
60840	2,4-D-2-ETHYLHEXYL ESTER	AGROGILL CHEMICALS PTY LTD
52405	2,4-D	HALLEY INTERNATIONAL ENTERPRISE (AUSTRALIA) PTY LTD
59392	2,4-D	IMTRADE AUSTRALIA PTY LTD
60565	2,4-D ETHYL HEXYL ESTER	RUNGE AGRICHEMS PTY LTD

REASONS FOR THE SUSPENSION

In September 2011, the APVMA wrote to selected active constituent approval holders informing them that the APVMA was in the preliminary stages of considering whether to suspend selected active constituent approvals on the basis of concerns over the level of dioxin impurities within the active constituent. Very few approval holders responded.

The APVMA subsequently conducted independent testing of certain 2,4-D products for the presence of dioxins. Based on this analysis the APVMA was satisfied that it was appropriate to look more closely at the question of dioxin impurities in the course of the reconsideration of the approvals of the active constituent 2, 4-D and products containing that active constituent.

In particular, in order for the APVMA to ensure that all 2,4-D products in the market do not contain undeclared or unacceptable levels of dioxins which may present unacceptable risks to human health or worker safety, the APVMA determined that additional information was necessary for the purpose of completing the human health and occupational health and safety assessments for 2,4-D.

On 23 September 2013, the APVMA issued a notice in accordance with s.33 of the Agvet Codes, requiring all 2,4-D active constituent approval holders to conduct, or cause to be conducted, trials or laboratory experiments in relation to the active constituent and the potential levels of dioxins contained in that active constituent. The notice required these results to be provided to the APVMA by 29 November 2013.

The APVMA did not receive the required data for those active constituents listed in Table 1.

On 10 January 2014, the APVMA notified the relevant approval holders of the proposal to suspend the approvals listed in Table 1, in accordance with s.37(1)(b) of the Agvet Codes, for failure to provide the necessary information.

Approval holders were given until 7 February to respond. The approval holders listed in Table 1 did not respond to this Notice by providing the information as required.

Consequently, the APVMA has suspended the approval of the active constituents listed in Table 1, in accordance with s.37(1)(b) of the Agvet Code, for failing to undertake the necessary testing required by the APVMA under s.33.

**INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OR, USING OR
OTHERWISE DEALING WITH ACTIVE CONSTITUENTS**

Under s.55(2)(e) of the Agvet Codes, the APVMA has determined the following instructions for the purposes of this notice:

Possession and custody

A person may possess or have custody of the active constituents listed in Table 1 of this notice.

Supply

A person must not supply, use or otherwise deal with, the active constituents listed in Table 1 during the period of suspension.

WARNING

Under s.55(4) of the Agvet Codes, from the date of this notice it is an offence to possess or have custody with the intent to supply or otherwise deal with any of the active constituents listed in Table 1 of this notice otherwise than in accordance with the instructions contained in this notice. After 10 April 2014, the supply, use or otherwise dealing of the active constituents listed in Table 1 of this notice will constitute an offence under eligible laws of this jurisdiction.

The registration and label approvals of the products listed above are not in force during the period of suspension. From 10 April 2014 a person may only possess, have custody of, use or otherwise deal with the active constituents identified above in accordance with the instructions set out in this Notice.

Failure to comply with the instructions set out at the end of this Notice attracts a penalty under section 55(4) of the Agvet Code. The maximum penalty that might apply for a breach of subsection 55(4) is \$51,000 for an individual and \$255,000 for a company).

DECLARATIONS FOR THE PURPOSES OF PARAGRAPHS 45A(5)(C) AND 55(3)(C) OF THE AGVET CODES

For the purposes of ss.45A(5)(c) and 55(3)(c) of the Agvet Codes, respectively, ss.45A(5) and 55(3) cease to apply in respect of the active constituents listed in Table 1 of this notice.

The effect of these declarations is that, from the date of publication of this notice, the active constituents listed in Table 1 of this notice can only be supplied or used in accordance with the instructions set out in this notice.

APVMA CONTACT

For any enquiries or further information about this matter, please contact:

Email: chemicalreview@apvma.gov.au

Cancellation of Active Constituent Approval(s) at the Request of the Approval Holder

In accordance with Section 42 of the Agvet Code, if an interested or approved person in relation to an approval or registration has given to the APVMA a written notice requesting the APVMA to cancel that approval or registration then the APVMA must give written notice of its decision on the request to the person(s) who made the request.

This Gazette notice satisfies the requirement in section 45A (1) of the Agvet Code, that the APVMA must also give notice to any other person to whom, in its opinion such a notice should be given.

At the request of the approval holder, the APVMA has cancelled the approval(s) of the following active constituent:

Active No.	Active Name	Approval Holder	Date of Effect
51416	2,4-D	FARMOZ PTY LIMITED	7 March 2014
48691	2,4-D	FARMOZ PTY LIMITED	7 March 2014
61601	2,4-D-2-ETHYLHEXYL ESTER	FARMOZ PTY LIMITED	7 March 2014
47430	2,4-D	ANCOM AUSTRALIA PTY LIMITED	7 March 2014

The following instructions set out how a person can deal with the cancelled active(s).

SUPPLY

A person may supply or cause to be supplied active constituents manufactured prior 7 March 2014 until 7 March 2016.

After 7 March 2016 it will be an offence against the Agvet Codes to have possession or custody of the active constituent(s) with the intention to supply the active constituent(s).

USE

Any person who possesses, has custody of, uses, or otherwise deals with the listed active constituent(s) in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the active constituent(s) after the approval(s) have been cancelled until 7 March 2016.

The supply and use of the active constituents must be in accordance with the conditions of approval, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the active constituent(s) listed in the table in a manner that contravenes the above instructions.

APVMA CONTACT

For any enquiries or further information about this matter, please contact:

Contact Officer
Chemical Review Pesticides Program
Australian Pesticides and Veterinary Medicines Authority
PO Box 6182
KINGSTON ACT 2604

Phone: +61 2 6210 4749
Fax: +61 2 6210 4776
Email: chemicalreview@apvma.gov.au

Cancellation of Label Approval at the Request of the Registrant

In accordance with Section 42 of the Agvet Code, if an interested or approved person in relation to an approval or registration has given to the APVMA a written notice requesting the APVMA to cancel that approval or registration, then the APVMA must give written notice of its decision on the request to the person(s) who made the request.

This Gazette notice satisfies the requirement in section 45A (1) of the Agvet Code, that the APVMA must also give notice to any other person to whom, in its opinion such a notice should be given.

At the request of the registrant, following the recent approval of a new label for this product, the APVMA has cancelled the previous label approvals of the following product:

Product No.	Product Name	Registrant	Cancelled Label Approval Number	Date of Effect
61321	SIPCAM IPRODIONE AQUAFLO FUNGICIDE	SIPCAM PACIFIC AUSTRALIA PTY LTD	61321/1208	7 March 2014

The following instructions set out how a person can deal with any product bearing a cancelled label approval.

SUPPLY

A person may supply or cause to be supplied product bearing a cancelled label manufactured prior to 7 March 2014 at wholesale and retail level, until 7 March 2016.

After 7 March 2016 it will be an offence against the Agvet Codes to have possession or custody of a product bearing a cancelled label with the intention to supply.

USE

A person may continue to use the product according to its cancelled label instructions until 7 March 2016.

Any person who possesses, has custody of, uses, or otherwise deals with the product bearing a cancelled label in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the product after the labels have been cancelled until 7 March 2016.

The supply and use of the product bearing a cancelled label must be in accordance with the label instructions, including any conditions relating to the shelf life or expiry date. It is an offence to possess, have custody of, use, or deal with the product listed in the table in a manner that contravenes the above instructions.

Continued suspension of quintozone active constituent approvals, products containing quintozone and label approvals of products containing quintozone

The APVMA has decided to continue the suspension of the active constituent approvals for quintozone listed in Table 1 and the product registrations and label approvals of products containing quintozone listed in Table 2.

Table 1: Active constituent approvals for quintozone

Approval Number	Approval Holder
53706	Amvac Chemicals Corporation

Table 2: Registered products containing quintozone

Product Number	Product Name	Label Approval Numbers	Registrant
41110	Barmac Turf Renovation Mixture	41110/0203	Barmac Industries Pty Ltd
45883	Uniroyal Chemical Terraclor Super-X E.C. Soil Fungicide	45883/0903	Barmac Industries Pty Ltd
47211	Barmac Chloroturf Dg Fungicide	47211/1102 47211/3427	Barmac Industries Pty Ltd
48308	Barmac Rhysol Dg Turf Fungicide	48308/01 48308/0400	Barmac Industries Pty Ltd
50787	Uniroyal Chemical Cotton Planter Box Protectant	50787/0498 50787/0603	Barmac Industries Pty Ltd
50788	Uniroyal Chemical Peanut Seed Protectant Fungicide	50788/0898 50788/0903	Barmac Industries Pty Ltd
50789	Uniroyal Chemical Terraclor Cotton Seed Protectant	50789/0300 50789/0498	Barmac Industries Pty Ltd
51382	Optimerge Peanut Seed Dressing	51382/0106 51382/1298	Peanut Company Of Australia Limited
53533	Terraclor Soil Fungicide	53533/0702 53533/0201 53533/0403 53533/0703 53533/1100 53533/1206	Barmac Industries Pty Ltd
55743	Terraclor Seed Treatment	55743/0105 55743/1106	Barmac Industries Pty Ltd

The active constituent approval suspensions are in effect from 14 April 2013 until 14 July 2014.

The product and label suspensions apply as a consequence of the decision to continue the suspension of quintozone active constituent approvals and are in effect from 14 April 2013 until 14 July 2014.

BASIS FOR CONTINUED SUSPENSION

The APVMA became aware of information in 2010 indicating the presence of undeclared dioxins as impurities in products that contain quintozone as the active constituent. On this basis, the APVMA suspended quintozone active approvals, effective 9 April 2010 until 12 April 2011. In April 2011, the APVMA acted again to continue the suspension of all approvals of the active constituent quintozone for a further 12 months, to allow the manufacturer additional time to generate new data. The manufacturer provided the APVMA with additional data but the APVMA continued the suspension of all approvals of the active constituent quintozone until 14 April 2014 to allow time to consider this application. This application has subsequently been withdrawn. The APVMA has decided to continue the suspension of the active constituent approvals for a further 3 months until 14 July 2014.

In January 2013, one of the active constituent approvals (approval No.: 46112) was voluntarily cancelled.

Dioxins are listed as toxicologically significant impurities in the *Definition of Standards for Active Constituents* (see www.apvma.gov.au/products/constituents/standards/actives_definition.php). The presence of any impurity that is listed as toxicologically significant is a matter that the APVMA considers to be a relevant particular to the approval of an active constituent.

As stated in the *Agricultural Manual of Requirements and Guidelines* (AgMORAG) (www.apvma.gov.au/products/constituents/standards/actives_definition.php), an active constituent approval is not supportable unless any known impurities of toxicological significance have been adequately evaluated. An impurity that is present at levels above 1 g/kg should be declared and evaluated, and toxicologically significant impurities in the active constituent should be declared when present, regardless of the level present.

The APVMA considers that the active constituent quintozone may be an undue hazard to the safety of people exposed to it during its handling and may have an effect that is harmful to human beings. A full assessment of the dioxin impurities has not been conducted in accordance with section 14 of the Agvet Code Act. On this basis the APVMA has concluded that it cannot allow the active constituent to be supplied and used in chemical products when it contains undeclared dioxins. Consequently, the APVMA has suspended the approvals of quintozone active constituents.

The Agvet Code provides that if the APVMA suspends the only approval, or all the approvals, of an active constituent for an existing chemical product, it must also suspend any registration of that product. In addition, if the APVMA suspends the registration of a chemical product, it may also suspend any approval relating to a label for containers for the product.

IMPACT ON PRODUCT REGISTRANTS

Suspension action is based on the concern that undeclared dioxins may be present in quintozone active constituents and formulated products. The APVMA considers that it may be possible to allow some use of existing stocks of quintozone products during the period of suspension. Continued uses will only be permitted on the basis of test results for total dioxins in each batch of product proposed for use, and following evaluation by the Office of Chemical Safety and Environmental Health, to ensure that any continued use does not pose a risk to users.

INSTRUCTIONS FOR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS

Unless authorised by the APVMA, the following instructions apply for persons having possession or custody of stocks, and are considering using or otherwise dealing with suspended active constituent and product during the period of suspension.

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS

Possession and custody

Possession and custody of existing stocks of quintozone active constituent and/or products is permitted.

Supply

No supply of the active constituent quintozone and/or any product that contains it as an active constituent is permitted.

Use

No use of suspended product containing quintozone is permitted.

Any person who possesses or has custody of, or otherwise deals with the active constituents or products listed in Tables 1 and 2 (above) in accordance with the instructions in this notice is taken to have been issued with a permit to possess, have custody of, or deal with the active constituents or products during the period of suspension or until further notice.

WARNING

A person must not possess with the intent to supply, or deal with any materials containing quintozone during this period, except in accordance with the instructions contained in this notice. A failure to comply with these instructions will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply, use or deal with the active constituent after 9 April 2010 unless authorised to do so by the APVMA. Similarly, it is an offence for any person to possess with the intent to supply, use or deal with quintozone products after 12 April 2010, unless authorised to do so by the APVMA.

Variations to Standard 1.4.2 of the *Australia New Zealand Food Standards Code*

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Standard 1.4.2 – Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2014 (No. 1)*) gazetted on 28 January 2014 (No. APVMA 2).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Standard 1.4.2. A copy of the Amendment Instrument (No. APVMA 3, 2014) accompanies this notice. For a complete and up-to-date version of Standard 1.4.2, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at www.comlaw.gov.au.

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Standard 1.4.2 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Standard 1.4.2 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Australia New Zealand
Food Standards Code —
Standard 1.4.2 – Maximum Residue Limits
Amendment Instrument No. APVMA 3, 2014

I, Rajumati Bhula, Executive Director, Pesticides Program and delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Rajumati Bhula
Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary Medicines Authority

Dated this fourteenth day of April 2014

Part 1 Preliminary

1 Name of Instrument

This Instrument is the *Australia New Zealand Food Standards Code — Standard 1.4.2 – Maximum Residue Limits Amendment Instrument No. APVMA 3, 2014*.

2 Commencement

Pursuant to subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this Amendment Instrument commences on the day a copy of it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia *Agricultural and Veterinary Chemicals Gazette* No. APVMA 8 of 22 April 2014.

3 Object

The object of this Instrument is for the APVMA to make variations to Standard 1.4.2 – Maximum Residue Limits of the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

4 Interpretation

In this Instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Standard 1.4.2 – Maximum Residue Limits of the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that code. The whole of the *Australia New Zealand Food Standard Code* (including Standard 1.4.2) was further published in *Gazette* P 30 of 20 December 2000.

Part 2 Variations to Standard 1.4.2 – Maximum Residue Limits

5 Variations to Standard 1.4.2

The Schedule to this Instrument sets out the variations made to the Principal Instrument by this Amendment Instrument.

Schedule

Variations to Standard 1.4.2 – Maximum Residue Limits

1 Variations

(1) The Principal Instrument is varied by:

- (a) inserting in alphabetical order in Schedule 1, the foods and associated MRLs for each of the following chemicals –

Aminoethoxyvinylglycine Aminoethoxyvinylglycine	
Walnuts	*0.05
Bifenazate Sum of bifenazate and bifenazate diazene (diazene-carboxylic acid, 2-(4-methoxy-[1,1'-biphenyl-3-yl] 1-methylethyl ester), expressed as bifenazate	
Papaya (pawpaw)	T0.5
Captan Captan	
Cucumber	T5
Lettuce, leaf	T7
Peppers, Chili	T7
Peppers, Sweet	T7
Chlorantraniliprole <i>Plant commodities and animal commodities other than milk:</i> Chlorantraniliprole <i>Milk:</i> Sum of chlorantraniliprole, 3-bromo-N-[4-chloro-2-(hydroxymethyl)-6-[(methylamino)carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide, and 3-bromo-N-[4-chloro-2-(hydroxymethyl)-6-[[[(hydroxymethyl)amino]carbonyl]phenyl]-1-(3-chloro-2-pyridinyl)-1H-pyrazole-5-carboxamide, expressed as chlorantraniliprole	
Adzuki bean (dry)	T0.5
Chlorfenapyr Chlorfenapyr	
Brassica leafy vegetables [except chinese cabbage]	T3
Cyprodinil Cyprodinil	
Common bean (pods and/or immature seeds)	0.7
Leafy vegetables	10
Peas (pods and succulent, immature seeds)	0.5
Dimethomorph Sum of E and Z isomers of dimethomorph	
Onion, Welsh	2

Fenhexamid Fenhexamid	
Peas (pods and succulent, immature seeds)	T5
Fludioxonil <i>Commodities of animal origin:</i> Sum of fludioxonil and oxidisable metabolites, expressed as fludioxonil <i>Commodities of plant origin:</i> Fludioxonil	
Common bean (pods and/or immature seeds)	0.7
Leafy vegetables	10
Peas (pods and succulent, immature seeds)	0.5
Fosetyl Fosetyl	
Stone fruits [except cherries; peach]	T1
Methoxyfenozide Methoxyfenozide	
Lettuce, head	T30
Phosphorous acid Phosphorous acid	
Peach	100
Stone fruits [except cherries; peach]	T100
Spirotetramat Sum of spirotetramat, and cis-3-(2,5-dimethylphenyl)-4-hydroxy-8-methoxy-1-azaspiro[4.5]dec-3-en-2-one, expressed as spirotetramat	
Banana	T0.5

(b) omitting from Schedule 1 the foods and associated MRLs for each of the following chemicals –

Chlorfenapyr Chlorfenapyr	
Chervil	T5
Coriander (leaves, stem, roots)	T5
Herbs	T5
Cyprodinil Cyprodinil	
Lettuce, head	T10
Lettuce, leaf	T10
Peas	T2
Fludioxonil <i>Commodities of animal origin:</i> Sum of fludioxonil and oxidisable metabolites, expressed as fludioxonil <i>Commodities of plant origin:</i> Fludioxonil	
Lettuce, head	T10
Lettuce, leaf	T10
Peas	T2

- (c) omitting from Schedule 1, under the entries for the following chemicals, the maximum residue limit for the food, substituting –

Chlorfenapyr Chlorfenapyr	
Chinese cabbage	3
Mizuna	T3
Cyprodinil Cyprodinil	
Cucumber	0.5
Onion, bulb	0.2
Peppers, Sweet	0.7
Difenoconazole Difenoconazole	
Beetroot	T0.5
Dimethomorph Sum of E and Z isomers of dimethomorph	
Spring onion	2
Fludioxonil <i>Commodities of animal origin:</i> Sum of fludioxonil and oxidisable metabolites, expressed as fludioxonil <i>Commodities of plant origin:</i> Fludioxonil	
Cucumber	0.5
Edible offal (mammalian)	0.1
Meat (mammalian)	0.05
Milks	0.05
Onion, bulb	0.2
Peppers, Sweet	2
Strawberry	5
Metolachlor Metolachlor	
Cotton seed	*0.01

Addendum to the Record of Approved Active Constituents

The current *Record of Approved Active Constituents for Registered Chemical Products* is also accessible from the APVMA website, www.apvma.gov.au.

APPROVED SINCE GAZETTE NO. 7, 8 APRIL 2014

For use in agricultural and/or veterinary chemical products:

Common Name	Approval Holder	Manufacturer and Site of Manufacture	Approval No.
GLYPHOSATE	FORWARD AUSTRALIA PTY LTD	ZHEJIANG JINFANDA BIOCHEMICAL CO LTD HENG CUN TOWN, TONGLU ZHEJIANG PR CHINA	67078
THIACLOPRID	COLIN CAMPBELL (CHEMICALS) PTY LTD	JIANGSU FLAG CHEMICAL INDUSTRY CO., LTD CHANGFENGHE ROAD NANJING CHEMICAL INDUSTRIAL PARK, LUHE DISTRICT, NANJING 210047 PR CHINA	69309

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.

APPLICATION SUMMARIES PUBLISHED SINCE THOSE PUBLISHED IN APVMA GAZETTE NO. 7, 8 APRIL 2014.
