The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

## GENERAL INFORMATION

The *APVMA (Australian Pesticides and Veterinary Medicines Authority) Gazette* is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

## DISTRIBUTION AND SUBSCRIPTION

The *APVMA Gazette* is published in electronic format only and is available from the APVMA website,

## New Active Constituent Pyriofenone

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, pyriofenone.

<b>Common Name:</b>	Pyriofenone
<b>IUPAC Name:</b>	<i>5-chloro-2-methoxy-4-methylpyridin-3-yl 2,3,4-trimethoxy-6-methylphenyl ketone</i>
<b>CAS Name:</b>	<i>(5-chloro-2-methoxy-4-methyl-3-pyridinyl)(2,3,4-trimethoxy-6-methylphenyl)methanone</i>
<b>CAS Registry Number:</b>	688046-61-9
<b>Manufacturer's Code:</b>	IKF-309
<b>Minimum Purity:</b>	965 g/kg
<b>Molecular Formula:</b>	C <sub>18</sub> H <sub>20</sub> ClNO <sub>5</sub>
<b>Molecular Weight:</b>	539.52
<b>Structure:</b>	

<b>Chemical Family:</b>	aryl phenyl ketone
<b>Mode of Action:</b>	Fungicide

### SUMMARY OF THE APVMA'S EVALUATION OF PYRIOFENONE ACTIVE CONSTITUENT

The Scientific Assessment and Chemical Review Program of the APVMA has evaluated the chemistry aspects of pyriofenone active constituent (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for pyriofenone active constituent:

Constituent	Specification	Level
Pyriofenone	Pyriofenone	Not less than 965 g/kg

Compounds of toxicological significance are not expected to occur in Pyriofenone TGAC as a result of the raw materials and the synthetic route used.

The Office of Chemical Safety has considered the toxicological aspects of pyriofenone TGAC, and advised that there are no toxicological objections to the approval of this chemical.

An Acceptable Daily Intake (ADI) of 0.09 mg/kg bw/d has been set, based on a No-Observed Effect Level (NOEL) of 9 mg/kg bw/d in both a 1 and 2-year dietary study, after applying a 100 fold safety factor (consisting of a 10-fold safety factor for both intra- and inter-species variation).

An Acute Reference Dose (ARfD) was not established and is not necessary, based on the low acute toxicity profile of pyriofenone and the results of available repeat dose toxicity, genotoxicity and reproductive/developmental studies that indicate pyriofenone is unlikely to present an acute hazard to humans after single dose administration.

Based on the toxicity profile, it was recommended to the Chemicals Scheduling Delegate (the Delegate) of the Secretary of the Department of Health that consideration be given to including pyriofenone in Schedule 6 of the Poisons Standard with no cut offs.

The Advisory Committee on Chemicals Scheduling (ACCS) considered pyriofenone to be appropriate for inclusion in Schedule 6 of the Poisons Standard at the meeting of 28 October 2014 with the implementation date of 1 February 2015.

The OCS has not specified toxicologically significant impurities for the technical grade active constituent.

The APVMA accepts the findings and recommendations of its advisers on these criteria.

The APVMA is satisfied that the proposed importation and use of pyriofenone would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

## MAKING A SUBMISSION

In accordance with sections 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of pyriofenone should be granted. Submissions should relate only to matters that are considered in determining whether the safety criteria set out in section 5A of the Agvet Code have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

When making a submission please include a:

- contact name
- company or group name (if relevant)
- email or postal address
- date you made the submission.

All personal and *confidential commercial information (CCI)*<sup>1</sup> material contained in submissions will be treated confidentially.

Written submissions should be addressed in writing to:

## New Active Constituent Momfluorothrin

The Australian Pesticides and Veterinary Medicines Authority (APVMA) has before it an application for the approval of a new active constituent, momfluorothrin for use as an insecticide.

<b>Common Name:</b>	Momfluorothrin
<b>IUPAC Name:</b>	2,3,5,6-tetrafluoro-4-(methoxymethyl)benzyl (EZ)-(1R,3R;1R,3SR)-3-(2-cyanoprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate
<b>CAS Name:</b>	[2,3,5,6-tetrafluoro-4-(methoxymethyl)phenyl] methyl 3-(2-cyano-1-propen-1-yl)-2,2-dimethylcyclopropanecarboxylate
<b>CAS Registry Number:</b>	609346-29-4
<b>Manufacturer's Code:</b>	S-1563
<b>Minimum Purity:</b>	930 g/kg
<b>Molecular Formula:</b>	C <sub>19</sub> H <sub>19</sub> F <sub>4</sub> NO <sub>3</sub>
<b>Molecular Weight:</b>	385.35

**Structure:**

<b>Chemical Family:</b>	synthetic pyrethroid
<b>Mode of Action:</b>	insecticide

### SUMMARY OF THE APVMA'S EVALUATION OF MOMFLUOROTHRIN ACTIVE CONSTITUENT

The Scientific Assessment and Chemical Review Program of the APVMA has evaluated the chemistry aspects of momfluorothrin active constituent (manufacturing process, quality control procedures, batch analysis results and analytical methods) and found them to be acceptable.

On the basis of the data provided, and the toxicological assessment, it is proposed that the following APVMA Active Constituent Standard be established for momfluorothrin active constituent:

Constituent	Specification	Level
Momfluorothrin	Momfluorothrin	Not less than 930 g/kg, comprising of 2,3,5,6-tetrafluoro-4-(methoxymethyl)benzyl (Z)-(1R,3R)-3-(2-cyanoprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate; RTZ isomer and 2,3,5,6-tetrafluoro-4-(methoxymethyl)benzyl (E)-(1R,3R)-3-(2-cyanoprop-1-enyl)-2,2-dimethylcyclopropanecarboxylate; RTE isomer at an approximate ratio of 9:1 respectively.

Compounds of toxicological significance are not expected to occur in momfluorothrin TGAC as a result of the raw materials and the synthetic route used.

The Office of Chemical Safety has considered the toxicological aspects of momfluorothrin TGAC, and advised that there are no toxicological objections to the approval of this active constituent.

An ADI and ARfD for momfluorothrin have not been set as momfluorothrin is not proposed for food-producing uses at this time.

Momfluorothrin was referred to the Delegate of the Secretary of the Department of Health for scheduling consideration. Subsequently, the Delegate referred the application to the Advisory Committee for Chemicals Scheduling (ACCS) for advice in August 2015. The ACCS recommended inclusion of momfluorothrin in Schedule 6. The reasons for the recommendation were that the toxicity of momfluorothrin was consistent with Schedule 6 factors.

On 19 November 2015 the Delegate to the Secretary of the Department of Health accepted the advice from the ACCS and published a final scheduling decision to create a new Schedule 6 listing of momfluorothrin in the Poisons Standard index of the SUSMP. The delegate confirmed the proposed implementation date of 1 February 2016.

The OCS has not specified any toxicologically significant impurities in technical grade momfluorothrin.

The APVMA accepts the findings and recommendations of its advisers on these criteria.

The APVMA is satisfied that the proposed importation and use of momfluorothrin would not be an undue toxicological hazard to the safety of people exposed to it during its handling and use.

## MAKING A SUBMISSION

In accordance with section 12 of the Agvet Code, the APVMA invites any person to submit a relevant written submission as to whether the application for approval of momfluorothrin should be granted. Submissions should relate only to matters that are considered in determining whether the safety criteria set out in section 5A of the Agvet Code have been met. Submissions should state the grounds on which they are based.

Submissions must be received by the APVMA within 28 days of the date of this notice and be directed to the contact listed below. All submissions to the APVMA will be acknowledged in writing via email or by post.

## **Inclusion of Active Constituent Approvals and Product Registrations in current Reconsiderations**

The APVMA, in accordance with subsection 31(1) of the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code), has initiated a reconsideration of the active constituent approvals and product registrations listed in Attachment 1. These active constituents and products were approved or registered after the commencement of the original reconsideration.

From 1 July 2015, new legislative requirements became applicable to all reconsiderations. These requirements include the preparation of a work plan for each reconsideration and that each reconsideration must be completed within the timeframe prescribed by the regulations.

The APVMA has published the work plans along with the prescribed timeframes on its website for all the reconsiderations currently in progress.

In order to apply all the legislative requirements uniformly to all the approvals and registrations when the corresponding chemical is under review, the APVMA will cease the practice of placing a condition at the time of granting the approval or registration, providing that they would be subject to the outcomes of the corresponding chemical review. Instead, it will reconsider the new approvals and registrations under subsection 31(1) of the Agvet Code.

Further details about the APVMA chemical review program or details of individual chemical reviews can be obtained from the APVMA website [www.apvma.gov.au](http://www.apvma.gov.au) or by request to the Chemical Review Liaison Officer on +61 2 6210 4749 or [chemicalreview@apvma.gov.au](mailto:chemicalreview@apvma.gov.au).

### Cancellation of Registration at the Request of the Holder

At the request of the holder, the APVMA has cancelled the registration and the associated label approvals of the following product:

Product no.	Product name	Approval holder	Date of effect
54128	INTERNATIONAL TRILUX HARD ANTIFOULING FOR ALUMINIUM	AKZO NOBEL PTY LIMITED	17 May 2016

The following instructions set out how a person can deal with the cancelled product.

#### SUPPLY

A person may supply or cause to be supplied product manufactured prior to 17 May 2016 at wholesale and retail level, until the 17 May 2017.

After 17 May 2017 it will be an offence against the Agvet Codes to have possession or custody of the product with the intention to supply, or to supply the product.

#### USE

A person may continue to use the product according to its label instructions until 17 May 2017.

Any person who possesses, has custody of, uses, or otherwise deals with the listed product in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the product after the registration has been cancelled until 17 May 2017.

The supply and use of the product must be in accordance with the conditions of registration or approval, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the product listed in the table in a manner that contravenes the above instructions.

### SUPPLY

A person may supply or cause to be supplied product bearing a cancelled label manufactured prior to 17 May 2016 at wholesale and retail level, until 17 May 2017.

After 17 May 2017 it will be an offence against the Agvet Codes to have possession or custody of the product bearing a cancelled label with the intention to supply, or to supply the product bearing a cancelled label.

### USE

A person may continue to use the product bearing a cancelled label according to its label instructions until 17 May 2017.

Any person who possesses, has custody of, uses, or otherwise deals with the listed product bearing a cancelled label in accordance with the above instructions is taken to have been issued with a permit under the Agvet Codes to so possess, have custody of, use or otherwise deal with the product bearing a cancelled label after the approval has been cancelled until 17 May 2017.

The supply and use of the product bearing a cancelled label must be in accordance with the conditions of registration or approval, including any conditions relating to the shelf life or expiry date.

It is an offence to possess, have custody of, use, or deal with the product bearing a cancelled label listed in the table in a manner that contravenes the above instructions.

## Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) 2012*. The *MRL Standard* lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The *MRL Standard* also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the *MRL Standard* and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the *Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2016 (No. 7)*.

The amendments will be incorporated into the compilation of the [Agricultural and Veterinary Chemicals Code Instrument No. 4 \(MRL Standard\) 2012](#).

The *MRL Standard* is accessible via the ComLaw website [www.comlaw.gov.au](http://www.comlaw.gov.au) or the links above.

### **Proposal to amend Schedule 20 in the *Australia New Zealand Food Standards Code***

In the previous notice, the APVMA gazetted amendments which it has approved varying maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in the APVMA's *MRL Standard*, have been made.

Under section 82 of the *Food Standards Australia New Zealand Act 1991*, the APVMA is proposing to incorporate those variations (*Agricultural and Veterinary Chemicals Code Instrument No. 4 (MRL Standard) Amendment Instrument 2016 (No. 7)*) to MRLs into Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standards Code*.

MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and FSANZ are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) will make a Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO).

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Schedule 20 in the *APVMA Gazette*. The variations will take effect as from the date of that subsequent notice.

**PROPOSED AMENDMENT (AGRICULTURAL AND VETERINARY CHEMICALS CODE INSTRUMENT NO. 4 (MRL STANDARD) AMENDMENT INSTRUMENT 2016 (NO. 7))**

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments, but are not subject to disallowance or sunseting.

## INVITATION FOR SUBMISSIONS

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standards Code*. Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA. Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials, surveys etc. Technical information should be in sufficient detail to allow independent scientific assessment.

Please note that FSANZ will make a SPS notification to the WTO and submissions related to impacts on international trade should be made to FSANZ in response to that notification.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Schedule 20' and quote the correct amendment number.

**DEADLINE FOR PUBLIC SUBMISSIONS: 6 pm (AEST) 28 June 2016**

**SUBMISSIONS RECEIVED AFTER THIS DEADLINE WILL ONLY BE CONSIDERED BY PRIOR ARRANGEMENT**

Submissions received after this date will only be considered if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

## Variations to Schedule 20 of the Australia New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA *MRL Standard* and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Schedule 20—Maximum Residue Limits of the *Australia New Zealand Food Standards Code*. This notice pertains to proposals (No. 3) gazetted on 8 March 2016 (No. APVMA 5).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Schedule 20. A copy of the Amendment Instrument (No. APVMA 5, 2016) accompanies this notice. For a complete and up-to-date version of Schedule 20, including these amendments together with their Explanatory Statement, please refer to the Federal Register of Legislative Instrument available on the Comlaw website at [www.comlaw.gov.au](http://www.comlaw.gov.au).

Based on dietary exposure assessments and current health standards, the APVMA and FSANZ are satisfied that these MRLs are not harmful to public health. MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The Agreement between the Government of Australia and the Government of New Zealand concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

Food Standards Australia New Zealand (FSANZ) made Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) in relation to these variations and no comment was received in response to that notice.

A copy of these variations have been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

***Australia New Zealand Food Standards  
Code—Schedule 20—Maximum residue  
limits Variation Instrument  
No. APVMA 5, 2016***

I, Rajumati Bhula, Executive Director, Scientific Assessment and Chemical Review and delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Rajumati Bhula  
Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary Medicines Authority

Dated this Twenty sixth day of May 2016

## Part 1 Preliminary

### 1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code—Schedule 20—Maximum residue limits Variation Instrument* No. APVMA 5, 2016.

### 2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette No. APVMA 11 of 31 May 2016.

### 3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

### 4 Interpretation

In this instrument: —

**APVMA** means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

**Principal Instrument** means Schedule 20—Maximum residue limits in the *Australia New Zealand Food Standard Code* as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

## Part 2 Variations to Schedule 20—Maximum Residue Limits

### 5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

# Schedule

## Variations to Schedule 20—Maximum residue limits

[1] The table to section S20–3 in Schedule 20 is varied by

[1.1] omitting the chemical residue definition for Glyphosate and substituting the following

*Permitted residue: Sum of glyphosate, N-acetyl-glyphosate and aminomethylphosphonic acid (AMPA) metabolite, expressed as glyphosate*

[1.2] inserting for each of the following chemicals the foods and associated MRLs in alphabetical order

---

**Agvet chemical: acetamiprid**

*Permitted residue—commodities of plant origin:  
Acetamiprid*

*Permitted residue—commodities of animal origin:  
Sum of acetamiprid and N-demethyl acetamiprid  
(E)-N<sup>1</sup>-[(6-chloro-3-pyridyl)methyl]-N<sup>2</sup>-  
cyanoacetamide), expressed as acetamiprid*

---

Pome fruits	T0.5
-------------	------

---

---

**Agvet chemical: acibenzolar-S-methyl**

*Permitted residue: acibenzolar-S-methyl and all metabolites containing the benzo[1,2,3]thiadiazole-7-carboxyl moiety hydrolysed to benzo[1,2,3]thiadiazole-7-carboxylic acid, expressed as acibenzolar-S-methyl*

---

Tomato	1
--------	---

---

---

**Agvet chemical: boscalid**

*Permitted residue—commodities of plant origin:  
Boscalid*

*Permitted residue—commodities of animal origin:  
Sum of boscalid, 2-chloro-N-(4'-chloro-5-hydroxybiphenyl-2-yl) nicotinamide and the glucuronide conjugate of 2-chloro-N-(4'-chloro-5-hydroxybiphenyl-2-yl) nicotinamide, expressed as boscalid equivalents*

---

Adzuki bean	T3
-------------	----

---

---

**Agvet chemical: clothianidin**

*Permitted residue: clothianidin*

---

Common bean (dry) (navy bean)	T0.1
Mung bean (dry)	T0.1

---

---

**Agvet chemical: flonicamid**

Permitted residue: flonicamid [N-(cyanomethyl)-4-(trifluoromethyl)-3-pyridinecarboxamide] and its metabolites TFNA [4-trifluoromethylnicotinic acid], TFNA-AM [4-trifluoromethylnicotinamide] TFNG [N-(4-trifluoromethylnicotinoyl)glycine]

---

Tomato	T0.5
--------	------

---

---

**Agvet chemical: metalaxyl**

Permitted residue: metalaxyl

---

Walnuts	T0.3
---------	------

---

---

**Agvet chemical: metsulfuron-methyl**

Permitted residue: metsulfuron-methyl

---

Mung bean (dry)	T0.2
-----------------	------

---

---

**Agvet chemical: pymetrozine**

Permitted residue: pymetrozine

---

Strawberry	T0.3
------------	------

---

---

**Agvet chemical: sulfoxaflor**

Permitted residue: sulfoxaflor

---

Pineapple	T0.1
Strawberry	T0.7

---

[1.3] omitting for each of the following chemicals, the maximum residue limit for the food and substituting

---

**Agvet chemical: acetamiprid**

Permitted residue—commodities of plant origin:  
 Acetamiprid

Permitted residue—commodities of animal origin:  
 Sum of acetamiprid and N-demethyl acetamiprid  
 ((E)-N<sup>1</sup>-[(6-chloro-3-pyridyl)methyl]-N<sup>2</sup>-cyanoacetamide), expressed as acetamiprid
