New Active Constituent Metamitron

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, metamitron. Metamitron is a plant growth regulator which acts by inhibiting photosynthetic electron transport at the photosystem II receptor site.

Common name:	Metamitron
IUPAC name:	4-Amino-3-methyl-6-phenyl-1,2,4-triazin-5(4H)-one
CAS name:	4-Amino-3-methyl-6-phenyl-1,2,4-triazin-5(4H)-one
CAS registry number:	41394-05-2
Minimum purity:	980 g/kg
Molecular formula:	C ₁₀ H ₁₀ N ₄ O
Molecular weight:	202.21

Structure:

Chemical family: Triazinone

SUMMARY OF THE APVMA'S EVALUATION OF METAMITRON ACTIVE CONSTITUENT

The APVMA has evaluated the chemistry aspects of metamitron active constituent (physico-chemical properties, identification, manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for metamitron:

Constituent	Specification	Level
Metamitron	Metamitron	980 g/kg minimum

Impurities of toxicological significance are not expected to occur in metamitron.

The APVMA has considered the toxicological aspects of metamitron. An Acceptable Daily Intake (ADI) of 0.03 mg/kg bw/d has been set, based on a No-Observed Adverse Effect Level (NOAEL) of 3 mg/kg bw/d in a 2-year dietary dog study, after applying an uncertainty factor of 100. An Acute Reference Dose (ARfD) of 0.1 mg/kg bw has been set based on the observation of reduced body weight gain in a rat developmental study with a NOAEL of 10 mg/kg bw, and after applying an uncertainty factor of 100. Metamitron was considered appropriate for inclusion in Schedule 6 of the Poisons Standard as notified in the public notice of the final decision on 10 April 2018, with an implementation date of 1 June 2018. The APVMA has concluded that there are no toxicological concerns regarding the approval of this active constituent.

The APVMA is satisfied that the proposed importation and use of metamitron would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

MAKING A SUBMISSION

In accordance with sections 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of metamitron should be granted. Submissions should relate only to matters that are considered in determining whether the safety criteria set out in section 5A of the Agvet Code have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.
