Suspension of 2,4-D Active Constituent Approval No. 68950

The APVMA has suspended the following 2,4-D active constituent approval:

Table 1: Suspended 2,4-D active constituent approval

Approval No.	Approval Holder
68950	Kingtai Chemicals Co., Limited

The suspension of 2,4-D active constituent approval No. 68950 is in effect from 8 October 2019 until 8 October 2020. The APVMA also declares that section 45B(2) of the Code ceases to apply in respect of the suspension of 2,4-D active constituent approval No. 68950 and thereby brings the deemed permit under section 45B(1) of the Code to an end.

REASONS

The reasons for the suspension of 2,4-D active constituent approval No. 68950 are:

- On 23 March 2018 the APVMA issued all holders of active constituents containing 2,4-D a notice under section 33 of the Agricultural and Veterinary Chemicals Code scheduled to the Agricultural and Veterinary Chemicals Code Act 1994 (Cth) (Code). The holder has failed to supply, without reasonable excuse, chemical analytical data on the dioxin and dioxin-like impurity content for 2,4-D active constituent approval No. 68950 as required under the notice.
- Based on the above, the APVMA is suspending the approval of 2,4-D active constituent approval No. 68950 in accordance with section 38 of the Code.

There are no instructions for the supply, possession, custody or use of 2,4-D active constituent approval No. 68950 since the supply, possession, custody or use of 2,4-D active constituent approval No. 68950 is prohibited.

WARNING

2,4-D active constituent approval No. 68950 is not approved and any associated products are unregistered and any associated labels are not approved during the period of suspension. A person must not possess with the intent to supply, or deal with, have custody of, or use 2,4-D active constituent approval No. 68950 or any products containing 2,4-D active constituent approval No. 68950 during this period. A failure to comply with the suspension will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply, or deal with, have custody of or use 2,4-D active constituent approval No. 68950 after 8 October 2019.

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2019 (No. 2)*.

The amendments will be incorporated into the compilation of the Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019.

The *MRL Standard* is accessible via the Federal Register of Legislation website [legislation.gov.au/Series/F2019L01105](https://www.legislation.gov.au/Series/F2019L01105)

Proposal to amend Schedule 20 in the Australia New Zealand Food Standards Code

In the previous notice on page 24 of APVMA Gazette No. 20, the APVMA gazetted amendments which it has approved to vary maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*.

Under section 82 of the *Food Standards Australia New Zealand Act 1991*, the APVMA is proposing to incorporate those variations (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2019 (No. 2)*) to MRLs into Schedule 20—Maximum residue limits in the Australia New Zealand Food Standards Code.

MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

FSANZ will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Schedule 20 in the APVMA Gazette. The variations will take effect as from the date of that subsequent notice.

PROPOSED VARIATION TO SCHEDULE 20 IN THE AUSTRALIA NEW ZEALAND FOOD STANDARDS CODE

(8 October 2019)

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.
