The *Agricultural and Veterinary Chemicals Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*.

**GENERAL INFORMATION**

The *APVMA (Australian Pesticides & Veterinary Medicines Authority) Gazette* is published monthly and contains details of the registration of agricultural and veterinary chemical products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation, and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

**Distribution, web site and subscription**

From November 1999, the APVMA is providing the printed version of the *APVMA Gazette* free of charge to APVMA registrants. It is also now freely available on the APVMA web site:

## Other Notices

### Suspension of Label Approvals of Selected Products Containing Diazinon

The APVMA has re-issued the suspension of label approvals for three products which contain diazinon, and which have label instructions for dipping and/or jetting sheep. As a consequence of these label suspensions, affected products will also be suspended. The products are listed in Table 1.

**Table 1: Products which contain diazinon and which have label instructions for dipping and/or jetting sheep**

| Product number   | Product name   | Registrant  | Label approval numbers                   |
|--|--|---|--|
| <b>Products with dipping/jetting instructions only</b>   |  |   |  |
| 46295  | Coopers 4-in-1 Dip                                   | Intervet Australia Pty Limited                        | Transitional label, 46295/01, 46295/1202 |
| <b>Products with uses in addition to dipping/jetting</b> |  |   |  |
| 38874  | Virbac Jetdip Sheep Jetting Fluid & Blowfly Dressing | Virbac (Australia) Pty Ltd                            | Transitional label, 38874/0499           |
| 39572  | WSD Diazinon For Sheep, Cattle, Goats And Pigs       | Rebop Holdings Pty Ltd T/A Western Stock Distributors | Transitional label, 39572/1100           |

Existing suspensions are in effect from 4 November 2008 to 30 November 2009. This extension takes effect from 1 December 2009 and applies until 30 November 2010.

#### Reasons for suspension

The reasons for suspension are set out in the June 2006 publication titled: *'The reconsideration of approvals of the active constituent diazinon, registration of products containing diazinon, and approval of their associated labels, Part 2, Preliminary Review Findings'* (the PRF).

In the PRF the APVMA proposed to conclude, amongst other things, that it was not satisfied that the labels of certain products, including those currently approved for traditional dipping and jetting of sheep, contain adequate instructions in relation to the criteria set out in section 14(3)(g) of the Agvet codes as well as those referred to in Regulations 11 and 12.

Information on the basis for the findings and the proposed regulatory outcomes can be found in the PRF on the APVMA website at

<http://www.apvma.gov.au/products/review/current/diazinon.php>.

The APVMA completed its consideration of responses received from various stakeholders in response to the publication of the PRF in May 2007. It concluded that the responses relevant to the use of diazinon for dipping and jetting sheep did not alter the preliminary findings reported in the PRF. The key finding continues to be that there is an occupational health and safety risk to workers when they dip or jet sheep by traditional methods in accordance with existing label instructions.

Further, the APVMA concluded that there is currently no practical way to vary the existing label instructions on the registered products listed in Table 1 in order for the APVMA to be satisfied that the use of diazinon for dipping and jetting sheep would not be likely to be harmful to workers.

Notwithstanding this finding, a permit to allow limited sheep dipping with diazinon to continue using the 'Richards System Submersible Cage Dipper' was granted in September 2007, on the basis of limited data showing that this system is unlikely to be a risk to workers. This permit was granted on the condition that additional OHS evidence would be provided. The required data have been submitted and are currently undergoing evaluation.

In the interim, the APVMA has continued to address the existing OHS concerns related to traditional dipping and jetting practices by re-issuing the product and label suspensions.

### **Instructions for possessing, having custody of, supplying, using or dealing with suspended products containing the suspended labels**

#### **1. Possession and custody**

A person may possess, have custody of, use, or otherwise deal with the suspended product containing a suspended label only in accordance with these instructions.

#### **2. Supply of products with sheep dipping/jetting instructions only**

The products listed in Table 2 may not be supplied **from the manufacturer** after the date of this suspension.

For existing stocks already supplied to the wholesale/retail supply chain before the commencement of the initial suspension (issued on 4 May 2007), supply to the user was permitted to continue for up to 2 years. Note that this interval has now passed. Therefore there should be no stocks of this product in the wholesale/retail supply chain.

**Table 2: Products with sheep dipping/jetting instructions only**

| <b>Product number</b> | <b>Product name</b> | <b>Registrant</b>              | <b>Label approval numbers</b>            |
|-----------------------|---------------------|--------------------------------|--|
| 46295                 | Coopers 4-in-1 Dip  | Intervet Australia Pty Limited | Transitional label, 46295/01, 46295/1202 |

### **3. Use of product with sheep dipping/jetting instructions only**

For stocks of the product listed in Table 2, which have been supplied to the user before 4 May 2007, or which are already in the possession of the user before the commencement of the initial suspension, product was previously able to be used in accordance with existing label instructions. However, the shelf life of this product is 24 months. Therefore any remaining out-of date stocks of this product are no longer suitable for use and should be disposed of safely, via a suitable chemical handling program such as ChemClear.

### **4. Supply of products which have label instructions additional to those for sheep dipping and/or jetting**

The following label instructions apply to the supply of products manufactured after the date of the suspension on 4 May 2007 and for the duration of the suspension (but did NOT apply to products which had already been supplied to the wholesale/retail supply chain before the date of the initial suspension). These products are listed in Table 3.

Stocks of products listed in Table 3, manufactured after the date of suspension, may only be supplied if the labels of these products have been amended to be consistent with these instructions.

#### **Label instructions**

READ THESE INSTRUCTIONS before using or otherwise handling the product.

When using or otherwise handling the product, follow these instructions.

Other than as specified below, the products must be used in accordance with the instructions on the label attached to the container.

If the instructions below are inconsistent with the label instructions, the instructions in this notice must be followed.

In all states and territories the following DIRECTIONS FOR USE apply:

**DO NOT use this product for dipping or jetting sheep.**

**Warning:** These labels are not approved during the period of suspension. A person must not possess with the intent to supply, or deal with any product containing this label during this period except in accordance with the instructions contained in this notice. A failure to comply with them will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action.

For products listed in Table 3, the label instructions set out above apply to products which are supplied **from the manufacturer** to wholesalers/retailers after the date of commencement of the suspension, viz 4 May 2007.

**Table 3: Products which have label instructions additional to those for sheep dipping and/or jetting**

| Product number | Product name   | Registrant   | Label approval numbers         |

**5. Use of products which have label instructions additional to those for sheep dipping and/or jetting**

The products listed in Table 3 which were supplied from the manufacturer before 4 May 2007, or which were already in the possession of the user before 4 May 2007, were to be used in accordance with existing label instructions for a period of up to 24 months from the date of suspension, until 4 May 2009 or until expiry as specified on the label where the expiry date specified a shorter interval. Table 4 specifies the last batch of products which were manufactured before 4 May 2007.

**Table 4: Batch details of products in Table 3 which were manufactured before 4 May 2007**

| Product number | Product name   | Batch numbers                   |

## **Amendment No. 7M**

### **Amendments to the MRL Standard**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) sets maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. These MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. At the same time the APVMA is satisfied, from dietary exposure assessment, that the levels are not an undue hazard to human health.

The MRL Standard lists MRLs of substances which may arise from the approved use of those substances or other substances, and provides the relevant residue definitions to which these MRLs apply.

The evaluation process takes into account studies on chemistry, metabolism, analytical methodology, residues, good agricultural practice, toxicology and dietary exposure. From time to time the evaluation process results in amendments to the MRL Standard. It should be noted that relevant MRLs are referred to Food Standards Australia New Zealand for incorporation into Standard 1.4.2 of the Food Standards Code entitled "Maximum Residue Limits".

---

**Note:** ‘\*’ denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals ‘At or about the Limit of Analytical Quantitation’*, published in NRA Gazette No.9, p44, 5/9/95).

‘T’ denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

The MRL Standard is also accessible via the APVMA website at:  
<http://www.apvma.gov.au/residues/standard.php>

## Application Summaries

The APVMA publishes complete application summaries on the APVMA website (<http://www.apvma.gov.au/registration/assessment/application/index.php>). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
