Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

#### **SUMMARY OF THE APVMA'S EVALUATION OF NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES IN ACCORDANCE WITH SECTION 14(3)(E) AND (F) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994***

The APVMA has evaluated the application and in its assessment in relation to human and environmental safety under section 14(3)(e) of the Agvet Code, it proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of **NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES** would not be an undue hazard to the safety of people exposed to them during their handling and use.

The Office of Chemical Safety and Environmental Health (OCSEH) in the Department of Health and Ageing has conducted a risk assessment on the products and concluded that they can be used safely.

The APVMA has considered the findings and recommendations of the OCSEH evaluation and accepts these findings and recommendations.

- (ii) The APVMA is satisfied that the proposed use of **NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES** will not be an undue hazard to the safety of people using anything containing their residues.

The products are for use in companion animals only thus acetyl glucosamine or its metabolites are unlikely to enter the food chain.

The APVMA is satisfied that the proposed use of the new products, **NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES** containing the active constituent acetyl glucosamine is not likely to be harmful to human beings if used according to the product label directions.

- (iii) The APVMA is satisfied that the proposed use of the new products, **NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES** is not likely to have an unintended effect that is harmful to animals, plants or the environment if used according to the product label directions.
- (iv) The APVMA is satisfied that the proposed use of **NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES** would not adversely affect trade between Australia and places outside Australia as the product is not for use in animals producing any major Australian export commodities.
- (v) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data supporting the efficacy of the products adequately demonstrate that if used according to the product label directions, the products are effective for the proposed uses.

## MAKING A SUBMISSION

In accordance with sections 12 and 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the applications for registration of **NV PENTOSAN GOLD INJECTION FOR DOGS AND NV PENTOSAN GOLD INJECTION FOR HORSES** should be granted. Submissions should relate only to matters that the APVMA is required by legislation to take into account in deciding whether to grant the application. These grounds include **occupational health and safety, chemistry and manufacture, residues, safety and first aid, environmental fate and toxicity, trade and efficacy**. Submissions should state the grounds on which they are based. Comments received outside these grounds cannot be considered by the APVMA.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling. A summary of relevant comments and the APVMA's response will be published on the APVMA website.

When making a submission please include:

#### BASIS FOR CANCELLATION

The review of endosulfan conducted by the APVMA was completed in 2005. The advent of the Stockholm Convention to take action on Persistent Organic Pollutants (POPs) has focussed more attention on endosulfan and produced a large volume of new information on its environmental fate and effects. In addition, new toxicology studies have been made available since the completion of the review.

The APVMA and its evaluating agencies, The Office of Chemical Safety and Environmental Health (OCSEH) and The Department of Sustainability, Environment, Water, Population and Communities (DSEWPC) have now considered this new information.

An assessment by the OCSEH indicated that, for the restricted conditions of use in Australia imposed in 2005, endosulfan does not represent a similar risk to agricultural workers as in the US. Apart from minor changes to recommended protective clothing on product labels, continued registration is supported. Neither the APVMA nor the OCSEH believe the US EPA action is a cause for action in Australia in relation to human health issues.

The APVMA received a report from DSEWPC that concludes that endosulfan is likely, because of its potential for off-site movement (spray drift and run-off), to lead to significant adverse chronic and sub-chronic environmental effects on the basis of continued and prolonged use. DSEWPC found that endosulfan is a persistent, bioaccumulative chemical with the potential for transport over long distances. DSEWPC advised that these risks cannot be mitigated through restrictions on use of products that contain it by variations to label instructions for these products.

### PERMISSIBLE DATES OF APPLICATION OF 2,4-D HIGH VOLATILE ESTERS

Application of 2,4-D ethyl ester, butyl ester or isobutyl ester must only take place during a spray window between **1 May and 31 August**.

Victoria, Western Australia, Tasmania and Queensland currently have mechanisms whereby the use of specific chemicals (including 2,4-D) is restricted to geographical areas and/or time zones due to the higher risk for adverse off-target crop or environmental effects. These state restrictions on 2,4-D use may place additional requirements on users within this spray window between 1 May and 31 August, for example, length of the spray window and spray equipment. Users must consult their local authority or department of agriculture to ensure they meet state requirements.

Application of 2,4-D only within this spray window will minimise the risk of unintended harmful effects to native vegetation and susceptible crops. Avoid spraying upwind of nearby susceptible crops.

### RECORD KEEPING REQUIREMENTS

Within 24 hours of completing a 2,4-D ethyl, butyl or isobutyl ester application all users **must** make and keep a record of each application. The details required in a 2,4-D ester spray record must contain at least the information set out below. It is the recommended and considered good practice, that the grower collects from any person acting on his or her behalf a copy of the 2,4-D ester spray record. (For convenience, a 2,4-D record-keeping form can be obtained from the Australian Pesticides and Veterinary Medicines Authority website.)

**WARNING**

These products are unregistered and labels are not approved during the period of suspension. A person must not possess with the intent to supply, or deal with any of these products during this period except in accordance with the instructions contained in this notice. A failure to comply with them will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action.

## Application Summaries

The APVMA publishes complete application summaries on the APVMA website, [www.apvma.gov.au](http://www.apvma.gov.au). They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
