## **New agricultural active constituent: Hydroxypropyl methylcellulose**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, hydroxypropyl methylcellulose, for use in agricultural products as an insecticide. This is an active constituent which has not previously been used in agricultural chemicals in Australia, although it is used as an emulsifier and thickener in the food industry, and in pharmaceuticals.

<b>Common name:</b>	Hydroxypropyl methylcellulose
<b>IUPAC name:</b>	2-Hydroxypropyl methyl cellulose ether
<b>Chemical abstracts name:</b>	Cellulose, 2-hydroxypropyl methyl ether
<b>CAS number:</b>	9004-65-3
<b>Molecular formula and molecular weight:</b>	Unspecified, as it is a polymer, and the degree of methylation and hydroxypropylation can be varied
<b>Structure:</b>	Partly O-methylated and O-(2-hydroxypropylated) cellulose
<b>Chemical family:</b>	Derivatised cellulose
<b>Mode of action:</b>	Acts as a sticky mesh-forming trap to mechanically immobilise target insects

### **SUMMARY OF THE APVMA'S EVALUATION**

The APVMA has evaluated the specifications of hydroxypropyl methylcellulose active constituent and found them to be acceptable.

The active constituent hydroxypropyl methylcellulose is manufactured to the standard of the United States Pharmacopoeia (USP) monograph.

The APVMA has considered the toxicological aspects of hydroxypropyl methylcellulose, and concluded that there are no toxicological concerns to the approval of this active constituent. The APVMA has not established an Acceptable Daily Intake (ADI) or an Acute Reference Dose (ARfD) for hydroxypropyl methylcellulose. Hydroxypropyl methylcellulose is used as an emulsifier and thickener in the food industry. As such, it has been evaluated by the FAO/WHO Joint Expert Committee on Food Additives (JECFA), along with other modified celluloses, and assigned a group ADI as 'not specified'.

Hydroxypropyl methylcellulose is covered by the entry for hydroxypropyl cellulose in Appendix B of the Standard for the Uniform Scheduling of Medicines and Poisons (SUSMP).

The APVMA is satisfied that the proposed use of hydroxypropyl methylcellulose would not be an undue hazard to the safety of people exposed to it during its handling and use.

<b>Common name:</b>	Zinc borate (2ZnO.3B <sub>2</sub> O <sub>3</sub> .3.5H <sub>2</sub> O)
<b>Descriptive name:</b>	Adduct of zinc oxide, diboron trioxide, and water (in a 4:6:7 molar ratio)
<b>Chemical abstracts name:</b>	Boron zinc hydroxide oxide
<b>Synonyms:</b>	Zinc borate 2335, zinc boron oxide hydrate
<b>CAS number:</b>	138265-88-0
<b>Molecular formula:</b>	B <sub>12</sub> H <sub>14</sub> O <sub>29</sub> Zn <sub>4</sub>
<b>Molecular weight:</b>	869.3 gmol <sup>-1</sup>

Impurities of toxicological significance are not expected to occur in zinc borate (2ZnO.3B<sub>2</sub>O<sub>3</sub>.3.5H<sub>2</sub>O) as a result of the raw materials and the synthetic route used.

The APVMA has considered the toxicological aspects of zinc borate (2ZnO.3B<sub>2</sub>O<sub>3</sub>.3.5H<sub>2</sub>O), and concluded that there are no toxicological concerns regarding the approval of this active constituent. Neither an Acceptable Daily Intake (ADI) nor an Acute Reference Dose (ARfD) have been established as no food producing uses are proposed.

Zinc borate (2ZnO.3B<sub>2</sub>O<sub>3</sub>.3.5H<sub>2</sub>O) is covered by the entry for zinc borate in Schedule 6 of the Poison Standard.

The following active constituent standard is proposed for zinc borate (2ZnO.3B<sub>2</sub>O<sub>3</sub>.3.5H<sub>2</sub>O):

Component	Limit

## **New chemical product: Borogard ZB Wood Preservative containing zinc borate**

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for registration of a new product, Borogard ZB Wood Preservative containing a new active constituent, zinc borate.

### **PARTICULARS OF THE APPLICATION**

<b>Proposed product name(s):</b>	Borogard ZB Wood Preservative
<b>Applicant company:</b>	US Borax Inc
<b>Name of active constituent:</b>	Zinc borate
<b>Signal heading:</b>	Schedule 6
<b>Summary of proposed use:</b>	For use in the manufacture of reconstituted wood products to give protection from wood borer, termites, and fungal decay.
<b>Pack sizes:</b>	25 kg and 1134 kg
<b>Withholding period:</b>	N/A

### **SUMMARY OF THE APVMA'S EVALUATION OF BOROGARD ZB WOOD PRESERVATIVE IN ACCORDANCE WITH THE REQUIREMENTS OF SECTION 14(1)(C) OF THE AGRICULTURAL AND VETERINARY CHEMICALS CODE (THE 'AGVET CODE'), SCHEDULED TO THE *AGRICULTURAL AND VETERINARY CHEMICALS CODE ACT 1994***

1. The APVMA has evaluated the application and in its assessment in relation to whether the safety criteria have been met in accordance with the definition set out in section 5A of the Agvet Code, and proposes to determine that:

- (i) The APVMA is satisfied that the proposed use of Borogard ZB Wood Preservative a new active constituent, zinc borate, would not be an undue hazard to the safety of people exposed to it during its handling and use.

The APVMA has conducted a risk assessment on the product and concluded that it can be used safely. Noting the use of the product is in non-food producing situations, an ADI and ARfD have not been set for the active constituent.

- (ii) The APVMA is satisfied that the proposed use of Borogard ZB Wood Preservative will not be an undue hazard to the safety of people using anything containing its residues.

The proposed product is for use in the manufacture of reconstituted wood products; it will not be used on crops or in any food-producing situations. The APVMA has considered the potential for exposure to residues in treated wood and determined that the product can be used safely when the label instructions are followed.

2. The APVMA is satisfied that the proposed use of Borogard ZB Wood Preservative is not likely to be harmful to human beings if used according to the product label directions.

- (i) The APVMA is satisfied that the proposed use of Borogard ZB Wood Preservative would not be likely to have an unintended effect that is harmful to animals, plants or things or the environment.

The APVMA has considered the available environmental fate and effects data in support of the proposed use and has concluded that the risks to the environment are acceptable. The proposed use in outdoor ground situations is not expected to result in local soil concentrations above natural background concentrations of boron or zinc when

treated wood composite is used in service. In addition, exposure of surface water is expected to be negligible because treated wood composite is not a suitable material for use in aquatic areas (such as bridges or decking).

3. The APVMA has evaluated the application and in its assessment in relation to whether the efficacy criteria have been met in accordance with the definition set out in section 5B of the Agvet Code, and proposes to determine that:
  - (i) In relation to its assessment of efficacy under section 14(3)(f), the APVMA is satisfied that data from trials supporting the efficacy of the product adequately demonstrate that if used according to the product label directions, the product is effective for its proposed uses.
4. The APVMA has evaluated the application and in its assessment in relation to whether the trade criteria have been met in accordance with the definition set out in section 5C of the Agvet Code, and proposes to determine that:
  - (i) The APVMA is satisfied that the proposed use of Borogard ZB Wood Preservative would not adversely affect trade between Australia and places outside Australia as the product is not for use in food crops or animals producing any major Australian export commodities.

## **MAKING A SUBMISSION**

In accordance with section 13 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether Borogard ZB Wood Preservative should be registered. Submissions should relate only to matters that are required by the APVMA to be taken into consideration in determining whether the safety, efficacy or trade criteria have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within **28 days** of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

Relevant comments will be taken into account by the APVMA in deciding whether the product should be registered and in determining appropriate conditions of registration and product labelling.

When making a submission please include:

- contact name
- company or group name (if relevant)
- email or postal address
- the date you made the submission.

All personal and confidential commercial information (CCI) material contained in submissions will be treated confidentially.
