

APVMA 2022–23 Compliance Plan

Partnering with Commonwealth, state and international regulators, we will use a risk-based methodology to detect, deter and disrupt non-compliance within the agvet chemical sector and enforce agvet legislation.

Delivery

Intelligence led

- 1 Use intelligence (qualitative and quantitative data) to identify risk to inform compliance-based decision making.
- 2 Secure compliance with agvet legislation through appropriate, proportionate, consistent and effective compliance actions.
- 3 Actively monitor and plan for risks of market changes and new business models that may have flow-on effects for operations.

Engagement

Collaboration

- 1 Provide guidance and information that is relevant, clear, concise and easily accessible to help regulated entities understand their obligations and responsibilities to encourage voluntary compliance.
- 2 Engagement on matters related to listed, reserved and excluded products.
- 3 The APVMA seeks to be transparent in its decision-making and, where possible, provide reasons for regulatory decisions.

Reform

Continuous improvement

- 1 Harmonise activities with other domestic and international regulators to achieve better regulatory outcomes.
- 2 Actively share insights by participating in communities of practice, engaging with other regulators and stakeholders to promote continuous improvement.
- 3 The APVMA will focus on the achievement of voluntary compliance with agvet legislation from scheme participants.
