Date: 29 September 2021

To whom it may concern

I write in response to a request for comments on an emergency permit application from Grain Producers Australia Limited for the use of chlorantraniliprole on sorghum and millet, for the control of fall armyworm.

This submission is presented on behalf of the National Working Party on Grain Protection (NWPGP).

1. The NWPGP:

- Is the industry body responsible for providing management and leadership to industry in the areas of post-harvest storage, chemical use, market requirements and chemical regulations.
- Is facilitated by Grain Trade Australia.
- Has members across the entire grain supply chain.
- Hosts an annual forum providing participants with the latest research and developments, in the area of post-harvest storage and hygiene, chemical usage and outturn tolerances, international and domestic market requirements, and regulations.
- Co-ordinates and provides government with industry views on chemicals in use on grain and associated products.
- For further details, refer to <http://www.graintrade.org.au/nwpgp>

2. Industry Views on the Application

On behalf of the NWPGP I advise that based on the information provided by APVMA in the Trade Advice Notice (TAN), industry does not object to the proposed registration on sorghum. No comment is made for millet.

Should you have any questions on this submission please do not hesitate to contact me.

Regards

A handwritten signature in black ink, appearing to read 'G McMullen', is shown.
