The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to subsection 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website, www.apvma.gov.au/node/10761

If you would like to receive email notification when a new edition is published, please subscribe on the APVMA website.

Erratum Notice

The Australian Pesticides and Veterinary Medicines Authority advises that an error was published in the Commonwealth of Australia Gazette for Agricultural and Veterinary Chemicals, No. APVMA 13, 1 July, 2014.

In the Notice for Kelpie Amine 625 Herbicide, the incorrect active constituent was listed. The active constituent was listed as '2,4-D PRESENT AS THE DIMETHYLETHANOLAMINE SALT AND DIMETHANOLAMINE SALTS' rather than '2,4-D PRESENT AS THE DIMETHYLAMINE AND DIETHANOLAMINE SALTS'.

The correct entry for the Notice of Registration for Kelpie Amine 625 Herbicide appears on page 4 of this Gazette.

The Australian Pesticides and Veterinary Medicines Authority advises that an error was published in the Commonwealth of Australia Gazette for Agricultural and Veterinary Chemicals, No. APVMA 6, 25 March, 2014.

In the Notice for Cheminova Pirimicarb WG Aphicide, there was a spelling error in the product name. The product name was listed as 'CHEMINOVOA PIRIMICARB WG APHICIDE' rather than 'CHEMINOVA PIRIMICARB WG APHICIDE'.

The correct entry for the Notice of Registration for Cheminova Pirimicarb WG Aphicide, appears on page 11 of this Gazette.

The active constituent approval suspension is in effect from 14 July 2014 until 14 February 2015.

The product and label suspensions apply as a consequence of the decision to continue the suspension of quintozone active constituent approval and are in effect from 14 July 2014 until 14 February 2015.

BASIS FOR THE CONTINUATION OF THE SUSPENSION

The APVMA became aware of information in 2009 indicating the presence of undeclared dioxins as impurities in products that contain quintozone as the active constituent. On this basis, the APVMA suspended quintozone active approvals effective from 9 April 2010 until 14 July 2014. The APVMA has decided to continue this suspension for a further 7 months until 14 February 2015.

Dioxins are listed as toxicologically significant impurities in the *Definition of Standards for Active Constituents* (see <http://apvma.gov.au/node/10706>). The presence of any impurity that is listed as toxicologically significant is a matter that the APVMA considers to be a relevant particular to the approval of an active constituent.

An active constituent approval is not supportable unless any known impurities of toxicological significance have been adequately evaluated. An impurity that is present at levels above 1 g/kg should be declared and evaluated, and toxicologically significant impurities in the active constituent should be declared when present, regardless of the level present.

The APVMA considers that the active constituent quintozone may be an undue hazard to the safety of people exposed to it during its handling and may have an effect that is harmful to human beings. A full assessment of the dioxin impurities has not been conducted in accordance with section 14 of the Agvet Code Act. On this basis the APVMA has concluded that it cannot allow the active constituent to be supplied and used in chemical products when it contains undeclared dioxins. Consequently, the APVMA has suspended the approvals of quintozone active constituents.

The Agvet Code provides that if the APVMA suspends the only approval, or all the approvals, of an active constituent for an existing chemical product, it must also suspend any registration of that product. In addition, if the APVMA suspends the registration of a chemical product, it may also suspend any approval relating to a label for containers for the product.

IMPACT ON PRODUCT REGISTRANTS

Suspension action is based on the concern that undeclared dioxins may be present in quintozone active constituents and formulated products.

INSTRUCTIONS FOR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS

Unless authorised by the APVMA, the following instructions apply to persons having possession or custody of stocks, and are considering using or otherwise dealing with suspended active constituent and product during the period of suspension.

INSTRUCTIONS FOR POSSESSING, HAVING CUSTODY OF, USING OR DEALING WITH SUSPENDED ACTIVE CONSTITUENTS AND PRODUCTS

Possession and custody

Possession and custody of existing stocks of quintozone active constituent and/or products is permitted.

Supply

No supply of the active constituent quintozone and/or any product that contains it as an active constituent is permitted.

Use

No use of suspended product containing quintozone is permitted.

Any person who possesses or has custody of, or otherwise deals with the active constituents or products listed in Tables 1 and 2 (above) in accordance with the instructions in this notice is taken to have been issued with a permit to possess, have custody of, or deal with the active constituents or products during the period of suspension or until further notice.

WARNING

A person must not possess with the intent to supply, or deal with any materials containing quintozone during this period, except in accordance with the instructions contained in this notice. A failure to comply with these instructions will result in an offence against the Agvet Codes and the APVMA will take appropriate compliance action. It is an offence for any person to possess with the intent to supply, use or deal with the active constituent after 9 April 2010 unless authorised to do so by the APVMA. Similarly, it is an offence for any person to possess with the intent to supply, use or deal with quintozone products after 9 April 2010, unless authorised to do so by the APVMA.

Application Summaries

The APVMA publishes complete application summaries on the APVMA website, www.apvma.gov.au. They are published in weekly instalments using the date the application was accepted for assessment. If an application summary has been amended, the APVMA will publish the amended version on the website and list it separately in the APVMA Gazette Notice for Application Summaries.

As a requirement of Regulations 8C and 8E of the Agvet Code regulations as in force prior to 1 July 2014, some product names will appear as 'NOT AVAILABLE'.

A summary will be removed from the website 28 days after the application has been finalised. Therefore, some summaries published in this notice may have already been removed prior to the Gazette being published.
