AMENDMENT No. 9K

AMENDMENTS TO THE MRL STANDARD

The Australian Pesticides and Veterinary Medicines Authority (APVMA) sets maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. These MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. At the same time the APVMA is satisfied, from dietary exposure assessment, that the levels are not an undue hazard to human health.

The MRL Standard lists MRLs of substances which may arise from the approved use of those substances or other substances, and provides the relevant residue definitions to which these MRLs apply.

The evaluation process takes into account studies on chemistry, metabolism, analytical methodology, residues, good agricultural practice, toxicology and dietary exposure. From time to time the evaluation process results in amendments to the MRL Standard. It should be noted that relevant MRLs are referred to Food Standards Australia New Zealand for incorporation into Standard 1.4.2 of the Food Standards Code entitled “Maximum Residue Limits”.

Note: ‘*’ denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals ‘At or about the Limit of Analytical Quantitation’*, published in NRA Gazette No.9, p44, 5/9/95).

‘T’ denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

The MRL Standard is also accessible via the APVMA web page.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website (http://www.apvma.gov.au/data_protection/appl_summaries.shtml). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.

NOTICE

Amendments to legislative instruments for fees and timeframes

The APVMA made some amendments to the legislative instruments under the Agvet Codes relating to fees and timeframes and created a new principal instrument to deal with additional information submitted by applicants voluntarily.

On 9 January 2008, the following four instruments relating to fees and timeframes were registered on the Federal Register of Legislative Instruments:

Agricultural and Veterinary Chemicals Code Amendment Instrument No. 1 (Trial Protocols) 2008;

Agricultural and Veterinary Chemicals Code Amendment Instrument No. 2 (Multiple Applications) 2008;

Agricultural and Veterinary Chemicals Code Amendment Instrument No. 3 (Multiple Applications) 2008; and

Agricultural and Veterinary Chemicals Code Instrument No. 3 (Assessment Periods for Applications where Additional Information is Submitted Voluntarily) 2008.

All four instruments commenced on registration and are available on ComLaw:
www.comlaw.gov.au.

The *Agricultural and Veterinary Chemicals Code Amendment Instrument No. 1 (Trial Protocols) 2008* amends the *Agricultural and Veterinary Chemicals Code Instrument No. 2 (Modular Assessment Fees) 2005* to allow residue assessments of trial protocols for agricultural and veterinary chemical products.

The *Agricultural and Veterinary Chemicals Code Amendment Instrument No. 2 (Multiple Applications) 2008* amends the *Agricultural and Veterinary Chemicals Code Instrument No. 1 (Application Fees) 2005* to allow multiple applications to be submitted under category 14 for the purpose of varying particulars or conditions of registration or label approval, provided the variation involves minor label changes in relation to two or more chemical products, the application is made by the same applicant and the variation is the same for each label change.

The *Agricultural and Veterinary Chemicals Code Amendment Instrument No. 3 (Multiple Applications) 2008* amends the *Agricultural and Veterinary Chemicals Code Instrument No. 2 (Modular Assessment Fees) 2005* by providing a new modular fee and timeframe for multiple applications. The proposed new modular fee for multiple applications allows applications to be “bundled” so that the module 1 screening fee (currently \$460) applies once irrespective of how many separate products are included in the multiple application. In addition, the module 11.4 finalisation fee (currently \$145) applies for each product up to five products and then once for each subsequent “bundle” of up to five products. If any technical assessment is required, the multiple application fee includes the ordinary modular fee for the technical assessment multiplied by the rate or actual number of times that the technical assessment is required.

The *Agricultural and Veterinary Chemicals Code Instrument No. 3 (Assessment Periods for Applications where Additional Information is Submitted Voluntarily) 2008* is a new principal instrument, which provides additional time for the APVMA to consider additional information submitted by applicants voluntarily.

This instrument and new compilations of the *Agricultural and Veterinary Chemicals Code Instrument No. 1 (Application Fees) 2005* and the *Agricultural and Veterinary Chemicals Code Instrument No. 2 (Modular Assessment Fees) 2005* are available on ComLaw: www.comlaw.gov.au and the APVMA website: www.apvma.gov.au/about_us/legislat.shtml.
