**Australian Pesticides and
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 53(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

From February 2010, the APVMA will publish the *APVMA Gazette* in electronic format only. The *APVMA Gazette* and information about subscribing to the gazette alert service are available on the APVMA website, www.apvma.gov.au.

Copies of the *APVMA Gazette* from November 1999 until July 2009 will remain available from the APVMA website.

APVMA CONTACTS

For enquiries regarding the publishing and distribution of the *APVMA Gazette*: Telephone: +61 2 6210 4871

For enquiries on the *APVMA Gazette* content, please refer to the individual APVMA contacts listed under each notice.

OTHER NOTICES

List of Non-Renewed Registrations

This notice is published under section 54 of the Agvet Codes. The registration of the following products were not renewed for the financial year 2010-2011 and accordingly these registrations ended on 30 June 2010.

It is an offence under Part 2 of the Agvet Codes for anyone to possess for the purpose of supply, or to supply, the following unregistered chemical products in Australia unless the products were in their possession before 30 June 2010 and the possession or supply is in accordance with the APVMA's instructions, set out below.

It is an offence for a person or company who imported the product into Australia or manufactured the product in Australia to possess for supply or supply the product after 30 June 2010.

If the registration of the product was subject to conditions – the possession, custody, supply or use of the product must be in accordance with those conditions (including any conditions relating to the shelf-life or expiry date).

While it is an offence against the Agvet Codes to possess, supply or use an unregistered chemical product, section 54 (2) allows a person, other than an importer or manufacturer, to deal with product in accordance with the APVMA's instructions below, for 2 years after the day on which the registration ends.

INSTRUCTIONS FOR DEALING WITH THE CHEMICAL PRODUCTS

The APVMA issues the following instructions for the possession, custody, supply and use of existing stocks of the chemical products listed in this notice and which were manufactured in, or imported into, Australia before 30 June 2010:

1. The label attached to the container of the product must be identical (except for particulars relating to the batch number, date of manufacture or expiry date of the product) to an approved label for that product that was in force on 30 June 2010; and
2. The products are to be used in accordance with the instructions on the approved label for that product.

Note: The label(s) for these products in force on 30 June 2010 continue in force while these instructions apply to the product.

Non renewed registrations

Amendments to the MRL Standard

AMENDMENT NO. 5N

The Australian Pesticides and Veterinary Medicines Authority (APVMA) sets maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. These MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. At the same time the APVMA is satisfied, from dietary exposure assessment, that the levels are not an undue hazard to human health.

The MRL Standard lists MRLs of substances which may arise from the approved use of those substances or other substances, and provides the relevant residue definitions to which these MRLs apply.

The evaluation process takes into account studies on chemistry, metabolism, analytical methodology, residues, good agricultural practice, toxicology and dietary exposure. From time to time the evaluation process results in amendments to the MRL Standard. It should be noted that relevant MRLs are referred to Food Standards Australia New Zealand for incorporation into Standard 1.4.2 of the Food Standards Code entitled "Maximum Residue Limits".

Note: "*" denotes that the maximum residue limit (MRL) has been set at or about the limit of analytical quantitation (see: Residue Guideline No.4, *Maximum Residue Limit Proposals 'At or about the Limit of Analytical Quantitation'*, published in NRA Gazette No.9, p44, 5/9/95).

'T' denotes that the MRL, residue definition or use is temporary to enable further experimental work to be carried out in Australia or overseas, and will be reconsidered at some future date.

The MRL Standard is also accessible via the APVMA website, www.apvma.gov.au

TABLE 1: MAXIMUM RESIDUE LIMITS OF PESTICIDES, AGRICULTURAL CHEMICALS, FEED ADDITIVES, VETERINARY MEDICINES AND ASSOCIATED SUBSTANCES IN FOOD COMMODITIES

Residues of substances which may occur in food commodities and for which the following maximum residue limits (MRLs) apply.

COMPOUND	FOOD	MRL (mg/kg)
Avilamycin		
DELETE:		
MO 0818	Pig, Edible offal of	T*0.05

Reconsideration of Active Constituents, Registrations and Label Approvals Related to Thiophanate-methyl

The APVMA, in accordance with Part 2, Division 4, of the Agvet Codes, has reconsidered the existing approval of the active constituent thiophanate-methyl, registrations of all products containing thiophanate-methyl and the approvals of all associated product labels.

Thiophanate-methyl is a member of the benzimidazole group of fungicides used for broad-spectrum control of soil-borne diseases of ornamental plants. Thiophanate-methyl is not currently registered for use on food-producing species in Australia.

Thiophanate-methyl breaks down in plants and the environment to form carbendazim and the use of thiophanate-methyl can lead to residues of carbendazim in treated commodities. The Office of Chemical Safety and Environmental Health (OSCEH) in the Department of Health and Ageing advised the APVMA that exposure to carbendazim and compounds that can form it (namely, benomyl and thiophanate-methyl) could possibly cause developmental abnormalities in experimental animals and hence might pose a potential public and occupational health and safety risk. For this reason the APVMA began a review of thiophanate-methyl in 2007.

As part of this review it was found that, unlike benomyl and carbendazim, thiophanate-methyl does not induce birth defects in laboratory animals following force-feeding of large doses, and appears to undergo only very limited metabolic conversion to carbendazim in animals. The APVMA has completed the reconsideration of thiophanate-methyl, taking this advice into account.

Following the finalisation of its reconsideration of thiophanate-methyl, the APVMA is satisfied that the active constituent thiophanate-methyl (listed in Table 1) meets the requirements for continued approval. As a result, the active constituent approval for thiophanate-methyl is affirmed.

Table 1: Active constituent approval for thiophanate-methyl

Approval No.	Active Constituent Name	Approval Holder
44214	Thiophanate-methyl	Mitsui and Co (Australia) Ltd

The APVMA is also satisfied that the label particulars can be varied, in accordance with s.34(5) of the Agvet Codes, so that the amended product labels (Table 2) contain adequate instructions.

The APVMA is satisfied that the labels of products listed in Table 2 have been varied and that the products carrying varied label particulars meet the prescribed requirements for continued registration. Previously approved labels (also listed in Table 2) have been cancelled.

Table 2: Label approvals to be cancelled or varied, and new label approval numbers

* This label approval includes all registered pack sizes

Product No.	Product Name	Registrant	Label Approval No. to be Varied or Cancelled	New Label Approval Number
53163	Banrot 80G Broad Spectrum Fungicide for Ornamentals	Scotts Australia Pty Ltd	53163/5kg/1007 53163/12kg/1007 53163/18.14kg/1007 53163/0601	53163/1110* Cancelled
53760	Zyban WP Broad Spectrum Fungicide for Ornamental Plants	Scotts Australia Pty Ltd	53760/0803 53760/0602	53760/1110 Cancelled

On this basis the APVMA is satisfied that continued registration of these products in accordance with their instructions for use would:

- not be an undue hazard to the safety of people exposed to it during its handling
- not be likely to have an effect that is harmful to human beings

and therefore has affirmed the product registrations and new label approvals.

The detailed reasons for these reconsiderations can be found in the APVMA Final Review Report and Regulatory Decision. Copies of the report or further information can be obtained from the APVMA website, www.apvma.gov.au or by request to the Chemical Review Contact Officer on (02) 6210 4700 or chemrev@apvma.gov.au.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and E of the Agvet Code, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.

APPLICATION SUMMARIES PUBLISHED SINCE THOSE PUBLISHED IN APVMA GAZETTE NO. 21, 26 OCTOBER 2010.

Application No.	Name
44335	SAINT BERNARD PETCARE DOG & CAT REPELLENT GRANULES
44509	TERM-SEAL URA-FEN MAJOR TERMITE BARRIER PART B
