New agricultural active constituent: metcamifen

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has an application for the approval of a new agricultural active constituent, metcamifen, for use as a herbicide safener applied as a seed treatment in sorghum.

| | |
|---------------------------------|---|
| Common name: | Metcamifen (ISO) |
| IUPAC name: | 2-Methoxy- <i>N</i> -{4-[(methylcarbamoyl)amino](benzene-1-sulfonyl)}benzamide |
| Chemical abstracts name: | 2-methoxy- <i>N</i> -[[4-[[[(methylamino)carbonyl]amino]phenyl]sulfonyl]benzamide |
| CAS number: | 129531-12-0 |
| Molecular formula: | C ₁₆ H ₁₇ N ₃ O ₅ S |
| Molecular weight: | 363.4 g mol ⁻¹ |

Structure:

Chemical family: Aromatic sulfonamide

SUMMARY OF THE APVMA'S EVALUATION

The APVMA has evaluated the chemistry aspects of metcamifen active constituent (identification, stability, physicochemical properties, manufacturing process, specifications, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

Impurities of toxicological significance are not expected to occur in metcamifen as a result of the raw materials and the synthetic route used.

The APVMA has considered the toxicological aspects of metcamifen, and concluded that there are no toxicological concerns regarding the approval of this active constituent. An Acceptable Daily Intake (ADI) of 0.3 mg/kg bw/d has been established, along with an Acute Reference Dose (ARfD) of 0.3 mg/kg bw for women of childbearing age. An ARfD was unnecessary for the general population.

The Scheduling Delegate made a final decision to include metcamifen in Appendix B, Part 3 (substances not requiring control by scheduling) of the Poisons Standard, with an implementation date of 1 February 2020.

The APVMA is satisfied that the proposed use of metcamifen would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

MAKING A SUBMISSION

In accordance with sections 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of metcamifen should be granted. Change to conditions for the export of phorate

As required by section 69C(2) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, the Australian Government Department of Agriculture, Water and the Environment gives notice that the conditions that apply to the export of the active constituent phorate, or products containing the active constituent phorate, are changing.

The amendment is required to fulfil Australia's obligations under the Rotterdam Convention on the Prior Informed Consent Procedure for Certain Hazardous Chemicals and Pesticides in International Trade (Rotterdam Convention).

The Rotterdam Convention is an international treaty promoting shared responsibilities and cooperative efforts in the international trade of certain hazardous chemicals. It creates legally-binding obligations for implementing the Prior Informed Consent (PIC) procedure. Annex III of the Rotterdam Convention contains a list of chemicals that are subject to the PIC procedure. The PIC procedure aims to ensure that countries do not export chemicals, for use as pesticides, to other countries that have not provided their consent to receive them. Exporting parties must ensure that exports do not occur when the importing country has indicated that it does not consent to imports of that chemical.

In order to meet export notification requirements under the Rotterdam Convention, anyone seeking to export a listed chemical must apply to the Department of Agriculture, Water and the Environment for permission to export the chemical (contact details are at the end of this notice). Anyone exporting listed chemicals to countries that are parties to the convention must:

- (i) include the Harmonised System Customs Code for the chemical (where assigned) on shipping documentation, which can be found at:
pic.int/TheConvention/Chemicals/HarmonizedSystemCodes/tabid/1159/language/en-US/Default.aspx
- (ii) ensure adequate labelling of the chemical including information about
 - a) risks and/or hazards to human health and the environment
 - b) compliance with relevant international standards applicable to labels
- (iii) provide to the importer (if the chemical is to be used for occupational purposes) a safety data sheet that follows an internationally recognised format, with the most up to date information available, in one of the official languages of the importing party
- (iv) comply with any specified conditions stipulated by the importing country and promulgated by the secretariat to the Rotterdam Convention as advised by the authorised officer.

The amendment applies the PIC procedure to all phorate concentrations.

The amendment will not take effect in less than 30 days from the date of this notice.
