The *Agricultural and Veterinary Chemicals Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the Gazette containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*.

**GENERAL INFORMATION**

The *APVMA (Australian Pesticides & Veterinary Medicines Authority) Gazette* is published monthly and contains details of the registration of agricultural and veterinary chemical products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation, and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

**Distribution, web site and subscription**

From November 1999, the APVMA is providing the printed version of the *APVMA Gazette* free of charge to APVMA registrants. It is also now freely available on the APVMA web site:

## NOTICE

### Mitratapide

#### **in the product: YARVITAN 5mg/mL Oral Solution for Dogs**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application from Janssen Pharmaceutica NV for registration of a new product containing the new active constituent **Mitratapide**. The product is **YARVITAN 5mg/mL Oral Solution for Dogs** ('the product'). The product is for use in the management of overweight and obesity in dogs.

In accordance with sections 12 and 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether it should grant the application for registration of the product and approval of the active constituent. Submissions should state the grounds on which they are based. Such grounds should relate only to matters outlined below that the APVMA is required to take into account in deciding whether to grant the applications. Comments must be received by the APVMA within 28 days of the date of this notice.

#### **Particulars of Application**

Applicant company:	Janssen Pharmaceutica NV
Proposed product name:	<b>YARVITAN 5mg/mL Oral Solution for Dogs</b>
Name of active constituent:	<b>Mitratapide</b>
Signal heading:	S4
Proposed use:	For management of overweight and obesity in dogs
Withholding period:	N/A

#### **Summary of the APVMA's evaluation of YARVITAN 5mg/mL Oral Solution for Dogs in accordance with Section 14(3)(e) and (f) of the Agricultural and Veterinary Chemicals Code (the 'Agvet Code'), scheduled to the Agricultural and Veterinary Chemicals Code Act 1994**

The APVMA has evaluated the application and in its assessment in relation to human and environmental safety under section 14(3)(e) of the Agvet Code, it proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of the product would not be an undue hazard to the safety of people exposed to it during its handling and use.

The Office of Chemical Safety in the Department of Health and Ageing (OCS) has conducted a risk assessment on the product and concluded that it can be used safely. The APVMA accepts the findings and recommendations of the OCS evaluation.

- (ii) The APVMA is satisfied that the proposed use of the product will not be an undue hazard to the safety of people using anything containing its residues because the product is not for use in animals producing food or fibre commodities.
- (iii) The APVMA is satisfied that the proposed use of the product is not likely to be harmful to human beings.

The OCS has conducted a risk assessment on the product and concluded that it is not likely to be harmful to human beings if used according to the product label directions. The active constituent is scheduled as S4. The appropriate Signal Heading will appear on the product label. First Aid statement 'a' and Safety Directions have been recommended and will appear on the product label.

The APVMA accepts the findings and recommendations of the OCS evaluation.

- (iv) The APVMA is satisfied that the proposed use of the product is not likely to have an unintended effect that is harmful to animals, plants or the environment if used according to the product label directions.
- (v) The APVMA is satisfied that the proposed use of the product would not adversely affect trade between Australia and places outside Australia because the product is not for use in animals producing any major Australian export commodities.

In relation to its assessment of efficacy under section 14(3)(f) of the Agvet Code, the APVMA proposes to determine that:

- (i) The APVMA is satisfied that data from trials supporting the efficacy of the product adequately demonstrate that if used according to the product label directions, the product is effective for its proposed uses.

Written submissions on the APVMA's proposal to grant the application for registration of the product and approval of the active constituent should be addressed to:

## AMENDMENT No. 6L

### AMENDMENTS TO THE MRL STANDARD

The Australian Pesticides and Veterinary Medicines Authority (APVMA) sets maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. These MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. At the same time the APVMA is satisfied, from dietary exposure assessment, that the levels are not an undue hazard to human health.

The MRL Standard lists MRLs of substances which may arise from the approved use of those substances or other substances, and provides the relevant residue definitions to which these MRLs apply.

The evaluation process takes into account studies on chemistry, metabolism, analytical methodology, residues, good agricultural practice, toxicology and dietary exposure. From time to time the evaluation process results in amendments to the MRL Standard. It should be noted that relevant MRLs are referred to Food Standards Australia New Zealand for incorporation into Standard 1.4.2 of the Food Standards Code entitled "Maximum Residue Limits".

---

**Note:** '\*\*' denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals 'At or about the Limit of Analytical Quantitation'*, published in NRA Gazette No.9, p44, 5/9/95).

'T' denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

The MRL Standard is also accessible via the APVMA web page.

## AMENDMENTS TO THE MRL STANDARD: PREFACE AND TABLE 2

### **Amendments to the Preface, and Table 2 – CLASS B: Primary food commodities of animal origin.**

#### **BACKGROUND**

The APVMA has reviewed entries in Table 2 of the *MRL Standard* relating to fatty tissues. The entries describe the portion of the commodity to which the MRL applies, and which is analysed in the determination of residues.

The review concluded that an amendment in 1995 to Table 2 of the APVMA *MRL Standard* had anticipated a change in the Codex Alimentarius definition of the portion to be analysed for determination of residues of fat soluble chemicals. The change in the Codex Alimentarius definitions did not take place and it is appropriate for the definition to be realigned with the Codex Classification of Foods and Animal Feeds.

APVMA consulted extensively with stakeholders *via* the Public consultation facility on the APVMA website from 8 July 2008 to 29 September 2008 and comments were invited during the consultation period. All responses supported the changes proposed by APVMA.

The proposed changes were discussed at the Registration Liaison Committee on 18/9/2008 and the Industry Technical Committee on 24/9/2008. Both committees supported the changes proposed by APVMA.

### **Preface**

#### **Definitions**

##### **Meat(s) and Milk(s) [in the fat]**

###### **DELETE**

Where consideration has been given to an MRL for meat or milk, and the chemical concerned is fat soluble, the commodity is designated with the qualification '[in the fat]'. 'Meat' MRLs are expressed on a fat basis rather than on a whole product basis. The approach followed in the *MRL Standard* is that a portion of adhering fat is analyzed and the MRLs apply to the clean, dry fat. In the *MRL Standard*, when an MRL for cattle milk or milks is qualified by '[in the fat]', the MRL applies to the fat portion of the milk. Thus, MRLs are expressed on a fat basis. In the case of a derived or a manufactured milk: product with a fat content of 2% or more, the MRL also applies to the fat portion. For a milk product with fat content less than 2%, the MRL applied should be 1/50 of that for 'milk [in the fat]' and should apply to the whole product.

**TYPE 6 – MAMMALIAN PRODUCTS**

DELETE:

**MM Meat [mammalian]**

Whole commodity. When the commodity description is qualified by '[in the fat]', a portion of the adhering fat is analysed and MRLs apply to the clean, dry fat.

ADD:

**MM Meat [mammalian]**

Whole commodity. When the commodity description is qualified by '[in the fat]', a portion of the adhering fat is analysed and MRLs apply to the fat.

**TYPE 7 – POULTRY PRODUCTS**

DELETE:

**PM Poultry Meat**

Whole commodity. When the commodity description is qualified by '[in the fat]', a portion of the adhering fat is analysed and MRLs apply to the clean, dry fat.

ADD:

**PM Poultry Meat**

Whole commodity. When the commodity description is qualified by '[in the fat]', a portion of the adhering fat is analysed and MRLs apply to the fat.

**TYPE 8 – AQUATIC ANIMAL PRODUCTS**

DELETE:

**WM Marine mammals**

Whole commodity as marketed without bones. For fat soluble pesticides a portion of the fat is analysed and MRLs apply to the clean, dry fat.

ADD:

**WM Marine mammals**

Whole commodity as marketed without bones. For fat soluble agricultural chemicals and veterinary medicines a portion of the fat is analysed and MRLs apply to the fat.

**NOTICE****SUSPENSION OF LABEL APPROVALS OF SELECTED PRODUCTS  
WHICH CONTAIN DIAZINON**

The APVMA has re-issued the suspension of the products and label approvals of four products which contain diazinon, and which have label instructions for dipping and/or jetting sheep. The products are listed in Table 1.

**Table 1: Products which contain diazinon, and which have label instructions for dipping and/or jetting sheep**

<b>Products with dipping/jetting instructions only</b>

39572	WSD Diazinon For Sheep, Cattle, Goats And Pigs	Rebop Holdings Pty Ltd T/A Western Stock Distributors	Transitional label, 39572/1100

The existing suspensions are in effect from 4 May 2007 until 4 November 2008. The extension takes effect from 5 November 2008 until 30 November 2009.

Existing stocks of the above products already on retail shelves or purchased prior to the initial suspension may be used according to current label instructions for a period of two years, until May 2009, consistent with expiry date information on the product label. However, users should check that any such use complies with state occupational health and safety (OHS) legislation.

**Reasons for suspension**

The reasons for suspension are set out in the June 2006 publication titled: *'The reconsideration of approvals of the active constituent diazinon, registration of products containing diazinon, and approval of their associated labels, Part 2, Preliminary Review Findings'* (the PRF).

In the PRF the APVMA proposed to conclude, amongst other things, that it was not satisfied that the labels of certain products, including those currently approved for traditional dipping and jetting of sheep, contain adequate instructions in relation to the criteria set out in section 14(3)(g) of the Agvet codes as well as those referred to in Regulations 11 and 12.

Information on the basis for the findings and the proposed regulatory outcomes can be found in the PRF on the APVMA website at <http://www.apvma.gov.au/chemrev/diazinon.shtml>.

The APVMA completed its consideration of responses relevant to the use of diazinon for dipping and jetting sheep in May 2007, and concluded that the responses did not alter its preliminary findings reported in the PRF. The key finding continues to be that there is an occupational health and safety risk to workers when they dip or jet sheep by traditional methods in accordance with existing label instructions.

Further, the APVMA has concluded that there is currently no practical way to vary the existing label instructions on the registered products listed in Table 1 in order for the APVMA to be satisfied that the use of diazinon for dipping and jetting sheep would not be likely to be harmful to workers.

Notwithstanding this finding, a 12-month permit to allow limited sheep dipping with diazinon to continue, using the 'Richards System Submersible Cage Dipper' was granted in September 2007, on the basis of limited data showing this system is unlikely to be a risk to workers, on the condition that additional OHS evidence would be provided. However, the permit holder subsequently requested additional time to generate the required data and has been given a further permit, this time for three months, to continue to dip sheep and to generate the required OHS data.

In the interim, the APVMA has continued to address the existing OHS concerns related to traditional dipping and jetting practices by re-issuing the product and label suspensions.

## **Instructions for possessing, having custody of, supplying, using or dealing with suspended products containing the suspended labels**

### **1. Possession and custody**

A person may possess, have custody of, use, or otherwise deal with the suspended product containing a suspended label only in accordance with these instructions.

### **2. Supply of products with sheep dipping/jetting instructions only**

The products listed in Table 2 may not be supplied **from the manufacturer** after the date of this suspension.

For existing stocks already supplied to the wholesale/retail supply chain before the commencement of the initial suspension on 4 May 2007, supply to the user may continue.

**Table 2: Products with sheep dipping/jetting instructions only**

<b>Product number</b>	<b>Product name</b>	<b>Registrant</b>	<b>Label approval numbers</b>
46295	Coopers 4-in-1 Dip	Schering-Plough Pty Limited	Transitional label, 46295/01, 46295/1202

### 3. Use of product with sheep dipping/jetting instructions only

For stocks of the product listed in Table 2, which has been supplied to the user before 4 May 2007, or which is already in the possession of the user before the commencement of the initial suspension, product may be used in accordance with existing label instructions.

### 4. Supply of products which have label instructions additional to those for sheep dipping and/or jetting

The following label instructions apply to the supply of products manufactured after the date of the suspension on 4 May 2007 and for the duration of the suspension, but do NOT apply to products which have already been supplied to the wholesale/retail supply chain before the date of the initial suspension. These products are listed in Table 3.

Stocks of products listed in Table 3, manufactured after the date of suspension, may only be supplied if the labels of these products have been amended to be consistent with these instructions.

#### Label instructions

READ THESE INSTRUCTIONS before using or otherwise handling the product. When using or otherwise handling the product, follow these instructions. Other than as specified below, the products must be used in accordance with the instructions on the label attached to the container.

If the instructions below are inconsistent with the label instructions, the instructions in this notice must be followed.

In all states and territories the following DIRECTIONS FOR USE apply:

**DO NOT use this product for dipping or jetting sheep.**

**Warning:** These labels are not approved during the period of suspension. A person must not possess with the intent to supply, or deal with any product containing this label during this period except in accordance with the instructions contained in this notice. A failure to comply with them will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action.

For products listed in Table 3, the label instructions set out above apply to products which are supplied from the manufacturer to wholesalers/retailers after the date of suspension.

Products which were supplied to the wholesale/retail supply chain prior to commencement of the suspension on 4 May 2007, may be supplied to the end-user without a copy of these instructions.

**Table 3: Products which have label instructions additional to those for sheep dipping and/or jetting**

Product number	Product name	Registrant	Label approval numbers
33475	Coopers Di-Jet Sheep Dip/Jetting Fluid, Cattle And Pig Spray	Schering-Plough Pty Limited	Transitional label, 33475/01

39572	WSD Diazinon For Sheep, Cattle, Goats And Pigs	Rebop Holdings Pty Ltd T/A Western Stock Distributors	Transitional label, 39572/1100

**5. Use of products which have label instructions additional to those for sheep dipping and/or jetting**

The products listed in Table 3 which were supplied from the manufacturer before 4 May 2007, or which were already in the possession of the user before 4 May 2007, may be used in accordance with existing label instructions for a period of up to 2 years from this date, until 4 May 2009 or until expiry as specified on the label. Table 4 specifies the last batch of products which were manufactured before 4 May 2007.

**Table 4: Batch details of products in Table 3 which were manufactured before 4 May 2007.**

Product number	Product name	Batch numbers
33475	Coopers Di-Jet Sheep Dip/Jetting Fluid, Cattle And Pig Spray	011WS7003, 011WS7004, 011WS7005
