## **Inclusion of Active Constituent Approvals and Product Registrations in current Reconsiderations**

The APVMA, in accordance with subsection 31(1) of the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code), has initiated a reconsideration of the active constituent approvals and product registrations listed in Attachment 1.

The basis for initiating these reconsiderations is concerns, as set out in Attachment 1, about whether or not the active constituents and products continue to meet the safety criteria.

The active constituents and products in Attachment 1 were approved or registered after the commencement of the corresponding chemical reviews listed in Attachment 2. These active constituents and products had not been placed under formal reconsideration previously. Instead, these approvals and registrations were granted with a condition providing that they would be subject to the outcomes of the corresponding chemical review.

From 1 July 2015, new legislative requirements became applicable to all reconsiderations. These requirements include the preparation of a work plan for each reconsideration and that each reconsideration must be completed within the timeframe prescribed by the regulations.

The APVMA has published the work plans along with the prescribed timeframes on its website for all the reconsiderations currently in progress. This provides improved transparency around the chemical review process and the facilitation of certainty around the timing of review decisions.

In order to apply all the legislative requirements uniformly to all the approvals and registrations when the corresponding chemical is under review, from 1 July 2015, the APVMA will cease the practice of placing a condition at the time of granting the approval or registration, providing that they would be subject to the outcomes of the corresponding chemical review. Instead, it will reconsider the new approvals and registrations under subsection 31(1) of the Agvet Code.

Further details about the APVMA chemical review program or details of individual chemical reviews can be obtained from the APVMA website [www.apvma.gov.au](http://www.apvma.gov.au) or by request to the Chemical Review Liaison Officer on +61 2 6210 4700 or [chemicalreview@apvma.gov.au](mailto:chemicalreview@apvma.gov.au).

## Reconsideration of Active Constituents, Registrations and Label Approvals related to Fenamiphos

The APVMA, in accordance with Part 2, Division 4, of the Agricultural and Veterinary Chemicals Code Act 1994 (Agvet Code), has reconsidered all approvals of the active constituent fenamiphos, registrations of all products containing fenamiphos, and the approvals of all associated product labels. This notice is published in accordance with paragraphs 34AC(1)(b) and 45A(1)(b) of the Agvet Code.

Fenamiphos is an organophosphorus nematicide and insecticide widely used in agriculture to control soil-borne pests and sucking insects.

The active constituent fenamiphos, all products containing fenamiphos and their associated labels were placed under review in 2003 because of concerns over its toxicity, occupational health and safety (OHS), residues in food (including dietary exposure) environmental and trade aspects.

A preliminary review findings report was released for public comment in February 2013. The report identified that some uses of fenamiphos products may pose an undue risk to the environment and public health. The proposed outcome was that all products would be cancelled as no use could be supported on all grounds (toxicology, OHS, residues, environment and trade aspects).

After consideration of all data including the advice received by the advising agencies (the Office of Chemical Safety in the Department of Health and the Chemical Assessment Section in the Department of the Environment) and consideration of submissions from industry and the public, the APVMA has now completed the reconsideration of the active constituent approvals of fenamiphos, registrations of all products containing fenamiphos and the approvals of all associated product labels.

Following the finalisation of its reconsideration of fenamiphos, the APVMA is satisfied that active constituent approvals for fenamiphos listed in Table 1 meet the safety criteria. As a result, the APVMA has affirmed the active constituent approvals for fenamiphos in accordance with subsection 34(1) of the Agvet Code.

The APVMA could not be satisfied that the chemical products listed in Tables 2 and 3 met the safety criteria and trade criteria and therefore the APVMA could not affirm those products. However, under subsection 34A(1) of the Agvet Code, the APVMA was satisfied that the relevant particulars of label approvals for the labels listed in Table 2 could be varied in such a way as to allow the registration of products listed in Column B of Table 2 to be affirmed. As a result, the APVMA has varied the relevant particulars for the label approvals for the products listed in Column B of Table 2 in accordance with the outcomes contained in the Fenamiphos Review Findings Report and Regulatory Decision (July 2015). The APVMA has consequently affirmed the registration of those products when used in accordance with the new label approval numbers listed in Column D of Table 2 under subsection 34(1) of the Agvet Code. The APVMA is also satisfied that the label approvals, listed in Column D of Table 2, meet the labelling criteria for the purposes of subsection 34(1)(c) of the Agvet Code.

### CANCELLATION OF PRODUCT REGISTRATION AND LABELS

As an outcome of the review, the registration of one product containing fenamiphos, and its associated label approvals listed in Table 3, have been cancelled. Implementing the review findings in order for this particular product to meet the safety criteria, trade criteria and efficacy criteria resulted in the approved label containing no remaining uses. As a consequence, the APVMA cannot vary the product labels in such a way as to allow the registration to be affirmed. The APVMA has therefore cancelled the product registration and associated label approvals under subsection 34AA(1) of the Agvet Code.

The APVMA has also cancelled the approvals of all previously approved product labels (for label approval numbers listed in Table 2, column D) from 23 July 2015, as they do not meet the labelling criteria as required under paragraph 34(1)(c) of the Agvet Code.

The APVMA has issued instructions for the possession, supply and use of cancelled product or registered product bearing a cancelled label until 23 July 2016 as noted below.
