Agricultural and veterinary chemicals

No. APVMA 17, 23 August 2022

Published by the Australian Pesticides and Veterinary Medicines Authority

Australian Government

**Australian Pesticides and
Veterinary Medicines Authority**

The *Agricultural and Veterinary Chemical Code Act 1994* (the Act) commenced on 15 March 1995. The Agricultural and Veterinary Chemicals Code (the Agvet Code) scheduled to the Act requires notices to be published in the *Gazette* containing details of the registration of agricultural and veterinary chemical products and other approvals granted by the Australian Pesticides and Veterinary Medicines Authority. The Agvet Code and related legislation also requires certain other notices to be published in the *Gazette*. A reference to Agvet Codes in this publication is a reference to the Agvet Code in each state and territory jurisdiction.

General information

The APVMA Gazette is published fortnightly and contains details of the registration of agricultural and veterinary chemicals products and other approvals granted by the APVMA, notices as required by the Agricultural and Veterinary Chemicals Code (the Agvet Code) and related legislation and a range of regulatory material issued by the APVMA.

Pursuant to section 8J(1) of the Agvet Code, the APVMA has decided that it is unnecessary to publish details of applications made for the purpose of notifying minor variations to registration details. The APVMA will however report notifications activity in quarterly statistical reports.

Distribution and subscription

The APVMA Gazette is published in electronic format only and is available from the [APVMA website](#).

If you would like to subscribe to receive email notification when a new edition is published, please complete a [subscription form](#).

APVMA contacts

For enquiries regarding the publishing and distribution of the APVMA Gazette: Telephone: +61 2 6770 2300.

For enquiries on APVMA Gazette content, please refer to the individual APVMA contacts listed under each notice.

Agricultural chemical products and approved labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

Table 1: Agricultural products based on existing active constituents

Application no.	135349
Product name	Kelpie Diquat 200SL Herbicide
Active constituent/s	200 g/L diquat present as diquat dibromide monohydrate
Applicant name	Sinochem International Australia Pty. Ltd.
Applicant ACN	160 164 616
Date of registration	2 August 2022
Product registration no.	92386
Label approval no.	92386/135349
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 200 g/L diquat SL product for pre-harvest crop desiccation and the control of a wide range of broadleaf weeds in certain crops as per directions for use for application through aircraft and ground equipment

Application no.	135703
Product name	Akoprid 350 Insecticide
Active constituent	350 g/L imidacloprid
Applicant name	AAKO Australia Pty Ltd
Applicant ACN	122 279 109
Date of registration	3 August 2022
Product registration no.	92491
Label approval no.	92491/135703
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 350 g/L imidacloprid suspension concentrate product for the control of various insect pests of cotton, fruit, vegetables, ornamentals, and turf as a foliar spray and as a soil-applied treatment for the control of various canegrubs in sugarcane, certain pests in apples and citrus, and silverleaf whitefly in various vegetable crops and an injection treatment for control of certain pests in bananas

Application no.	131802
Product name	Genfarm Picolinafen 750 WG Herbicide
Active constituent	750 g/kg picolinafen
Applicant name	Nutrien Ag Solutions Limited
Applicant ACN	008 743 217
Date of registration	8 August 2022
Product registration no.	91313
Label approval no.	91313/131802
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 750 g/kg picolinafen herbicide for the control of wild radish in field peas and narrowleaf lupins

Application no.	131794
Product name	Optima Ant & Cockroach Granules
Active constituent	0.15 g/kg fipronil
Applicant name	Lifeguard Sciences (Pty) Ltd
Applicant ACN	N/A
Date of registration	10 August 2022
Product registration no.	91312
Label approval no.	91312/131794
Description of the application and its purpose, including the intended use of the chemical product	Registration and label approval of a 0.15 g/kg fipronil ready-to-use granular bait for the control of ants, cockroaches and crickets

Application no.	135497
Product name	Aquatic Elements Liquid Pool Chlorine
Active constituent	125 g/L available chlorine (Cl) present as sodium hypochlorite
Applicant name	Aquatic Elements Pty Ltd
Applicant ACN	134 196 679
Date of registration	11 August 2022
Product registration no.	92435
Label approval no.	92435/135497
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 125 g/L sodium hypochlorite product for the control of algae and bacteria in swimming pools

Table 2: Variations of registration

Application no.	136325
Product name	Nufarm 2,4-D Ester 680 Herbicide
Active constituent	680 g/L 2,4-D present as the 2-ethylhexyl ester
Applicant name	Nufarm Australia Limited
Applicant ACN	004 377 780
Date of variation	21 July 2022
Product registration no.	60938
Label approval no.	60938/136325
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from 'Nufarm Estercide Xtra 680 Herbicide' to 'Nufarm 2,4-D Ester 680 Herbicide'

Application no.	136355
Product name	Penncozeb 750 DF Fungicide
Active constituent	750 g/kg mancozeb
Applicant name	UPL Australia Pty Ltd
Applicant ACN	066 391 384
Date of variation	25 July 2022
Product registration no.	53987
Label approval no.	53987/136355
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to update the first aid instructions, safety directions and safety directions appearing on a label to reflect the current FAISD Handbook

Application no.	136356
Product name	Vendex Miticide
Active constituent	550 g/L fenbutatin oxide
Applicant name	UPL Australia Pty Ltd
Applicant ACN	066 391 384
Date of variation	25 July 2022
Product registration no.	68860
Label approval no.	68860/136356
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to update the first aid instructions and safety directions appearing on a label to reflect the current FAISD Handbook

Application no.	136374
Product name	Viraban Broad Spectrum Virucidal, Bactericidal and Fungicidal Powder Disinfectant
Active constituents	504 g/kg potassium peroxymonosulfate triple salt, 150 g/kg sodium dodecylbenzene sulphonate, 15 g/kg sodium chloride
Applicant name	Elanco Australasia Pty Ltd
Applicant ACN	076 745 198
Date of variation	26 July 2022
Product registration no.	65013
Label approval no.	65013/136374
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to update the first aid instructions and safety directions appearing on a label to reflect the current FAISD Handbook

Application no.	136389
Product name	Zoono Z-71 "Ready To Use" Poultry Guard Sanitiser and Protectant
Active constituent	0.67 g/L quaternary ammonium compound
Applicant name	Zoono Group Limited
Applicant ACN	006 645 754
Date of variation	27 July 2022
Product registration no.	89529
Label approval no.	89529/136389
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing name that appears on the label from 'YP VET 21 Surface Sanitiser and Protectant' to 'Xtend RTU Surface Sanitiser and Protectant'

Application no.	135369
Product name	Trio Prosulfocarb 800 EC Herbicide
Active constituent/s	800 g/L prosulfocarb
Applicant name	CTS Chemicals Pty Ltd
Applicant ACN	605 759 644
Date of registration	1 August 2022
Product registration no.	90161
Label approval no.	90161/135369
Description of the application and its purpose, including the intended use of the chemical product	Variation of product registration and label approval to update the constituent and mode of action label statements

Application no.	135291
Product name	Oxstar Herbicide Coated Fertiliser
Active constituent/s	10 g/kg oxadiazon
Applicant name	Turf Culture Pty Ltd
Applicant ACN	117 986 615
Date of variation	1 August 2022
Product registration no.	83464
Label approval no.	83464/135291
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration, label approval and label conditions to include a new label for home garden use

Application no.	134424
Product name	Genfarm Propyzamide 500 WG Selective Herbicide
Active constituent	500 g/kg propyzamide
Applicant name	Nutrien Ag Solutions Limited
Applicant ACN	008 743 217
Date of variation	2 August 2022
Product registration no.	66962
Label approval no.	66962/134424
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to add use pattern for control of certain grasses and broad leaf weeds in canola

Application no.	135361
Product name	Thermacell Zone Mosquito Repellent
Active constituent	43.8 g/L metofluthrin
Applicant name	Thermacell Repellents Inc.
Applicant ACN	N/A
Date of variation	3 August 2022
Product registration no.	89453
Label approval no.	89453/135361
Description of the application and its purpose, including the intended use of the chemical product	Variation of product registration and label approval to amend the net contents, update the constituent statements and make minor changes to the label

Application no.	136464
Product name	Nufarm Chlorthal-Dimethyl 900 Herbicide
Active constituent	900 g/kg chlorthal dimethyl
Applicant name	Nufarm Australia Limited
Applicant ACN	004 377 780
Date of variation	3 August 2022
Product registration no.	59137
Label approval no.	59137/136464
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to change the distinguishing product name and the name that appears on the label from 'Nufarm Dacthal 900 Pre-Emergence Herbicide' to 'Nufarm Chlorthal-Dimethyl 900 Herbicide'

Application no.	135454
Product name	KDPC Prethal 750WG Herbicide
Active constituent	750 g/kg chlorthal dimethyl
Applicant name	KD Plant Care Pty Ltd
Applicant ACN	134 592 804
Date of variation	4 August 2022
Product registration no.	67445
Label approval no.	67445/135454
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to add a grazing WHP and remove uses for perennial grasses and lucerne

Application no.	135460
Product name	Accensi Thiram/Thiabendazole Fungicidal Liquid Seed Dressing
Active constituents	360 g/L thiram, 200 g/L thiabendazole
Applicant name	Accensi Pty Ltd
Applicant ACN	079 875 184
Date of variation	5 August 2022
Product registration no.	64451
Label approval no.	64451/135460
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label to add use in peanuts for control of pre-emergence seedling rot (<i>Rhizopus spp.</i>) and seedling blight (<i>Aspergillus spp.</i>)

Application no.	135382
Product name	Palmero 750 WG Herbicide
Active constituent	750 g/kg isoxaflutole
Applicant name	ADAMA Australia Pty Ltd
Applicant ACN	050 328 973
Date of variation	5 August 2022
Product registration no.	68600
Label approval no.	68600/135382
Description of the application and its purpose, including the intended use of the chemical product	Variation to registration particular and label particulars to include use in fallow and to add the control of turnip weed in sugarcane

Application no.	135462
Product name	Tecto Flowable SC Fungicide
Active constituent	500 g/L thiabendazole
Applicant name	Syngenta Australia Pty Ltd
Applicant ACN	002 933 717
Date of variation	5 August 2022
Product registration no.	49910
Label approval no.	49910/135462
Description of the application and its purpose, including the intended use of the chemical product	Variation of product registration and label to add uses in sweet potato as part of the permit to label project

Application no.	135742
Product name	Lawthal 750WG Herbicide
Active constituent	750 g/kg chlorthal-dimethyl
Applicant name	Nutrien Ag Solutions Limited
Applicant ACN	008 743 217
Date of variation	5 August 2022
Product registration no.	83116
Label approval no.	83116/135742
Description of the application and its purpose, including the intended use of the chemical product	Variation of product registration and label approval to remove uses in lucerne and perennial grass pasture and to add the grazing restraint 'DO NOT graze any treated areas or cut for stock food'

Application no.	136503
Product name	Proleaf T Seed Treatment
Active constituents	150 g/L triadimenol, 4 g/L triflumuron
Applicant name	Arysta LifeScience Australia Pty Ltd
Applicant ACN	005 225 507
Date of variation	5 August 2022
Product registration no.	54162
Label approval no.	54162/136503
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to update the first aid instructions appearing on a label to reflect the current FAISD Handbook

Application no.	135435
Product name	Hemani Chlorthal 750 WG Herbicide
Active constituent	750 g/kg chlorthal dimethyl
Applicant name	Hemani Australia Pty Ltd
Applicant ACN	634 346 357
Date of variation	9 August 2022
Product registration no.	85327
Label approval no.	85327/135435
Description of the application and its purpose, including the intended use of the chemical product	To vary registration particulars and label to add a grazing WHP and delete uses for perennial grasses and lucerne

Application no.	133464
Product name	Electra 225 Insecticide
Active constituent	225 g/L methomyl (an anti-cholinesterase compound)
Applicant name	ADAMA Australia Pty Ltd
Applicant ACN	050 328 973
Date of variation	10 August 2022
Product registration no.	48910
Label approval no.	48910/133464
Description of the application and its purpose, including the intended use of the chemical product	Variation of product registration and label approval to extend the use in various additional crops/situations

Application no.	131481
Product name	Aduleth Termiticide
Active constituent/s	8.8 g/L bifenthrin
Applicant name	The White Ant Co. Pty. Ltd.
Applicant ACN	100 706 009
Date of variation	12 August 2022
Product registration no.	65633
Label approval no.	65633/131481
Description of the application and its purpose, including the intended use of the chemical product	Variation to the particulars of registration and label approval to update the label hazard and safety direction statements

Table 3: Variation of label approval

Application no.	135377
Product name	Farmalinx Clearview 200 GR Herbicide
Active constituent	200 g/kg tebuthiuron
Applicant name	Farmalinx Pty Ltd
Applicant ACN	134 353 245
Date of variation	5 August 2022
Product registration no.	69043
Label approval no.	69043/135377
Description of the application and its purpose, including the intended use of the chemical product	Variation to particulars of label, to vary the states in the directions for use table and add ground and aerial application

Application no.	135829
Product name	Imtrade Chemphos 400 Fungicide
Active constituent	400 g/L phosphonic acid
Applicant name	Imtrade Australia Pty Ltd
Applicant ACN	090 151 134
Date of variation	9 August 2022
Product registration no.	54077
Label approval no.	54077/135829
Description of the application and its purpose, including the intended use of the chemical product	Variation of label approval to add a timing restriction for use in grapes 'do not apply after E-L 33'

Application no.	135828
Product name	Imtrade Dominator 600 Fungicide
Active constituent	600 g/L phosphorous (phosphonic) acid as mono-di K phosphonate
Applicant name	Imtrade Australia Pty Ltd
Applicant ACN	090 151 134
Date of variation	10 August 2022
Product registration no.	56975
Label approval no.	56975/135828
Description of the application and its purpose, including the intended use of the chemical product	Variation of label approval to add a timing restriction for use in grapes 'do not apply after E-L 33'

Veterinary chemical products and approved labels

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has registered or varied the relevant particulars or conditions of the registration in respect of the following products and has approved the label or varied the relevant particulars or conditions of the approval in respect of the containers for the chemical product, with effect from the dates shown.

Table 4: Veterinary products based on existing active constituents

Application no.	134411
Product name	Clavox L Broad Spectrum Antibiotic Tablets
Active constituent	500 mg/tablet amoxicillin (as the trihydrate), 125 mg/tablet clavulanic acid (as potassium clavulanate)
Applicant name	Abbey Laboratories Pty Ltd
Applicant ACN	156 000 430
Date of variation	1 August 2022
Product registration no.	92071
Label approval no.	92071/134411
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 500 mg amoxicillin (as the trihydrate), 125 mg clavulanic acid (as potassium clavulanate) tablet for the treatment of bacterial infections sensitive to clavulanic acid and amoxicillin in large dogs

Application no.	132153
Product name	Praziquantel 50 mg Tablet
Active constituent	50 mg/tablet praziquantel
Applicant name	Ashish Life Science Pvt Ltd
Applicant ACN	N/A
Date of variation	2 August 2022
Product registration no.	91414
Label approval no.	91414/132153
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 50 mg/tb praziquantel tablet for the control of tapeworms in dogs and cats

Application no.	134410
Product name	Clavox S Broad Spectrum Antibiotic Tablets
Active constituent	50 mg/tablet amoxicillin (as the trihydrate), 12.5 mg/tablet clavulanic acid (as potassium clavulanate)
Applicant name	Abbey Laboratories Pty Ltd
Applicant ACN	156 000 430
Date of variation	2 August 2022
Product registration no.	92070
Label approval no.	92070/134410
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 50 mg amoxicillin (as the trihydrate), 12.5 mg clavulanic acid (as potassium clavulanate) tablet for the treatment of bacterial infections sensitive to clavulanic acid and amoxicillin in cats and small dogs

Application no.	134754
Product name	Prazimax Duo Broad Spectrum Antiparasitic Paste for Horses
Active constituent	77.5 mg/g praziquantel, 15.5 mg/g ivermectin
Applicant name	Abbey Laboratories Pty Ltd
Applicant ACN	156 000 430
Date of variation	2 August 2022
Product registration no.	92178
Label approval no.	92178/134754
Description of the application and its purpose, including the intended use of the chemical product	Registration of 15.5 mg/g ivermectin and 77.5 mg/g praziquantel paste product for oral administration to treat and control intestinal round worms (including larval stages of <i>Strongylus vulgaris</i> in intestinal arteries and benzimidazole resistant strongyles), lungworms, tapeworms, bots, and skin lesions caused by <i>Habronema</i> and <i>Draschia spp.</i> (summer sores) and <i>Onchocerca spp.</i> microfilariae (<i>Cutaneous onchocerciasis</i>) in horses

Application no.	135472
Product name	Equacare Joint Health Powder for Horses
Active constituent	500 g/kg glucosamine hydrochloride
Applicant name	Equacare Pty Ltd
Applicant ACN	650 408 861
Date of variation	2 August 2022
Product registration no.	92430
Label approval no.	92430/135472
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 500 g/kg glucosamine hydrochloride powder product to help improve joint health and function in horses

Application no.	136016
Product name	Acti-trace Injection for Cattle
Active constituent	40 g/L zinc as disodium zinc EDTA, 15 g/L copper as disodium copper EDTA, 10 g/L manganese as disodium manganese EDTA, 5 g/L selenium as sodium selenite
Applicant name	Virbac (Australia) Pty Ltd
Applicant ACN	003 268 871
Date of variation	2 August 2022
Product registration no.	92616
Label approval no.	92616/136016
Description of the application and its purpose, including the intended use of the chemical product	Registration of a 40 g/L zinc as disodium zinc EDTA, 15 g/L copper as disodium copper EDTA, 10 g/L manganese as disodium manganese EDTA and 5 g/L selenium as sodium selenite injectable product for use in beef and dairy cattle to supplement zinc, copper, selenium and manganese

Application no.	134557
Product name	Azacalm Neuroleptic Injection for Pigs
Active constituent	40 mg/mL azaperone
Applicant name	Vetpharm Laboratories IP Pty Ltd
Applicant ACN	654 406 756
Date of variation	9 August 2022
Product registration no.	92117
Label approval no.	92117/134557
Description of the application and its purpose, including the intended use of the chemical product	Registration of 40 mg/mL azaperone injectable parental solution product for psychomotor sedation in pigs

Table 5: Variations of registration

Application no.	135353
Product name	Troy Vitamin B12 Injection
Active constituent	1 mg/mL cyanocobalamin
Applicant name	Troy Laboratories Pty Ltd
Applicant ACN	000 283 769
Date of variation	2 August 2022
Product registration no.	52509
Label approval no.	52509/135353
Description of the application and its purpose, including the intended use of the chemical product	Variation of relevant particulars of the product and label to amend the claim as well as update the label to the current Veterinary Labelling Code

Application no.	135338
Product name	Entrodox 100 g Microgranulate Feed Additive
Active constituent	100 g/kg olaquinox
Applicant name	Dox-al Australia Pty Ltd
Applicant ACN	079 454 265
Date of variation	3 August 2022
Product registration no.	49013
Label approval no.	49013/135338
Description of the application and its purpose, including the intended use of the chemical product	Variation to the conditions of the label approval by aligning to the current Veterinary Labelling Code

Application no.	135339
Product name	Ilium Meloxicam Anti-Inflammatory Oral Suspension for Dogs
Active constituent	1.5 mg/mL meloxicam
Applicant name	Troy Laboratories Pty Ltd
Applicant ACN	000 283 769
Date of variation	5 August 2022
Product registration no.	60023
Label approval no.	60023/135339
Description of the application and its purpose, including the intended use of the chemical product	Variation to the relevant particulars of the product and label by updating the dosing instructions and marketed label name

Application no.	135342
Product name	Ilium Meloxicam 0.5 Anti-Inflammatory Oral Suspension for Cats
Active constituent	0.5 mg/mL meloxicam
Applicant name	Troy Laboratories Pty Ltd
Applicant ACN	000 283 769
Date of variation	5 August 2022
Product registration no.	63845
Label approval no.	63845/135342
Description of the application and its purpose, including the intended use of the chemical product	Variation to the relevant particulars of the product and label by updating the dosing instructions and marketed label name

Application no.	133057
Product name	Nobivac Flex DHP Live Vaccine
Active constituent	$\geq 4.0 \log_{10}$ TCID ₅₀ canine distemper virus strain onderstepoort, $\geq 4.0 \log_{10}$ TCID ₅₀ canine adenovirus type 2 strain Manhattan, $\geq 7.0 \log_{10}$ TCID ₅₀ canine parvovirus strain 154
Applicant name	Intervet Australia Pty Ltd
Applicant ACN	008 467 034
Date of variation	9 August 2022
Product registration no.	59043
Label approval no.	59043/133057
Description of the application and its purpose, including the intended use of the chemical product	Variation of the relevant particulars of the product and the label to update claims and dosage and administration

Application no.	133059
Product name	Nobivac Flex DHPPi Live Vaccine
Active constituent	$\geq 4.0 \log_{10}$ TCID ₅₀ canine distemper virus strain onderstepoort, $\geq 4.0 \log_{10}$ TCID ₅₀ canine adenovirus type 2 strain Manhattan, $\geq 7.0 \log_{10}$ TCID ₅₀ canine parvovirus strain 154, $\geq 5.5 \log_{10}$ TCID ₅₀ canine parainfluenza strain cornell
Applicant name	Intervet Australia Pty Ltd
Applicant ACN	008 467 034
Date of variation	9 August 2022
Product registration no.	56912
Label approval no.	56912/133059
Description of the application and its purpose, including the intended use of the chemical product	Variation of the relevant particulars of the product and the label to update claims and dosage and administration

Approved active constituents

Pursuant to the Agricultural and Veterinary Chemicals Code scheduled to the *Agricultural and Veterinary Chemicals Code Act 1994*, the APVMA hereby gives notice that it has approved or varied the relevant particulars or conditions of the approval of the following active constituents, with effect from the dates shown.

Table 6: Active constituent

Application no.	132681
Active constituent/s	Praziquantel
Applicant name	Ashish Life Science Pvt Ltd
Applicant ACN	N/A
Date of approval	2 August 2022
Approval no.	91575
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent praziquantel for use in veterinary chemical products

Application no.	134119
Active constituent/s	Isoxaflutole
Applicant name	Asynagro Company Limited
Applicant ACN	N/A
Date of approval	2 August 2022
Approval no.	91995
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent isoxaflutole for use in agricultural chemical products

Application no.	135275
Active constituent/s	Methadone hydrochloride
Applicant name	Avet Health Pty Ltd
Applicant ACN	616 838 101
Date of approval	2 August 2022
Approval no.	92359
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent methadone hydrochloride for use in veterinary chemical products

Application no.	133600
Active constituent	Clethodim
Applicant name	Yun Cropcare Co Ltd
Applicant ACN	N/A
Date of approval	3 August 2022
Approval no.	91828
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent clethodim for use in agricultural chemical products

Application no.	134582
Active constituent/s	Selamectin
Applicant name	Redcap Solutions Pty Ltd
Applicant ACN	095 863 899
Date of approval	3 August 2022
Approval no.	92127
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent selamectin for use in veterinary chemical products

Application no.	132680
Active constituent/s	Clethodim
Applicant name	Imtrade Australia Pty Ltd
Applicant ACN	090 151 134
Date of approval	4 August 2022
Approval no.	91574
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent clethodim for use in agricultural chemical products

Application no.	134793
Active constituent/s	Diazepam
Applicant name	Avet Health Pty Ltd
Applicant ACN	616 838 101
Date of approval	8 August 2022
Approval no.	92189
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent diazepam for use in veterinary chemical products

Application no.	134823
Active constituent/s	Phenylbutazone
Applicant name	Avet Health Pty Ltd
Applicant ACN	616 838 101
Date of approval	8 August 2022
Approval no.	92197
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent phenylbutazone for use in veterinary chemical products

Application no.	128548
Active constituent/s	cis-Jasmone
Applicant name	Nufarm Australia Limited
Applicant ACN	004 377 780
Date of approval	9 August 2022
Approval no.	90325
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent cis-jasmone for use in agricultural chemical products

Application no.	132783
Active constituent/s	Propiconazole
Applicant name	Syngenta Australia Pty Ltd
Applicant ACN	002 933 717
Date of approval	10 August 2022
Approval no.	91597
Description of the application and its purpose, including the intended use of the active constituent	Approval of the active constituent propiconazole for use in agricultural chemical products

Table 7: Variations of active constituent

Application no.	132823
Active constituent/s	Altrenogest
Applicant name	Ceva Animal Health Pty Ltd
Applicant ACN	002 692 426
Date of variation	3 August 2022
Approval no.	82896
Description of the application and its purpose, including the intended use of the active constituent	Variation of relevant particulars or conditions of an approved active constituent

Application no.	132465
Active constituent/s	Oil of lemon eucalyptus (hydrated, cyclized)
Applicant name	Citrefine International Ltd
Applicant ACN	N/A
Date of variation	10 August 2022
Approval no.	54942
Description of the application and its purpose, including the intended use of the active constituent	Variation to add and remove a manufacturing site for the existing approval

Amendments to the APVMA MRL Standard

The Australian Pesticides and Veterinary Medicines Authority (APVMA) approves maximum residue limits (MRLs) of agricultural and veterinary chemicals in agricultural produce, particularly produce entering the food chain. The MRLs approved by the APVMA are associated with a regulatory decision to register a product, grant a permit approval, or as an outcome from a review decision and are set out in the Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019. The MRL Standard lists MRLs of substances that may arise from the approved use of agricultural and veterinary chemical products containing those substances on commodities used for human consumption as well as livestock feeds. The MRL Standard also provides the relevant residue definitions to which these MRLs apply. There may be situations where the residue definition for monitoring and enforcement is different to the definition used for dietary risk assessment purposes.

MRLs are set at levels which are not likely to be exceeded if the agricultural or veterinary chemicals are used in accordance with approved label instructions. In considering MRLs and variation to MRLs, the APVMA takes into account studies on chemistry, metabolism, analytical methodology, residues, toxicology, good agricultural practice and dietary exposure. In approving MRLs, the APVMA is satisfied, from dietary exposure assessment, that the levels set are not an undue hazard to human health.

The APVMA has amended the MRL Standard and the changes will have affect the day after the instrument is registered.

Details of the amendment can be found in the Agricultural and Veterinary Chemicals Code (MRL Standard) Amendment Instrument (No. 6) 2022.

The amendments will be incorporated into the compilation of the Agricultural and Veterinary Chemicals Code (MRL Standard) Instrument 2019.

The MRL Standard is accessible via the [Federal Register of Legislation website](#).

Proposal to amend Schedule 20 in the Australian New Zealand Food Standards Code

In the previous notice on page 20 of APVMA Gazette No. 17, the APVMA gazetted amendments which it has approved to vary maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out in the APVMA's MRL Standard.

Under section 82 of the *Food Standards Australia New Zealand Act 1991*, the APVMA is proposing to incorporate those variations (Agricultural and Veterinary Chemicals Code (MRL Standard) Amendment Instrument 2022 (No. 6)) to MRLs into Schedule 20 – Maximum residue limits in the Australia New Zealand Food Standards Code.

MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means Schedule 20 permits the sale of treated foods and protects public health and safety by minimising residues in foods consistent with the effective control of pests and diseases.

The APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied, based on dietary exposure assessments and current health standards, that the proposed limits are not harmful to public health.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A Sanitary and Phytosanitary (SPS) notification to the World Trade Organization (WTO) will be made.

The APVMA invites comment on these proposals. Details on how to make a submission appear near the end of this notice, below the details of the proposed amendment.

The APVMA will consider any public comments made in response to this proposal. If the APVMA decides to proceed with the proposal, it will further notify any variations it makes to Schedule 20 in the APVMA Gazette. The variations will take effect as from the date of that subsequent notice.

Proposed variation to Schedule 20 in the Australia New Zealand Food Standards Code

23 August 2022

Note: Subsection 82(2) of the *Food Standards Australia New Zealand Act 1991* provides that variations to standards are legislative instruments but are not subject to disallowance or sunseting.

To commence: on gazettal of variation

[1] The table to section S20–3 in Schedule 20 is varied by

[1.1] omitting from each of the following chemicals, the foods and associated MRLs

Agvet chemical: Aminocyclopyrachlor

Permitted residue: Aminocyclopyrachlor

Mammalian fats [except milk fats]	0.05
-----------------------------------	------

Agvet chemical: Flupyradifurone

Permitted residue: Flupyradifurone

Avocado	0.7
---------	-----

[1.2] inserting for each of the following chemicals the foods and associated MRLs in alphabetical order

Agvet chemical: Aminocyclopyrachlor

Permitted residue: Aminocyclopyrachlor

Meat (mammalian) [in the fat]	0.05
-------------------------------	------

Agvet chemical: Amitraz

Permitted residue: Sum of amitraz and N-(2,4-dimethylphenyl)-n'-methylformamidine, expressed as N-(2,4-dimethylphenyl)-N'-methylformamidine

Honey	0.2
-------	-----

Agvet chemical: Buprofezin

Permitted residue: Buprofezin

Basil	5
Chives, Chinese	2
Garlic chives	2
Marjoram (oregano)	5
Mints	5
Thyme	5

Agvet chemical: Flupyradifurone

Permitted residue: Flupyradifurone

Agvet chemical: Flupyradifurone

Assorted tropical and sub-tropical fruits – inedible peel [except banana; mango; papaya; pineapple]	1.5
Olives for oil production	1
Table olives	1

Agvet chemical: Fluxapyroxad

Permitted residue: Fluxapyroxad

Pomegranate	T0.3
-------------	------

Agvet chemical: Pyraclostrobin

Permitted residue—commodities of plant origin: Pyraclostrobin

Permitted residue—commodities of animal origin: Sum of pyraclostrobin and metabolites hydrolysed to 1-(4-chloro-phenyl)-1H-pyrazol-3-ol, expressed as pyraclostrobin

Pomegranate	T0.3
-------------	------

Agvet chemical: Quizalofop-ethyl

Permitted residue: Sum of quizalofop-ethyl and quizalofop acid and other esters, expressed as quizalofop-ethyl

Barley	*0.02
--------	-------

[1.3] omitting for each of the following chemicals, the maximum residue limit for the food and substituting

Agvet chemical: Aminocyclopyrachlor

Permitted residue: Aminocyclopyrachlor

Edible offal (mammalian)	0.5
Milks	0.02

Agvet chemical: Imazapic

Permitted residue: Sum of imazapic and its hydroxymethyl derivative

Oats	0.05
------	------

Agvet chemical: Imazapyr

Permitted residue: Imazapyr

Oats	0.1
------	-----

Invitation for submissions

Written submissions are invited from interested individuals and organisations to assist the APVMA in considering the proposal to vary Schedule 20 – Maximum residue limits in the Australia New Zealand Food Standards Code.

Submissions should be strictly confined to relevant matters that the APVMA must consider (such as public health and safety) which are associated with the occurrence of the proposed residues in foods. Comments received outside these grounds will not be considered by the APVMA.

Claims made in submissions should be supported wherever possible by referencing or including relevant studies, research findings, trials and surveys. Technical information should be in sufficient detail to allow independent scientific assessment.

Submissions must be made in writing and should be clearly marked as a 'submission on the proposed amendment to Schedule 20' and quote the correct amendment number.

Deadline for public submissions

Submissions must be received by 20 September 2022 (28 days from date Gazette published). Submissions received after this deadline will only be considered by prior arrangement or if agreement for an extension has been given prior to this closing date. Agreement to an extension of time will only be given if extraordinary circumstances warrant an extension to the submission period.

Please note: submissions will be published on the APVMA's website, unless you have asked for the submission to remain confidential, or if the APVMA chooses at its discretion not to publish any submissions received (refer to the [public consultation coversheet](#)).

Please lodge your submission using the [public consultation coversheet](#), which provides options for how your submission will be published.

Note that all APVMA documents are subject to the access provisions of the *Freedom of Information Act 1982* and may be required to be released under that Act should a request for access be made.

Variations to Schedule 20 of the Australian New Zealand Food Standards Code

The APVMA has previously gazetted particular amendments which it had made to the APVMA MRL Standard, and which have been proposed as variations to maximum residue limits (MRLs) for substances contained in agricultural and veterinary chemical products as set out as in Schedule 20 – Maximum residue limits of the Australia New Zealand Food Standards Code. This notice pertains to proposals (No. 3) gazetted on 17 May 2022 (No. APVMA 10).

Submissions have been sought on these proposals and the APVMA has written separately to each person or organisation that made a submission. All matters raised in the submissions have been resolved.

Under subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*, the APVMA has, by legislative instrument, incorporated these variations to MRLs into Schedule 20. A copy of the Amendment Instrument (No. APVMA 3, 2022) accompanies this notice. For a complete and up-to-date version of Schedule 20, including these amendments together with their Explanatory Statement, please refer to the [Federal Register of Legislation](#).

Based on dietary exposure assessments and current health standards, the APVMA and Food Standards Australia New Zealand (FSANZ) are satisfied that these MRLs are not harmful to public health. MRLs contained in Schedule 20 provide the limits for residues of agricultural and veterinary chemicals that may legitimately occur in foods. By this means, Schedule 20 permits the sale of treated foods and protects public health by minimising residues in foods consistent with the effective control of pests and diseases.

The agreement between the Australian Government and the New Zealand Government concerning a Joint Food Standards System, excludes MRLs for agricultural and veterinary chemicals in food from the system setting joint food standards. Australia and New Zealand independently and separately develop MRLs for agricultural and veterinary chemicals in food.

A Sanitary and Phytosanitary notification to the World Trade Organization (WTO) was also made in relation to the variations to MRLs in Schedule 20 and no comment was received in response to that notice.

A copy of these variations has been given to FSANZ.

The variations take effect as from the date of this notice.

This notice is published in accordance with subsection 82(7) of the *Food Standards Australia New Zealand Act 1991*.

Australian Government

**Australian Pesticides and
Veterinary Medicines Authority**

***Australia New Zealand
Food Standards Code —
Schedule 20 — Maximum residue limits Variation
Instrument No. APVMA 4, 2022***

I, Sheila Logan, delegate of the Australian Pesticides and Veterinary Medicines Authority, acting in accordance with my powers under subsection 11(1) of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*, make this instrument for the purposes of subsection 82(1) of the *Food Standards Australia New Zealand Act 1991*.

Sheila Logan

Delegate of the Chief Executive Officer of the Australian Pesticides and Veterinary Medicines Authority

Dated this Eighteenth day of August 2022

Part 1 Preliminary

1 Name of instrument

This instrument is the *Australia New Zealand Food Standards Code — Schedule 20 — Maximum residue limits Variation Instrument No. APVMA 4, 2022* (Amendment Instrument).

2 Commencement

In accordance with subsection 82(8) of the *Food Standards Australia New Zealand Act 1991*, this instrument commences on the day it is published in the *Gazette*.

Note: A copy of the variations made by the Amendment Instrument was published in the Commonwealth of Australia Agricultural and Veterinary Chemicals Gazette.

3 Object

The object of this instrument is for the APVMA to make variations to Schedule 20 — Maximum residue limits in the *Australia New Zealand Food Standards Code* to include or change maximum residue limits pertaining to agricultural and veterinary chemical products.

4 Interpretation

In this instrument: —

APVMA means the Australian Pesticides and Veterinary Medicines Authority established by section 6 of the *Agricultural and Veterinary Chemicals (Administration) Act 1992*; and

Principal Instrument means Schedule 20—Maximum residue limits in the Australia New Zealand Food Standard Code as defined in Section 4 of the *Food Standards Australia New Zealand Act 1991* being the Code published in *Gazette* No. P 27 on 27 August 1987 together with any amendments of the standards in that Code. Schedule 20 was published in the *Food Standards Gazette* FSC 96 on Thursday 10 April 2015 and was registered as a legislative instrument on 1 April 2015 (F2015L00468).

Part 2 Variations to Schedule 20— Maximum Residue Limits

5 Variations to Schedule 20

The Schedule to this instrument sets out the variations made to the Principal Instrument by this instrument.

Schedule

Variations to Schedule 20 – Maximum residue limits

[1] The table to section S20–3 in Schedule 20 is varied by

[1.1] omitting from each of the following chemicals, the foods and associated MRLs

Agvet chemical: Fluopyram

Permitted residue—commodities of plant origin: Fluopyram

Permitted residue—commodities of animal origin: Sum of fluopyram and 2-(trifluoromethyl)-benzamide, expressed as fluopyram

Almonds	0.05
Tree nuts	0.05

Agvet chemical: Fluroxypyr

Permitted residue: Fluroxypyr

Cereal grains	0.2
---------------	-----

[1.2] inserting for each of the following chemicals the foods and associated MRLs in alphabetical order

Agvet chemical: Bifenthrin

Permitted residue: Bifenthrin

Fig	T1
-----	----

Agvet chemical: Diflufenican

Permitted residue: Diflufenican

Safflower seed	T*0.05
----------------	--------

Agvet chemical: Fluopyram

Permitted residue—commodities of plant origin: Fluopyram

Permitted residue—commodities of animal origin: Sum of fluopyram and 2-(trifluoromethyl)-benzamide, expressed as fluopyram

Tree nuts [except walnuts]	0.05
Walnuts	T0.07

Agvet chemical: Fluroxypyr

Permitted residue: Fluroxypyr

Cereal grains [except rice bran, unprocessed]	0.2
---	-----

Agvet chemical: Prothioconazole

Permitted residue—commodities of plant origin: Sum of prothioconazole and prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), expressed as Prothioconazole

Permitted residue—commodities of animal origin: Sum of prothioconazole, prothioconazole desthio (2-(1-chlorocyclopropyl)-1-(2-chlorophenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), prothioconazole-3-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-3-hydroxyphenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol) and prothioconazole-4-hydroxy-desthio (2-(1-chlorocyclopropyl)-1-(2-chloro-4-hydroxyphenyl)-3-(1H-1,2,4-triazol-1-yl)-propan-2-ol), expressed as prothioconazole

Sunflower seed	*0.02
----------------	-------

Agvet chemical: Tebuconazole

Permitted residue: Tebuconazole

Sunflower seed	0.1
----------------	-----

Agvet chemical: Tetraniliprole

Permitted residue: Tetraniliprole

Fig	T0.5
-----	------

Agvet chemical: Trifludimoxazin

Permitted residue: Trifludimoxazin

Oats	*0.01
------	-------

Triticale	*0.01
-----------	-------

[1.3] omitting for each of the following chemicals, the maximum residue limit for the food and substituting

Agvet chemical: Indoxacarb

Permitted residue: Sum of indoxacarb and its R-isomer

Macadamia nuts	0.03
----------------	------

Agvet chemical: Thiabendazole

Permitted residue—commodities of plant origin: Thiabendazole

Permitted residue—commodities of animal origin: Sum of thiabendazole and 5-hydroxythiabendazole, expressed as thiabendazole

New legislative instrument – Agricultural and Veterinary Chemicals Code (Allowable Variation in Concentrations of Constituents in Agricultural Chemical Products) Standard 2022

The Agricultural and Veterinary Chemicals Code (Allowable Variation in Concentrations of Constituents in Agricultural Chemical Products) Standard 2022 is a new legislative instrument made on 9 August 2022 under section 6E of the Agvet Code. The instrument commenced on 16 August 2022, the day after it was registered on the Federal Register of Legislation.

As required by regulation 8AF(1) of the Agricultural and Veterinary Chemicals Code Regulations (the Regulations), the proposal to establish the new standard was released for public consultation on the [APVMA website](#) and in the [APVMA Gazette](#) on 3 May 2022. Comments received in response to the public consultation were generally supportive of the new standard and were [published on the APVMA website](#). Some minor changes from the draft standard were made in response to the comments.

Under regulation 8AF(4) of the Regulations, the APVMA must publish a notice in the APVMA Gazette and on its website when it makes a standard under section 6E of the Code, stating that the standard has been made. This notice was also [published on the APVMA website](#) on 23 August 2022.

Under recent changes made to the Agvet Code, section 5AA states that concentrations of constituents in registered chemical products must not differ from the concentrations entered into the Register at the time of product registration by more than the extent prescribed by the Regulations (the prescribed extent).

Regulation 41(2) of the Regulations states that the prescribed extent is the extent permitted by the standards prescribed by Regulation 42.

In turn, Regulation 42(3) specifies the standard prescribed for a chemical product as being the standard published in any of a 'cascade' of publications, with a publication higher in the cascade taking precedence over one lower down. The publications are, in order, a standard specified in an Order made under section 7 of the *Agricultural and Veterinary Chemicals Code Act 1994* (of which there are none currently), a standard made under section 6E of the Code (as has been done), a standard published for a listed chemical product, a monograph in the British, European or US Pharmacopoeia, or a specification published by the Food and Agriculture Organization (FAO) and/or the World Health Organisation (WHO).

Establishment of the standard for allowable variations in concentrations of constituents in agricultural chemical products as a standard under section 6E of the Agvet Code gives the APVMA full control over the standard.

The standard prescribes the extent of the allowable variation in the concentrations of constituents (including active and non-active constituents) in registered agricultural chemical products. The standard does not cover veterinary chemical products – it is envisaged that a similar standard will be created for veterinary chemical products in the future.

The allowable variations for concentrations of active constituents of agricultural chemical products are the same as those listed in the guideline for chemistry and manufacture requirements for agricultural chemical products. These allowable variations are already applied in the chemistry assessment of agricultural chemical products and inclusion in a standard under section 6E of the Code gives them a more formal status.

The allowable variations for concentrations of non-active constituents of agricultural chemical products are harmonised with regulations of overseas authorities, including the [US EPA](#) and [New Zealand Ministry of Primary Industries](#). Until now, there has been no defined allowable variation in the concentrations of non-active constituents, which has created challenges for the APVMA and industry.

In addition, the standard includes provision for applicants to nominate non-standard allowable variations for the concentrations of both active and non-active constituents, where this can be justified and will allow the APVMA to be satisfied with respect to the safety, efficacy and trade criteria.

There are no changes to processes for registration or assessment of agricultural chemical products in conjunction with the new standard, beyond any consideration needed for a 'non-standard' allowable variation as discussed in the previous paragraph.

It should be noted that the standard allows for reasonable variation from concentrations in the registered chemical product that are expected from normal variability in manufacturing processes, and in analytical methods. It does not allow the 'target', nominal, or declared concentrations of constituents to be varied from those on the Register without appropriate application to the APVMA for variation of relevant particulars of the product under an item 12 or 14 (Schedule 6, Part 2, Clause 2.1 of the Regulations) as appropriate, even where such a change is within the allowable variations defined in the standard.

Further, this standard does not specify a level of difference in concentrations that constitute closely similar product formulations.

The standard will be updated from time to time as required. All such changes will be consulted on as required by regulation 8AF.

Enquiries about the new legislative instrument may be directed to enquiries@apvma.gov.au.

Notice of cancellation at the request of the holder

At the request of the holder, in accordance with section 42(1) of the *Agricultural and Veterinary Chemicals Code Act 1994* (Agvet Code), the APVMA has cancelled the approvals and/or registrations set out in Table 8:

Table 8: Active constituent approval/product registration/label approval cancelled at the request of the holder

Approval or registration number	Name	Type of approval or registration	Holder	Reason for cancellation (if relevant pursuant to s 45A(3))	Date of cancellation
48734	Methomyl	Active constituent approval	Corteva Agriscience Australia Pty Ltd	N/A	8 August 2022
54077/0309 54077/0801 54077/0909	Imtrade Chemphos 400 Fungicide	Label approval	Imtrade Australia Pty Ltd	May not meet labelling criteria	9 August 2022

83116/113127	Lawthal 750WG Herbicide	Label approval	Nutrien Ag Solutions Limited	May not meet labelling criteria	5 August 2022

Approval or registration number	Name	Type of approval or registration	Holder	Reason for cancellation (if relevant pursuant to s 45A(3))	Date of cancellation
84082/109657 84082/113647	Conquest Concydone 500 SC Fungicide	Label approval	Conquest Crop Protection Pty Ltd	N/A	19 July 2022
88705/122051	Titan Chlorthal 900WG Pre- Emergence Herbicide	Label approval	Titan Ag Pty Ltd	May not meet labelling criteria	20 July 2022

In accordance with section 45A(1)(b) of the Agvet Code, the APVMA publishes this notice of the cancellation, including the following instructions which set out how a person can deal with the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 8.

Instructions

Instructions for persons who possess, have custody of or use the cancelled active constituent, cancelled product, or the product bearing a cancelled label under section 45B(3) of the Agvet Code.

A person who possesses, has custody of or uses the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 8 in accordance with the instructions contained in this notice, is taken to have been issued with a permit under section 45B(3) of the Agvet Code to possess, have custody of or use the cancelled active constituent, cancelled product or product bearing a cancelled label, in accordance with those instructions.

Possession or custody

A person may possess the cancelled active constituent, cancelled product or product bearing a cancelled label referred to in Table 8 in accordance with its label instructions for 12 months from the date of cancellation.

Use, supply or otherwise deal with

A person may use the cancelled active constituent, cancelled product or products bearing a cancelled label referred to in Table 8 according to its label instructions, including any conditions relating to shelf life or expiry date, for 12 months after the date of cancellation.

A person may supply or cause to be supplied at wholesale or retail level the cancelled active constituent, cancelled product, or product bearing a cancelled label referred to in Table 8, for 12 months after the date of cancellation.

Contraventions

After the day that is 12 months from the date of cancellation it will be an offence against the Agvet Code to have possession or custody of the cancelled active constituents, cancelled products or products bearing a cancelled label with the intention to supply, or to supply the cancelled active constituent, cancelled product, or product bearing a cancelled label.

It is an offence to possess, have custody of, use, or otherwise deal with the cancelled active constituents, cancelled products or products bearing the cancelled label listed in Table 8 in a manner that contravenes the above instructions.
