**GENERAL INFORMATION**

The *APVMA (Australian Pesticides & Veterinary Medicines Authority) Gazette* is published monthly and contains details of the registration of agricultural and veterinary chemical products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation, and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

**Distribution, web site and subscription**

From November 1999, the APVMA is providing the printed version of the *APVMA Gazette* free of charge to APVMA registrants. It is also now freely available on the APVMA web site:

## **Notice – New Agricultural & Veterinary Active Constituents**

### **Porcine Circovirus Type 2 ORF-2 Protein [in the product: Ingelvac Circoflex]**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application from Boehringer Ingelheim Pty Limited, for the approval of a new active constituent, Porcine circovirus Type 2 ORF-2 protein. The APVMA also has before it an application from the same applicant, for the registration of a new product, INGELVAC CIRCOFLEX ('the product') containing the above active constituent. The product is to aid in the prevention and control of diseases in pigs associated with porcine circovirus type 2 (PCV2).

In accordance with sections 12 and 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the APVMA should grant the application for approval of the active constituent and registration of the product. Submissions should state the grounds on which they are based. Such grounds should relate only to matters outlined below that the APVMA is required to take into account in deciding whether to grant the application. The APVMA must receive comments within 28 days of the date of this notice.

### **Amounts to be administered and administration route**

Single intramuscular injection of one dose (1 ml), irrespective of body weight

### **Indications for use**

For active immunisation of pigs over the age of 2 weeks against Porcine Circovirus Type 2 (PCV2) to reduce mortality, clinical signs - including weight loss - and lesions in lymphoid tissues associated with PCV2 related disease (PCVD). In addition, vaccination has been shown to reduce PCV2 nasal shedding, viral load in blood and lymphoid tissues, and duration of viraemia.

### **Use during pregnancy, lactation**

Do not use during pregnancy and lactation

### **Side effects:**

A mild and transient hyperthermia and mild depression and anorexia, mainly observed four hours following injection.

### **Withholding period**

Nil

**Summary of the APVMA's evaluation of Ingelvac CircoFLEX in accordance with Section 14(3)(e) and (f) of the *Agricultural and Veterinary Chemicals Code (‘the Agvet Code’)*, scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994***

The APVMA has assessed the chemistry and manufacturing aspects of Porcine circovirus type 2 ORF2 protein antigen and the product, including starting materials, master seed organism (source, isolation, identification, testing), culture media, vaccine production, storage, quality control and batch release analysis, have been assessed and found to meet APVMA standard.

The APVMA is satisfied that the proposed use of Porcine circovirus type 2 ORF2 protein in the product, as an aid in the prevention and control of diseases in pigs associated with porcine circovirus type 2 (PCV2), such as reduce mortality, weight loss and lesions in lymphoid tissues associated with PCV2 related disease, would not be likely to have an effect that is harmful to human beings, environment or trade. The adjuvant and the excipients used in the product have been previously assessed and found to be safe. They are already present in several vaccines registered for use in Australia.

In relation to its assessment of efficacy and safety in target animal the APVMA is satisfied that the data supporting the efficacy and safety of the product, adequately demonstrates that this product is likely to be effective under Australian conditions when used as directed according to label instructions.

The office of Gene Technology assessed Ingelvac CircoFLEX vaccine and concluded that the inactivation and purification steps ensure that no viable recombinant virus is present in the final product and therefore the vaccine is not considered to be a GMO under the Gene Technology Act 2000.

Written submissions on the APVMA's proposal to grant the application for approval of the active constituent Infectious avian bursal disease virus (killed), and the registration of the product INGELVAC CIRCOFLEX should be addressed to:

## Other Notices

### Licensing of Veterinary Chemical Manufacturers

---

Pursuant to Part 8 of the *Agricultural and Veterinary Chemical Codes* scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has issued, amended or cancelled the manufacturing licences in respect of the following veterinary chemical manufacturers, with effect from the dates shown.

For a comprehensive listing of all licensed manufacturers please see the APVMA's web site:  
<http://www.apvma.gov.au>.

### **Amendment No. 5M: Amendments to the MRL standard**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) sets maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. These MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. At the same time the APVMA is satisfied, from dietary exposure assessment, that the levels are not an undue hazard to human health.

The MRL Standard lists MRLs of substances which may arise from the approved use of those substances or other substances, and provides the relevant residue definitions to which these MRLs apply.

The evaluation process takes into account studies on chemistry, metabolism, analytical methodology, residues, good agricultural practice, toxicology and dietary exposure. From time to time the evaluation process results in amendments to the MRL Standard. It should be noted that relevant MRLs are referred to Food Standards Australia New Zealand for incorporation into Standard 1.4.2 of the Food Standards Code entitled “Maximum Residue Limits”.

---

**Note:** ‘\*’ denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals ‘At or about the Limit of Analytical Quantitation’*, published in NRA Gazette No.9, p44, 5/9/95).

‘T’ denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

**The MRL Standard is also accessible via the APVMA web page.**

### **Exemption for the purposes of Sections 75 and 78 of the Agvet Codes for products supplied prior to 29 January 2009**

The APVMA has granted an exemption for the purposes of sections 75 (1) (b) and 78 (1) (b) of the Agvet Codes for the following Vets All Natural products:

1. Vet's All Natural Herbal Wound Spray in 500ml containers.
2. Vet's All Natural Herbal Ear Cleaner in 50ml containers.
3. Vet's All Natural Cough & Flu Tonic in 50ml containers.
4. Vet's All Natural Dermal Ointment in 250ml containers.

This exemption is granted for the period from 10 October 2009 to 11 January 2010 inclusive. This means that even though these exempted products are veterinary chemical products under the Agvet Codes, it is not an offence to possess them for the purposes of supply or to supply them.

This exemption only applies to stocks of the product held by a person, which has been:

Supplied either directly or indirectly, by Vets All Natural Pty Ltd, and; Supplied prior to 29 January 2009.

This exemption in no way should be construed as implying that the APVMA has either assessed or supports the claims made by Vets All Natural about these products.

This exemption may be cancelled at any time by the APVMA.

The reason for granting this temporary exemption is as a result of compliance action by the APVMA and the company has also entered into a compliance undertaking. This undertaking is to ensure future compliance with the Agricultural and Veterinary Chemicals Code.

If any person requires any further information or to view the labels of these products please contact the APVMA compliance team on 1300 700 315 or [compliance@apvma.gov.au](mailto:compliance@apvma.gov.au).

This exemption is granted for the period from 10 October 2009 to 11 January 2010 inclusive. This exemption means that even though these exempted products are "veterinary chemical products" under the Agvet Codes, it is not an offence to possess them for the purposes of supply or to supply them.

This exemption applies to stocks of the products listed supplied by Vets All Natural to any other person whether it be directly or indirectly through distributors, during the period of this exemption. All other stock is subject to the operation of Sections 75 and 78 of the Codes.

This exemption in no way should be construed as implying that the APVMA has either assessed or supports the claims made by Vets All Natural about these products.

This exemption may be cancelled at any time by the APVMA.

The reason for granting this temporary exemption is a result of compliance action by the APVMA and the registrant has entered into a compliance undertaking. This undertaking is to ensure future compliance with the Agricultural and Veterinary Chemicals Code.

If any person required any further information or to view the labels of these products please contact the APVMA compliance team on 1300 700 315 or [compliance@apvma.gov.au](mailto:compliance@apvma.gov.au).

## Application Summaries

The APVMA publishes complete application summaries on the APVMA website ([http://www.apvma.gov.au/data\\_protection/appl\\_summaries.shtml](http://www.apvma.gov.au/data_protection/appl_summaries.shtml)). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
